

Choosing a Certified Irrigation Contractor

Below is a list of landscape and irrigation contractors who are licensed contractors in the State of Washington and certified by the Irrigation Association (IA), or the Washington Association of Landscape Professionals (WALP). See the following pages for details on these certifications.

For a list of certified Backflow Assembly Testers (BAT), visit:

http://www.instruction.greenriver.edu/wacertservices/bat/bat_publiclist.asp

To determine whether a contractor is licensed with Washington State, go to <https://fortress.wa.gov/lni/bbip> or call 1-800-647-0982.

The Certified Professional Advantage

The Saving Water Partnership recommends that you choose a landscape contractor who is certified as an irrigation specialist by a professional organization. A certified specialist is your best resource for quality system maintenance, repair and backflow services.

Below is a brief description of each certification:

Irrigation Association (IA) www.irrigation.org

Certified Irrigation Contractor (CIC) <http://www.irrigation.org/cic/>

Manages contracts and subcontracts to install, repair, and maintain irrigation systems in such a manner that projects can be executed in an acceptable way, meeting all specifications and requirements, including irrigation layout, installation, maintenance and repair of systems.

Certified Irrigation Designer (CID) <http://www.irrigation.org/certification/CID/CID.aspx>

Evaluates site conditions and determines net irrigation requirements based on the needs of the project, including selection of the most effective irrigation equipment and design methods. The objective of a CID is to establish specifications and design drawings for the construction of an irrigation project.

Certified Landscape Irrigation Auditor (CLIA) <http://www.irrigation.org/certification/CLIA/CLIA.aspx>

Collects landscape data, makes irrigation maintenance recommendations, performs irrigation system audits, and develops base irrigation schedules.

Washington Association of Landscape Professionals (WALP) www.walp.org

Certified Landscape Technician (CLT-Ir) <http://www.walp.org/landscape-industry-certified>

Understands basic landscape maintenance practices, and demonstrates irrigation system and water management skills.

***Note:** The City of Seattle, the Saving Water Partnership and participating water utilities do not regulate or endorse irrigation products or companies. The landscape contractors listed below are certified by their respective professional organizations, not the Saving Water Partnership. The list is provided as a service to customers. It is not a complete list of all landscape or irrigation contractors in the Saving Water Partnership service area and it does not constitute a recommendation. **The list was updated and published on October 5, 2016** and may not be current as you view it. For more information about the contractor list, please contact Jenna Smith at (206) 684-5955 or jenna.smith@seattle.gov.*
