

## Affordable Housing Incentive Program Utility Estimate Schedule

The City of Seattle's Affordable Housing Incentive Programs (Multifamily Tax Exemption, Incentive Zoning and Mandatory Housing Affordability) require that a utility estimate is incorporated into the gross rent when tenants are responsible for paying out-of-pocket utility expenses. Once incorporated into the rent calculation, the resident is responsible for the actual utility bill(s). Changes to the allowance must be implemented immediately for all new move-ins on or after the effective date of 4/1/2022 and within 90 days (7/1/2022) of the effective date for existing residents. Properties must provide the required notice per RCW 59.18.140 and SMC 7.24.030 and may not increase the rent on a fixed term lease as a result of the change in a utility estimate. Utility allowance increases will often require an adjustment (decrease) to rents, even if mid-lease. **Properties that have additional affordable housing commitments (LIHTC, Levy funded, HOME, etc.) should adjust utility estimates in accordance with the requirements of their most restrictive funder.**
