

Yesler Bridge Rehabilitation Project

Project overview

- Built in 1910 as one of the first steel roadway bridges in the City
- Being rehabilitated to improve safety and reliability while preserving its principal historical elements
- Vital in connecting residents, commuters, workers, and businesses in the surrounding area and neighborhoods

Project area

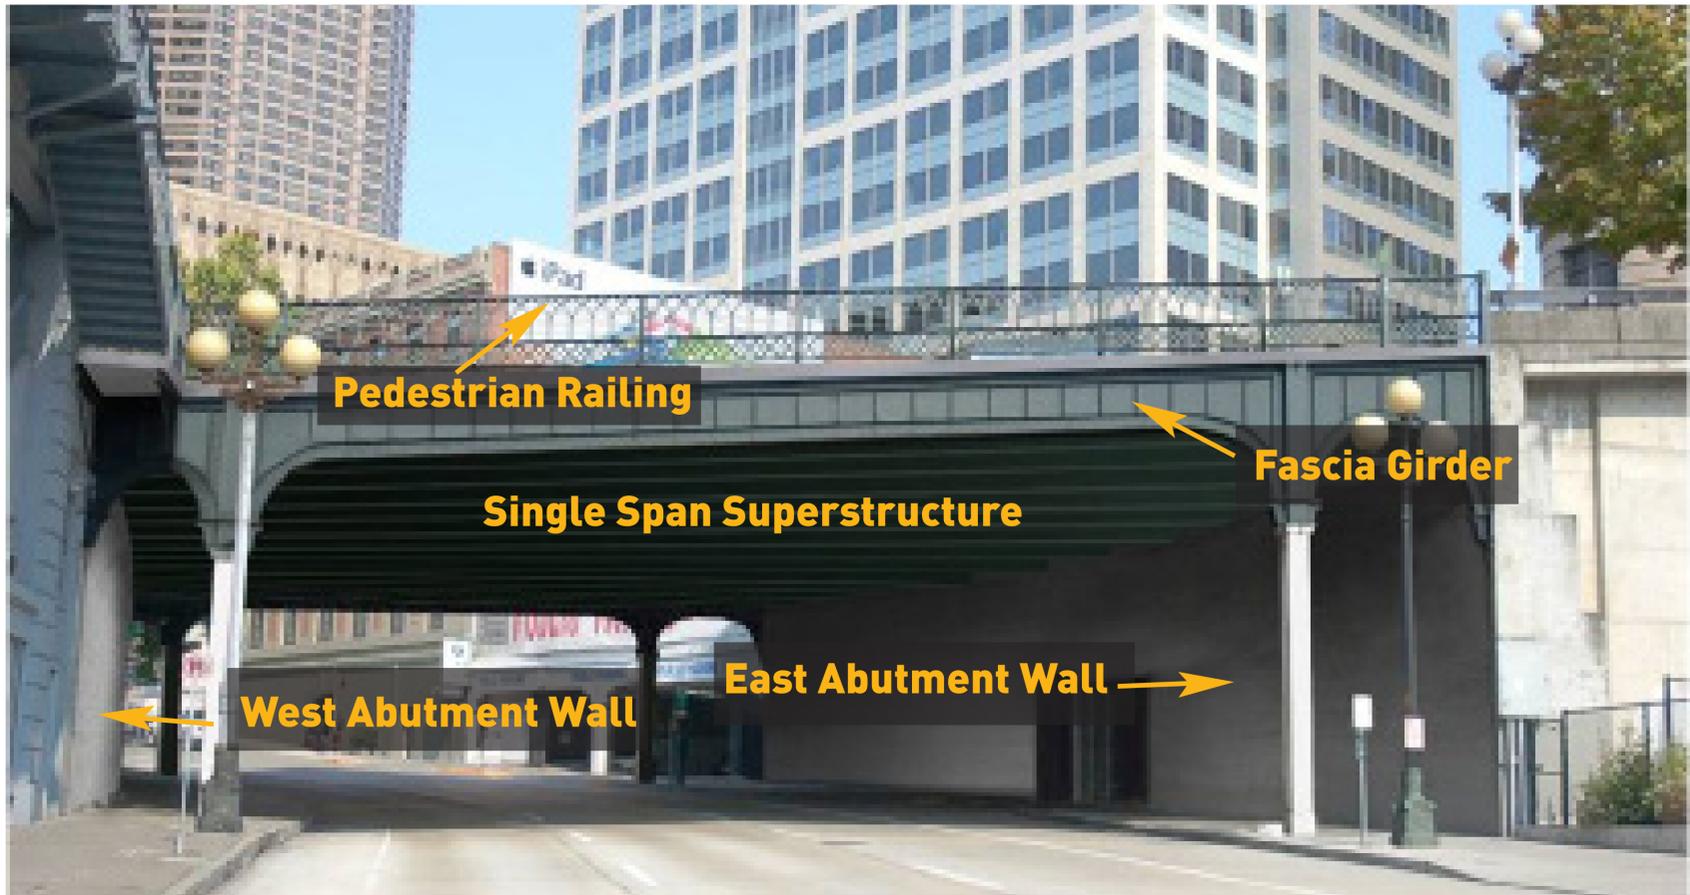

Schedule

Yesler Bridge Rehabilitation Project

Final bridge design

Design rendering

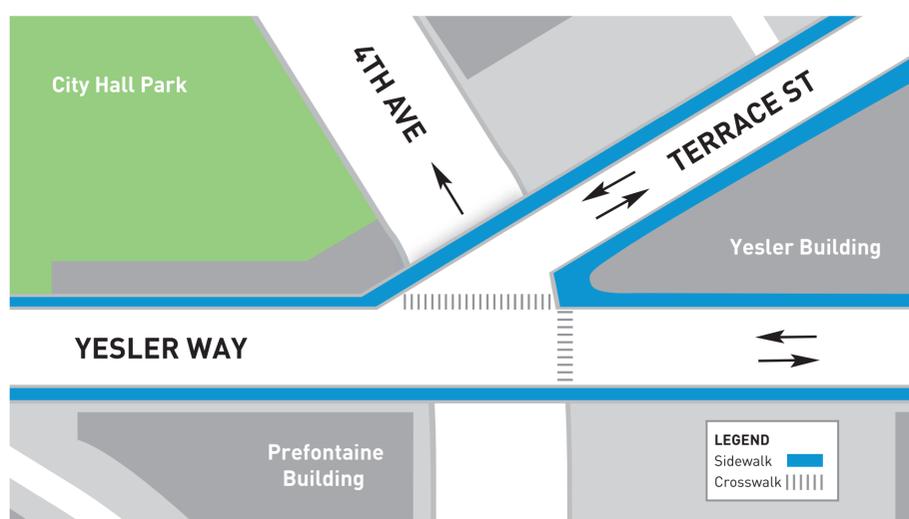

Design

- Remove interior steel columns to form a single span superstructure
- Rehabilitate east abutment wall and replace west abutment wall
- Refurbish north and south fascia girders and pedestrian railings

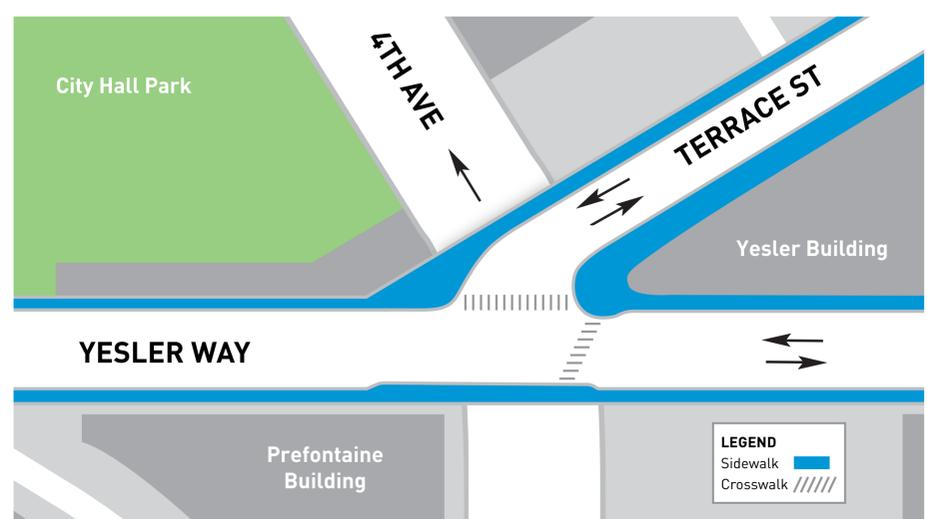

Pedestrian improvements

- Improve intersection design to reduce crosswalk distance, accommodate ADA, and improve pedestrian visibility

Before

After

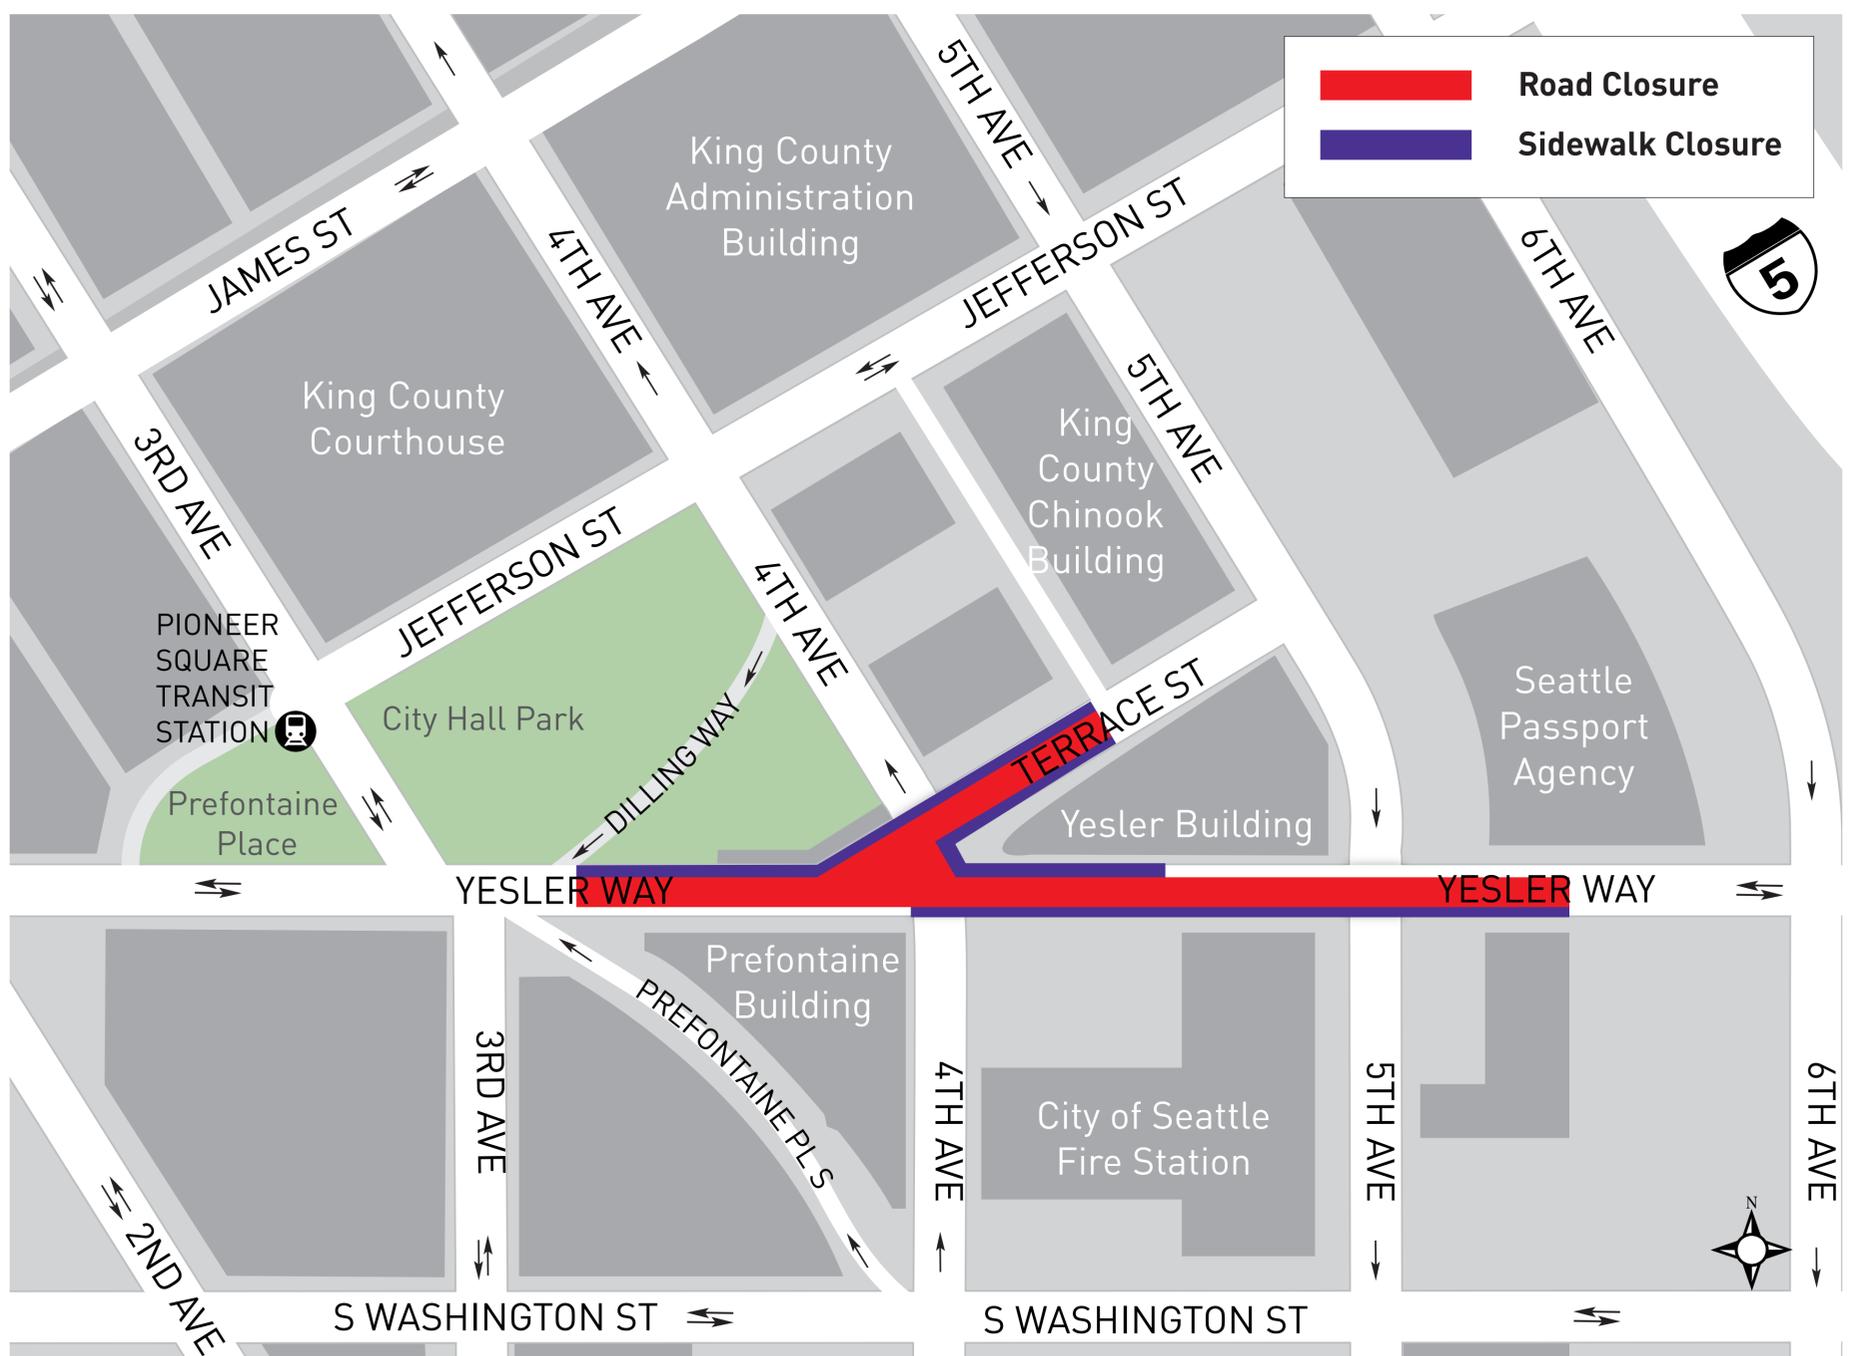

Yesler Bridge Rehabilitation Project

Construction impacts

Street closures

- Yesler Way will be closed in both directions between 3rd Ave and midway between 5th Ave and 6th Ave
- Terrace St will be closed to through traffic, open to local access
- 4th Ave will have ongoing lane closures and occasional full nighttime and weekend closures
- Sidewalks on either side of 4th Ave will have alternating closures

Street and sidewalk closures

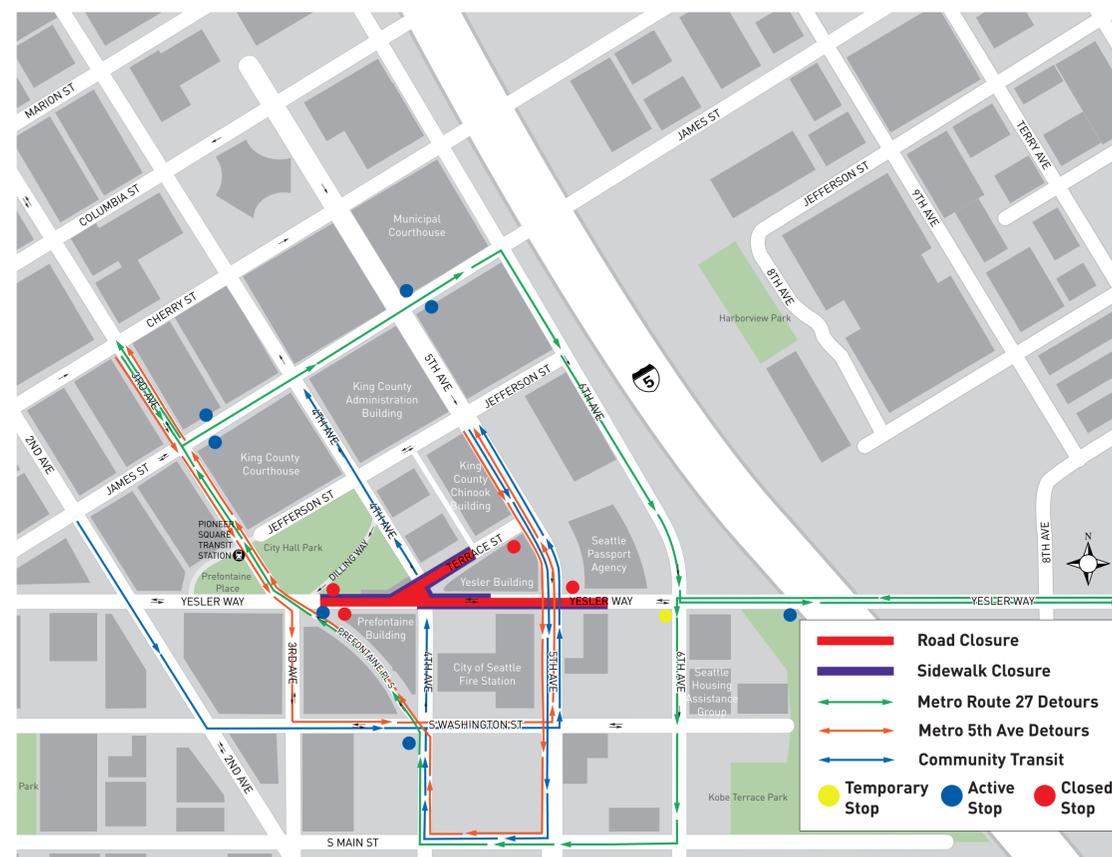

Yesler Bridge Rehabilitation Project
