DEPARTMENT OF CRIMINAL JUSTICE

SEATTLEU

2016 Seattle Public Safety Survey Results

SEATTLE - CITYWIDE

Top Public Safety Concerns

The top public safety concerns for the City of Seattle and Seattle Police Department's five precincts and micro-communities are reported based on quantitative results from the Seattle Public Safety Survey in response to the question "What, if any, are current public safety and security concerns in the neighborhood where you live and/or work? Select all that apply."

Most Prominent Themes

The most prominent themes for the City of Seattle and Seattle Police Department's five precincts and micro-communities were identified from narrative comments in survey responses to questions "Do you have any additional thoughts on public safety and security issues in Seattle, generally, or your neighborhood, specifically, that you would like to share?" and "Do you have any thoughts on the Micro-Community Policing Plan Initiative that you would like to share?"

Measures of Community Perceptions of Public Safety

The survey included question sets that make up distinct scales that measure community perceptions of police, neighborhood features, and crime as related to public safety. Results are reported for question sets measuring Police Legitimacy, Collective Efficacy-Informal Social Control, Collective Efficacy-Social Cohesion, Fear of Crime, Social Disorganization, and MCPP Perception for the East Precinct and East Precinct micro-communities.

Top Public Safety Concerns and Prominent Themes for Seattle Citywide

TOP PUBLIC SAFETY CONCERNS

- 1- Lack of Police Capacity/ Presence
- 2- Car Prowl
- 3- Residential Burglary
- 4- Property Crime
- 5- Auto Theft

MOST PROMINENT THEMES

- 1- Lack of Police Capacity/ Presence
- 2- Homelessness is a Public Safety and Public Health Issue
- 3- Public Order Crime
- 4- Property Crime
- 5- Better city coordination needed to increase public safety

Introduction and Overview

Seattle Police Department's Micro-Community Policing Plans

The SPD Micro-Community Policing Plans (MCPP) The Seattle Police Department's Micro-Community Policing Plans were implemented in January 2015. The SPD MCPP is based on the notion that public safety can be enhanced and crime reduced through collaborative police-community attention to distinctive needs of Seattle neighborhoods with focused crime control, crime prevention and quality of life strategies on neighborhood-specific priorities. The SPD MCPP recognizes that no two Seattle neighborhoods are the alike and that citizen perceptions of crime and public safety at the micro-community level matter. The MCPPs take a three-prong approach to bring together community engagement, crime data, and police services. MCPPs are tailored to meet the individual needs of each micro-community with a unique approach owned by the community. When used in conjunction with crime data, information gathered through community engagement to develop the MCPPs that take into account citizen perceptions at the micro-community level provide a much more accurate picture of the reality of crime and public safety than does official crime data alone. This utilization of citizen feedback and community perception of crime and public safety used in conjunction with official crime data to understand and address the reality of crime in communities makes the MCPP strategy unique and unprecedented. A central component of the MCPP is the annual Seattle Public Safety Survey which was first administered in October-November 2015. The Seattle Public Safety Survey is independently conducted by a research team from Seattle University Department of Criminal Justice including Dr. Jacqueline Helfgott (Principal Investigator), Dr. William Parkin (Co-Investigator), and graduate student research assistant/analysts who work in each of the SPD precincts --Jennifer Burbridge/Joseph Singer (Southwest Precinct), Brooke Bray (South Precinct), Shannon Ro (East Precinct), Jessica Chandler (North Precinct), and Chase Yap (West Precinct) assisting with tasks associated with the MCPP.

The 2016 Seattle Public Safety Survey

The Seattle Public Safety survey is a non-probability survey designed as part of the SPD MCPP evaluation to collect data from citizens at city, precinct, and micro-community levels regarding public safety issues, perceptions of police and neighborhood features, and crime as related to public safety, fear of crime, crime victimization. The purpose of the survey is to collect data regarding what matters to citizens regarding public safety, neighborhoods and communities, and the police to better understand the priorities of citizens in conjunction with official crime statistics collected by SPD and other avenues used by SPD to identify community-level public safety concerns. The 2016 survey was administered online and on paper October 15, 2016- November 30, 2016 in Amharic, Chinese, English, Korean, Somali, Spanish and Vietnamese through multiple channels including Nextdoor.com, Seattle Police Department, Seattle Mayor's Office, Seattle University, Community Groups, Flyer and business card distribution, and tablet administration at community centers, libraries, and public areas with attempt to target underrepresented communities.

How the Seattle Public Safety Survey Results Inform the Seattle Police Micro-Community Policing Plans

The Seattle Public Safety Survey results offer SPD comprehensive data reflecting the views of citizens at city, precinct, and micro-community levels to inform the SPD MCPP priorities and strategies. The specific goal of the survey is to collect data that captures citywide citizen concerns about public safety, police, and neighborhoods to inform the SPD MCPPs. The survey findings supplement official crime statistics and traditional precinct-level methods of identifying community concerns (e.g., police-community meetings, ad-hoc precinct surveys) to ensure that the MCPP priorities and strategies are closely aligned with the public safety concerns of all citizens within the city, precincts, and micro-communities.

Description of Scales included in the Seattle Public Safety Survey

Measures of Community Perceptions of Public Safety

The 2016 Seattle Public Safety Survey included question sets that make up distinct scales that measure community perceptions of police, neighborhood features, and crime as related to public safety based on prior research on aspects of communities that impact citizen perceptions of public safety. This document is a supplement to the Precinct Reports on the 2016 Seattle Public Safety Survey findings describing the scales and associated questions included in the survey to measure community perceptions of public safety. The scales included in the survey focus on seven areas of interest: **M CPP Perception, M CPP Knowledge, Police Legitimacy, Collective Efficacy- Informal Social Control, Collective Efficacy- Social Cohesion, Social Disorganization, and Fear of Crime.**

How Scale Data Can Be Used to Improve Public Safety

The scale data can be used in conjunction with the top concerns and prominent themes to better understand the nature of communities and micro-communities and their unique public safety issues. Concerns of citizens within any given micro-community may differ in terms of perceptions of public safety with respect to police legitimacy, informal social control, social cohesion, fear of crime, and social disorganization, perceptions of the SPD Micro-Community Policing Plans, and knowledge of the SPD Micro-Community Policing Plans. The survey findings on the scales can be used in conjunction with the top concerns and prominent themes at the community and micro-community levels to inform and guide law enforcement in developing priorities and to guide strategies in response to distinct community concerns providing a snapshot of the nature of the precinct as a whole and the individual micro-communities regarding citizen views of aspects of communities related to public safety. Ideally, a healthy community with positive police-citizen relations will have positive perception and high knowledge of the SPD M CPP, high police legitimacy, high informal social control, high social cohesion, low social disorganization, and low fear of crime. Survey findings can assist communities to target areas of improvement with respect to areas that stray from the ideal and negatively impact public safety.

Law Enforcement Trust & Legitimacy.

Police legitimacy is an important concept relevant to public safety as it has been consistently found that law enforcement relies on police legitimacy in order for individuals to cooperate/comply with and support their departments. Gau (2014) defines police legitimacy as “an acceptance of the rules, laws, and precepts that define the police role in society, and a willingness to grant deference to police as a consequence of the belief that they are the authorized representatives who dutifully carry out the rules and laws that make society function smoothly” (p. 189). Police legitimacy is an important concept to public safety as it has been consistently found that law enforcement relies on police

2016 Seattle Public Safety Survey Results

legitimacy in order for individuals to cooperate/comply with and support their departments (Gau, 2014; Reisig et al., 2007; Tyler, 2006; Tankebe, 2013). The questions in the Seattle Public Safety survey build on scales developed by Sunshine and Tyler (2003) as well as other research (Gau, 2014 and Reisig et al., 2007, Tyler, 2006; and Tankebe, 2013). In addition, research shows that procedural justice presents an important indicator of levels of police legitimacy within a community and thus questions related to procedural justice were included in the survey (Gau, 2014; Reisig et al., 2007). Citizen's perception of procedural justice can be informed by sources that go beyond ones' personal experience, including experiences of friends/family, as well as the presentation of police actions in the media (Gau, 2014). The concept is operationalized by asking respondents to what extent they agree with certain statements when thinking about law enforcement and how they are treated. Finally, there questions were included related to trust and citizens' perceived obligation to obey law enforcement officers. While the concept of trust is defined as "people's beliefs that legal authorities are fair, are honest, and uphold people's rights" (Tyler & Huo, 2002, p. 78-79), perceived obligation to obey is defined as the extent to which people feel "they should comply with directives from police officers ... irrespective of their personal feelings" (Tyler, 2006, p. 45). In the effort to assess residents' trust and the obligation to obey, a series of questions that ask about how much respondents agree that SPD officers are honest and protect the rights of the citizens, as well as whether citizens should obey orders and accept decisions made by law enforcement. In the 2016 version of the survey, two additional questions were added in light of the national discourse around police-citizen engagement soliciting responses to a question regarding personal interactions with a Seattle police officer in the past year as well as a question asking about views of police at the local and national levels.

The questions in the Seattle Public Safety Survey build from scales developed by other research showing that procedural justice presents an important indicator of levels of police legitimacy within a community. The concept is operationalized by asking respondents to what extent they agree with certain statements when thinking about your law enforcement agency and how they are treated. Finally, there are also questions related to trust and citizens' perceived obligation to obey law enforcement officers. Questions in the Seattle Public Safety Survey that measure police legitimacy scale include:

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following when thinking about the Seattle Police Department and its officers?

_____ Seattle police officers protect people's basic rights in the neighborhood.

_____ Seattle police officers are honest.

_____ Seattle police officers do their jobs well.

_____ Seattle police officers can be trusted to do the right thing for my neighborhood.

_____ I am proud of Seattle police officers.

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following when thinking about the Seattle Police Department and its officers?

_____ I have confidence in Seattle police officers.

_____ When a Seattle police officer issues an order, you should do what they say, even if you disagree with it.

_____ You should accept Seattle police officers' decisions even if you think they're wrong.

_____ People should do what Seattle police officers say, even when they do not like the way the police treat them.

_____ Seattle police officers treat people with respect and dignity.

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following when thinking about the Seattle Police Department and its officers?

_____ Seattle police officers treat people fairly.

_____ Seattle police officers take time to listen to people.

_____ Seattle police officers respect citizen's rights.

_____ Seattle police officers treat everyone equally.

_____ Seattle police officers make decisions based on facts and law, not personal opinions.

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following when thinking about the Seattle Police Department and its officers?

_____ Seattle police officers explain their decisions to people.

_____ Seattle police officers make decisions to handle problems fairly.

_____ Seattle police officers listen to all of the citizens involved before deciding what to do.

_____ There is enough Seattle police officer presence in my neighborhood.

Collective Efficacy: Informal Social Control & Social Cohesion.

Collective efficacy has been defined as the connection between mutual trust and willingness to intervene for the common good. The concept is most often conceptualized as a combination of informal social control and social cohesion. Collective efficacy is “the linkage of mutual trust and the willingness to intervene for the common good that defines the neighborhood context of collective efficacy” (Sampson, Raudenbush, & Earls, 1997, p. 919). The concept is most often conceptualized as a combination of informal social control and social cohesion. Both scales, informal social control and social cohesion, are built on the work of Uchida, et al. (2014), which represents a modified version of a scale developed by Sampson, Raudenbush, & Earl (1997) and Sampson & Raudenbush (1999). To assess resident’s willingness to react to crime and deviancy, participants were asked to indicate how likely it is that one of their neighbors would do something about specific incidences, such as break-ins, parking infractions, suspicious people hanging around, loud arguments on the street, underage drinking, juvenile spray-painting graffiti, someone being beaten/threatened in front of their house, disrespectful behavior by juveniles, juveniles skipping school, loud music/noise on their block, gun shots fired, and drug selling. Social cohesion was assessed by asking participants to indicate to what extent they agree with specific statements about their community/neighborhood (e.g. “this neighborhood is a good area to raise children” or “people that live in my neighborhood are generally friendly”). Questions included in the survey designed to measure the construct of informal social control through citizen willingness to react to a range of crime and deviancy events include:

On a scale from 0 to 100, with 0 being very unlikely and 100 being very likely, how likely is it that someone in the neighborhood where you live and/or work would intervene if they would witness one of the following?

- Someone is trying to break into a house/business.
- Someone is illegally parking in the street.
- Suspicious people are hanging around the neighborhood.
- People are having a loud argument in the street.
- A group of underage kids is drinking alcohol.
- Some children are spray-painting graffiti on a local building.

On a scale from 0 to 100, with 0 being very unlikely and 100 being very likely, how likely is it that someone in the neighborhood where you live and/or work would intervene if they would witness one of the following?

- There is a fight in front of your house/work and someone is being beaten or threatened.
- A child is showing disrespect to an adult.
- A group of neighborhood children is skipping school and hanging out on a street corner.
- Someone on your block is playing loud music.
- Someone on your block is firing a gun.
- Drugs are being sold.

Social cohesion, the second component of collective efficacy, is assessed in the survey by asking participants to indicate to what extent they agree with specific statements about their community/ neighborhood:

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following about the neighborhood where you live and/or work?

- The neighborhood is a good area to raise children.
- People in the neighborhood are generally friendly.
- I am happy I live/work in the neighborhood.
- People in the neighborhood take care of each other.
- People in the neighborhood can be trusted.
- People in the neighborhood are willing to help each other.

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following about the neighborhood where you live and/or work?

- The neighborhood is close-knit.
- People in the neighborhood generally don't get along with each other.
- People in the neighborhood do not share the same values.
- I regularly stop and talk with people in the neighborhood.
- I know the names of people in the neighborhood.

On a scale from 0 to 100, with 0 being strongly disagree and 100 being strongly agree, to what extent do you agree with the following about the neighborhood where you live and/or work?

- I share responsibility for the quality of life and safety in the neighborhood
- In the last year, I have been active in helping to improve the quality of life and safety in the neighborhood.

Fear of Crime.

Fear of crime is central to the concept of public safety, due to the argument that fear of crime can have a negative impact not only on the individual but also on communities. Fear of crime can influence citizens' behaviors and movements, economics, and social life and can be seen as a "key quality of life" issue (Cordner 2010). It is also important to understand that the effects of fear of crime can outweigh the effects of actual crime on individuals and communities (Warr, 2000). The items utilized in the survey mirror the fear of crime scale developed by Gray, Jackson, & Farall (2008), which was built on the work of Farrall and Gadd (2004). In order to get a better understanding of resident's level of fear of crime participants are asked how worried they have been in the last year about specific crimes in their neighborhood.

In the 2015 Seattle Public Safety Survey, Fear of Crime was measured without separating in terms of fear of crime during the day and night. In the 2016 survey two identical questions were included with the distinction of fear of crime during the nighttime and daytime. Table 4 shows question items included to measure fear of crime:

On a scale from 0 to 100, with 0 being never and 100 being all the time, how often have you worried about the following in the neighborhood where you live and/or work during the daytime?

- Somebody breaking into your home/work and stealing or damaging things?
- Somebody stealing your vehicle, things from or off it, or damaging it?
- Somebody stealing from you in a public space?
- You or somebody you know being sexually assaulted?
- You or somebody you know being physically attacked?

On a scale from 0 to 100, with 0 being never and 100 being all the time, how often have you worried about the following in the neighborhood where you live and/or work during the nighttime?

- Somebody breaking into your home/work and stealing or damaging things?
- Somebody stealing your vehicle, things from or off it, or damaging it?
- Somebody stealing from you in a public space?
- You or somebody you know being sexually assaulted?
- You or somebody you know being physically attacked?

Social Disorganization.

To gain a better understanding about the social stability and order of the community the concept of social disorganization, which is argued to be capable in predicting crime, was included in the survey. The classical measures of social disorganization (e.g. residents' socioeconomic status and ethnic heterogeneity) can be assessed through demographic questions (Shaw & McKay, 1942; Sampson & Groves, 1989). These measures can be augmented with questions regarding the perceived level of social disorder and the perceived level of physical disorder, which are also included to assess to what degree certain signs of disorder are a matter of concern to your community (Weisburd et al., 2012; Steenbeek & Hipp, 2011). Questions included in the survey to measure social disorganization include:

On a scale from 0 to 100, with 0 being never and 100 being all the time, how often are the following a problem in the neighborhood where you live and/or work?

- Fights on the street/threatening behavior
- People loitering or being disorderly
- Public alcohol/drug consumption
- Public urination or defecation
- Panhandling
- Vandalism

On a scale from 0 to 100, with 0 being never and 100 being all the time, how often are the following a problem in the neighborhood where you live and/or work?

- Noise late at night/early in the morning
- Gambling in the street
- Drug sales
- Illegal sex work
- People being bothered on the street
- Buildings with broken windows

On a scale from 0 to 100, with 0 being never and 100 being all the time, how often are the following a problem in the neighborhood where you live and/or work?

- Buildings with graffiti
- Abandoned or boarded up buildings
- Areas with litter
- Dog feces on the street or sidewalk
- Street or sidewalks in need of repair

Perception and Knowledge of MCPP.

A question item was included to measure perception and knowledge of the SPD MCPP:

On a scale from 0 to 100, with 0 being very negative and 100 being very positive, what is your overall opinion of the Micro Community Policing Plan (MCPP) initiative?

On a scale from 0 to 100, with 0 being nothing and 100 being a lot, how much do you know about the Micro Community Policing Plan (MCPP) initiative?

Seattle - Citywide Survey Results

Seattle Citywide Survey Results Overview

Results are presented from 8524 completed survey responses from community members who indicated they live and/or work in the City of Seattle. Compared to Seattle demographics, survey respondents were disproportionately more likely to be non-minority and female. Quantitative responses were weighted based on gender and race/ethnicity to better represent the Seattle population. Of the total

2016 Seattle Public Safety Survey Results

8524 citywide responses, 3471 respondents offered narrative comments. Narrative comments were analyzed for themes and 39 distinct themes were identified.

Summary of Findings for East Precinct

The top public safety concerns for the East Precinct are car prowls, lack of police capacity/ presence, residential burglary, littering/ dumping and property crime. The most prominent themes citizens in the East Precinct commented on in their narrative responses were homelessness is a public safety and public health issue, lack of police capacity/ presence, public order crime, property crime and city coordination are decreasing public safety. At the micro-community level, top public safety concerns, prominent themes, and perceptions of public safety differ from the precinct as a whole in some micro-communities (e.g. squatting and drug use in public in Miller Park, homeless encampments (non-regulated in the International District, civility issues in First Hill and shots fired in the Central Area/Squire Park). The results on the scales measuring community perceptions of public safety suggest that the East Precinct as a whole shows relatively high police legitimacy and social cohesion, average social control, low fear of crime in the day, average fear of crime in the night and low social disorganization, positive perception though low knowledge of the SPD MCPP. At the micro-community level, results on the scales are different depending on the micro-community with some very similar to the East Precinct as a whole (e.g., North Capitol Hill) while others different (e.g. International District) reflecting heterogeneous micro-communities on measures of community perception.

North Precinct Survey Results Overview

Results for the North Precinct as a whole and the 12 North Precinct Micro-communities: Ballard-North, Ballard-South, Bitter Lake, Fremont, Greenwood, Lake City, Northgate, Phinney Ridge, Roosevelt/Ravenna/Green Lake/Wedgwood, Sandpoint, University District, and Wallingford are presented from 2016- N=3609 completed survey responses from community members who indicated they live and/or work in the City of Seattle North Precinct. Of the total 2016- N=3609 North Precinct responses, 2016- N=1448 respondents offered narrative comments.

Summary of Findings for South Precinct

The top public safety concerns for the South Precinct are lack of police capacity/ presence, car prowling, residential burglary, littering/ dumping and auto theft. The most prominent themes citizens in the South Precinct commented on in their narrative responses were lack of police capacity/ presence, property crime, homelessness is a public safety and public health issue, public order crime and concerns about selective enforcement/ racial bias. At the micro-community level, top public safety concerns, prominent themes, and perceptions of public safety differ from the precinct as a whole in some micro-communities (e.g. gun violence in Rainier Beach, shots fired in New Holly and graffiti in Georgetown). The results on scales measuring community perceptions of public safety suggest that the South Precinct as a whole shows relatively high police legitimacy and social cohesion, average social control and fear of crime day and night, low social disorganization, and average perception and low knowledge of the SPD MCPP. At the micro-community level, results on the scales are different depending on the micro-community with some very similar to the South Precinct as a whole (e.g., Columbia City) while others very different (e.g. Claremont/ Rainier Vista) reflecting heterogeneous micro-communities on measures of community perception of public safety within the precinct.

Southwest Precinct Survey Results Overview

Results are presented from 1433 completed survey responses from community members who indicated they live or work in the City of Seattle Southwest Precinct. Compared to Seattle demographics, survey respondents were disproportionately more likely to be non-minority and female. Quantitative responses were weighted based on gender and race/ethnicity to better represent the Seattle population. Of the total 1433 Southwest Precinct responses, 549 respondents offered narrative comments.

Summary of Findings for Southwest Precinct

The top public safety concerns for the Southwest Precinct are car prowls, lack of police capacity/ presence, residential burglary, property crime and littering/ dumping. The most prominent themes citizens in the Southwest Precinct commented on in their narrative responses were lack of police capacity/ presence, public order crime, homelessness is a public safety concern and public health issue, traffic/ bike/ pedestrian/ transit and property crime. At the micro-community level, top public safety concerns, prominent themes, and perceptions of public safety are similar to the precinct as a whole in some micro-communities but differ in others (e.g. shots fired and drug houses in South Park, shots fired in North Delridge, unsafe driving/speeding in High Point). The results on the scales measuring community perceptions of public safety suggest that the Southwest Precinct as a whole shows relatively high police legitimacy, above average levels of social cohesion and informal social control, average fear of crime day and night, low social disorganization, and positive perception with average knowledge of the SPD MCPP. At the micro-community level, results on the scales are different depending on the micro-community with some very similar to the Southwest Precinct as a whole (e.g.

North Delridge) while others different (e.g. South Park) reflecting heterogeneous micro-communities on measures of community perception of public safety within the precinct.

West Precinct Survey Results Overview

Results for the West Precinct as a whole and the 8 West Precinct Micro-communities: Belltown, Downtown Commercial, Eastlake-West, International District-West, Magnolia, Pioneer Square, Queen Anne, and South Lake Union/Cascade are presented from 2015- N=1245 and 2016- N=1222 completed survey responses from community members who indicated they live or work in the City of Seattle West Precinct. Of the total 2015- N=1245 and 2016-N=1222 West Precinct responses, 2015- N=619 and 2016- N=491 respondents offered narrative comments.

Summary of Findings for West Precinct

The top public safety concerns for the West Precinct are lack of police capacity/ presence, car prowling, homeless encampments (non-regulated), property crime and littering/ dumping. The most prominent themes citizens in the West Precinct commented on in their narrative responses are homelessness is a public safety and public health issue, lack of police capacity/ presence, public order crime, city coordination are decreasing public safety and property crime. At the micro-community level, top public safety concerns, prominent themes, and perceptions of public safety differ from the precinct as a whole in some micro-communities (e.g. car/ RV camping in Magnolia, civility issues in International District, aggressive panhandling in Belltown and public intoxication in Pioneer Square). The results on the scales measuring community perceptions of public safety suggest that the West Precinct shows relatively high police legitimacy, average social cohesion, average social control, low fear of crime day, average fear of crime night, low social disorganization, and positive perception with average knowledge of the SPD MCPP. At the micro-community level, results differ depending on the micro-community with some similar to the Precinct as a whole (e.g. Queen Anne) while others differ (e.g. Pioneer Square and Downtown Commercial) reflecting heterogeneous micro-communities on measures of community perception of public safety.

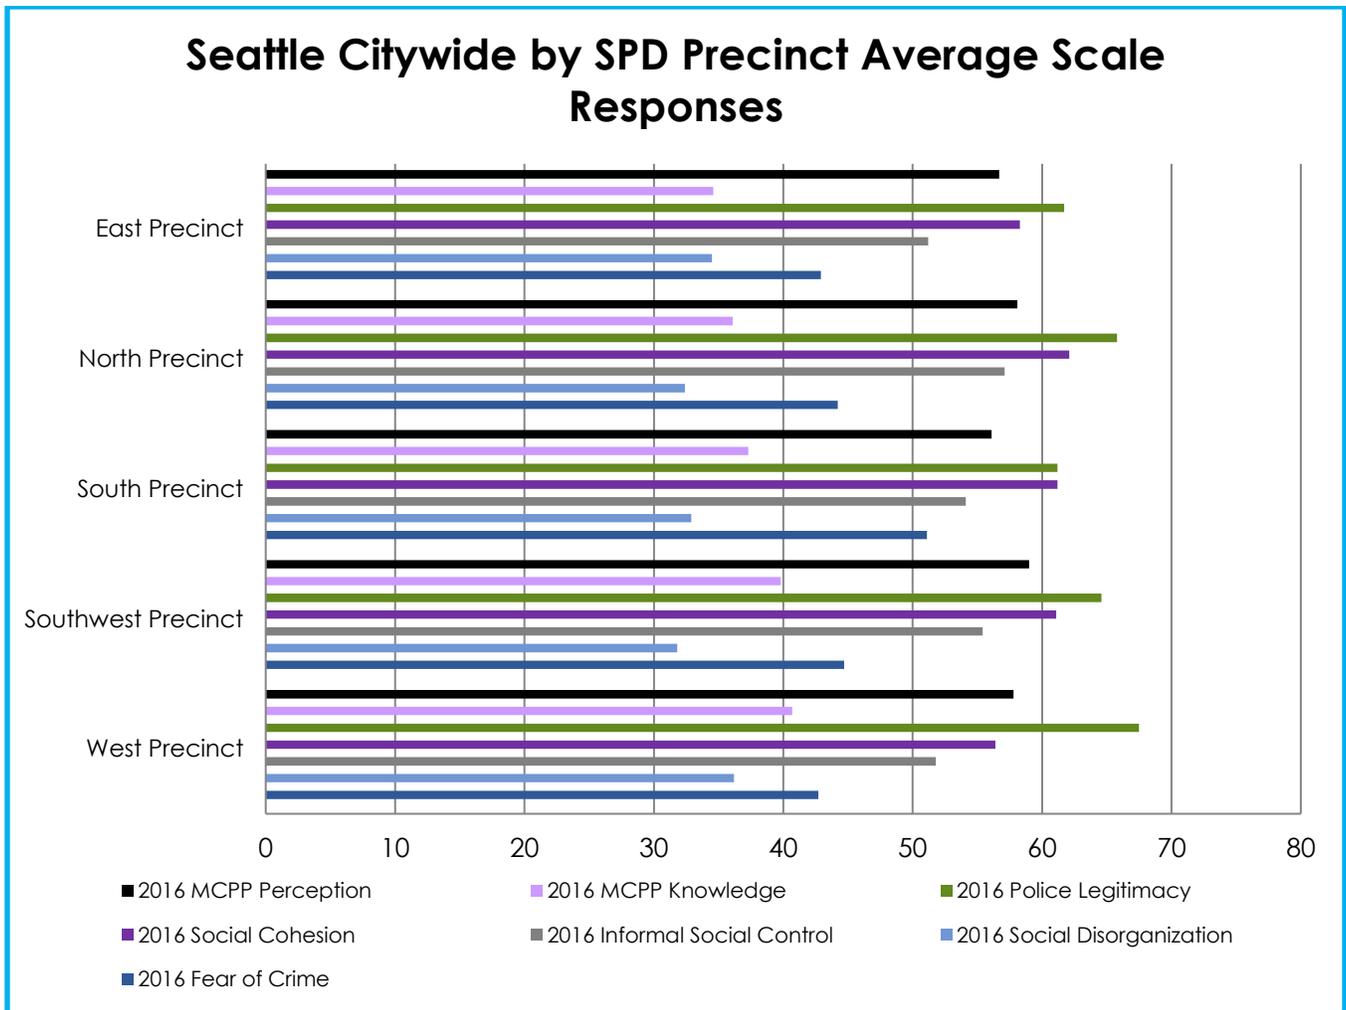

West Precinct by Micro-Community Average Scale Responses

Summary of Findings Citywide

The top public safety concerns citywide are lack of police capacity/presence, car prowling, residential burglary, property crime and auto theft. The most prominent themes citizens in the city of Seattle commented on in their narrative responses are lack of police capacity/ presence, homelessness is a public safety and public health issue, public order crime, property crime and city coordination are decreasing public safety. Taken as a whole, the results offer a picture of the public safety concerns of citizens of Seattle at the city, precinct, and micro-community levels. At the precinct and micro-community levels, top public safety concerns, prominent themes, and perceptions of public safety differ from the citywide results by precinct and micro-community. The results on the scales measuring community perceptions of public safety suggest that the city of Seattle shows relatively high police legitimacy, average levels of fear of crime day and night, above average social control, above average social cohesion, low social disorganization, somewhat positive perception with relatively high knowledge of the SPD MCPP. At the micro-community level, results on the scales differ by precinct and micro-community reflecting heterogeneous micro-communities on measures of community perception of public safety within the precinct.

Implications for Seattle Micro-Community Policing Plans

The quantitative survey findings of the top public safety concerns, prominent themes identified in the narrative comments, and community perceptions regarding issues related to public safety offer comprehensive information based on survey findings from 8524 respondents who live and/or work in Seattle. The information can be used to inform and guide the SPD MCPP priorities to ensure that citizen concerns are taken into account in the development and evolution of the Seattle Police Department's MCPPs for the city of Seattle, SPD Precinct, and Precinct micro-communities.

The survey findings can be used to assist SPD, community leaders, and residents to better understand the distinct concerns and perceptions of public safety of citizens within micro-communities and the nature of the community and distinct neighborhoods. Concerns of citizens within any given community differ with respect to concerns about crime and public safety and perceptions of public safety as measured by the survey scales in terms of concerns about crime and public safety and perceptions of public safety with respect to police legitimacy, social cohesion, informal social control, and fear of crime. The survey findings at the community and micro-community levels can be used to inform and guide law the Seattle Police Department in developing SPD MCPP priorities at the community and micro-community levels and to guide strategies in response to distinct community concerns.

The top public safety concerns coupled with the most prominent themes for the precinct and for each micro-community inform the SPD MCPP priorities to reflect the timely concerns of citizens. Survey findings can assist SPD at the city, precinct, and micro-community levels to target areas of for improvement with respect to scale items that reflect citizen perceptions of community public safety areas that stray from the ideal and negatively impact public safety. The community perceptions regarding public safety as measured through the survey instrument provides a snapshot of the nature of the community as a whole and within SPD Precincts and individual micro-communities within SPD Precincts regarding citizen concerns about public safety and views on police legitimacy, social disorganization, informal social control, social cohesion, fear of crime as well as perceptions and knowledge of MCPP. Ideally, a healthy community with positive police-citizen relations will have high police legitimacy, low social disorganization, high informal social control and social cohesion, low fear of crime, and positive perception and high knowledge of the SPD MCPP. Thus, survey findings can assist SPD, the city of Seattle, and micro-communities to target areas of improvement with respect to scale items that reflect citizen perceptions of community public safety areas that stray from the ideal and negatively impact public safety.
