NW MARKET ST PAVING PROJECT

Overview

NW Market St is an east-west arterial and considered a major truck street in Seattle's freight network. This 4-lane street is a critical piece of Seattle's arterial network and is in need of repair. We'll do a full concrete reconstruction, to support continued growth in the area, including transit routes and freight.

This work contributes to our levy goal to pave up to 180 lane-miles of arterial streets by 2024.

Project Scope

- Full concrete reconstruction of NW Market St between 24th Ave NW and 15th Ave NW
- Curb ramp upgrades and replacements
- Sidewalk repair
- Tree pit expansion
- Water main upgrades
- Stormwater drainage improvements

Schedule

Summer – fall, 2019 - public outreach

Late fall - finalize design

Summer 2020 - begin construction

We will host meetings and open houses in the coming months. For more information and to sign up for project emails, visit:
