

# Seattle City Light is Electrifying

## Fact Sheet | Public Transit

### Transportation Electrification

The future of transportation for Seattle City Light's customers is electric—and the transition is happening now. By **2050**, everything that moves people, goods, and services in and around the city will be electrified.

#### Which parts of public transit will be electrified?

Buses

Ferries & Water Taxis

Commuter Trains & Light Rail

#### I take public transit. Will my daily commute be affected?

**Routes:** Priority populations will have access to more services that meet their needs

**Commuter Experience:** Quieter rides, cleaner air, more reliable service

**Fares:** Efforts will be made to ensure each user pays the right fare - including income-based fare options

**Charging Stations:** Conveniently located near transit

### You have the power!

Do you use public transit?

Seattle City Light

## How are you ensuring no people, communities, or neighborhoods are left behind?

**Planning:** We received input from 25 environmental justice community leaders and over 40 stakeholder groups.

**Partnerships:** We are co-creating solutions with an emphasis on community empowerment.

**Training:** We are committed to focusing career development and recruitment on historically under-resourced communities.
