Connections**MARCH 2025****Hydropower Is Seattle's Energy Foundation**

Discover the backbone of the Seattle area's electricity: hydropower. For over a century, this renewable power source has been pivotal in driving Seattle's vibrancy and sustainability. At Seattle City Light, our power mix is 88% hydropower. This reliable power source ensures electricity for homes, businesses, and schools. But what role does hydropower play in our area's energy future? As we move forward with electrification, the flexibility and resiliency of hydropower becomes even more significant. Keep reading to see how hydropower contributes to a brighter, more sustainable future.

City Light has been recognized as a Tree Line USA utility for the 12th year in a row. This recognition honors utilities that care for trees while ensuring reliable power. To earn this award, we follow best practices for managing trees near power lines. This includes providing annual training for our staff and contractors and educating customers on proper tree care. We also run programs to conserve energy and plant trees, and we support Arbor Day celebrations across the city.
