

36 – Summary of Source Control Program Actions

Summary of Actions (S5.C7.b.iii):

The City implements a Source Control program (S5.C.7) to reduce pollutants in runoff from areas of existing development that discharge to the MS4. This includes an inspection program for businesses and/or properties identified based on the presence of activities that are pollutant generating. Below is a summary of the City's actions taken in 2017 to implement these source control requirements.

(S5.C.7.b.iii)

- (1) The City distributes site specific materials and provides technical assistance during inspections. The Seattle Green Business and the recently launched regional Envirostars program also provides stormwater best management practice information during site visits and through their hotline and website. Information of a general nature is provided on social media via Twitter and Facebook and on the City's webpage. (S5.C.7.b.iii.(1))
- (2) In 2017, the City of Seattle conducted 705 source control inspections on properties draining to the MS4 in Seattle. These inspections include initial site inspections, follow up visits and audit inspections. This represents 21% of the targeted inventory. Sites are prioritized for inspection based on risk level, which determines inspection frequency (high = 2 yrs, medium = 4 yrs, low = 6 yrs). Risk level is determined by outdoor activity, business type, etc. (S5.C.7.b.iii.(2))
- (3) All businesses identified through the complaint program received business inspections (100%). (S5.C.7.b.iii.(3))

Summary of Actions (S5.C7.b.iv.):

The City implements a progressive policy to require sites to come into compliance with stormwater requirements within a reasonable time period. The progressive enforcement policy includes a corrective action letter, a second and final letter, and a notice of violation. The violator can also enter into a voluntary compliance agreement. If and when the violation cannot be resolved, the violation may be referred to Ecology for enforcement. Below is a summary of actions taken in the enforcement progression in 2017 for the Business Inspection Program, the Stormwater Facility Program, the Complaints/Spill Response Program, and the Illicit Discharge Detection and Elimination (IDDE) Program. Records are maintained electronically and by hard copy. Program records are kept in three custom databases.

1,2,4) Follow Up and Enforcement by Program Type

Program Type	Corrective Action Letter	Second and Final	Notice of Violation	Voluntary Compliance Agreement	Ecology Referral
Business Inspection Program	268	No Longer Used	13	1	0
Stormwater Facility Program	169	7	0	0	0
Water Quality Complaints	4	0	15	1	0
Spill Response	0	0	6	0	0
IDDE	0	0	8	0	0

4) Records are maintained electronically and by hard copy. Program records are kept in 3 custom databases.
