SUMMARY

PLACE and SPR participated in two distinct community engagement efforts in December for the second phase of Marra Desimone Park. The community meeting at the Public Library drew people from broad outreach and the online survey expressly for the purpose of learning about the park. The informational boards at the Concord Posada helped us catch people in a larger community event, talk to them about the project and collect input. Overall, the two meetings demonstrated continuity in the trends, while we were able to garner more specific input at the library event.
