Notes:

- These figures represent the total number of legal, on-street parking spaces in the project area only. City of Seattle DPD Tip #117 contains standards for developing a legal on-street parking inventory.
- This parking inventory includes legal curb space used for existing parking spaces or load zones. It does not include parking in areas 5 feet from driveways, 15 feet from fire hydrants, 20 feet from crosswalks, and 30 feet from intersections, which is illegal under state and local laws.
