

SW Andover St Pedestrian and Bicycle Bridge Seismic Retrofit Project

CONSTRUCTION NOTICE

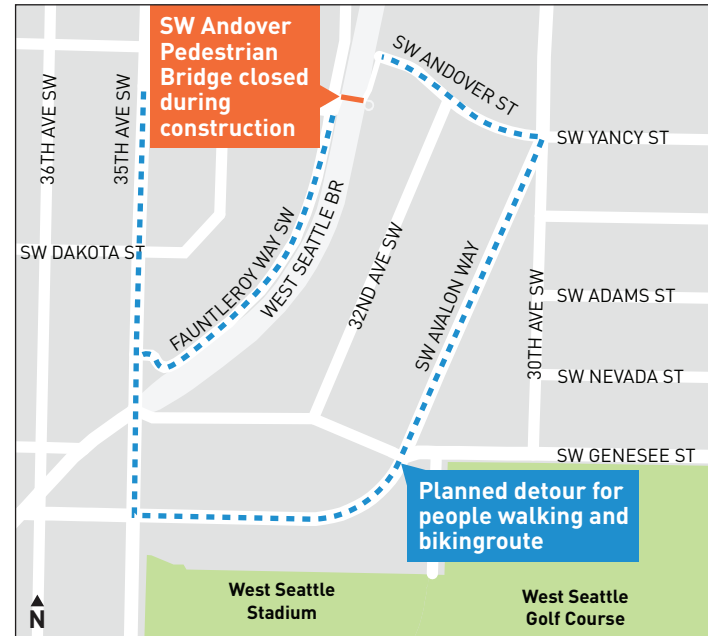

We're expecting to start construction this month to make the SW Andover Pedestrian Bridge stronger and safer in the event of an earthquake. Construction is expected to last up to 3 months. We are working with the contractor to minimize impacts to the community. You can expect construction noise, vehicles, people, and equipment throughout this work.

While we are working on the bridge, it will be closed to the community. Please see the detour route on the right. As you plan your alternate route while the bridge is closed, please let us know if you would like our assistance in travel planning.

We appreciate your patience and look forward to reopening the Andover pedestrian bridge as soon as work is done and it's ready for use again.
