		Internal Notices/Signs	Pass

I hereby certify that I am an independent contractor not otherwise affiliated with or employed by the City of Seattle.

I hereby certify that I am responsible for the inspection of this vehicle and for the accurate completion of this Vehicle Inspection Safety Report.

THE VEHICLE NAMED ABOVE HAS BEEN TESTED AND THE RESULTS HAVE BEEN CERTIFIED TO HAVE PASSED.

Approving Mechanic (Print) Mechanic, Test **Date** 5/5/2026

"Approved mechanic" means a mechanic or technician on a list maintained by the Director. The list shall contain the name of each mechanic or technician that has been approved by the Director for inclusion and who (1) has met all requirements of the National Institute for Automotive Service Excellence, (2) has been awarded a Certificate in Evidence of Competence satisfactory to the Director, and (3) does not own, lease or drive a taxicab or for-hire vehicle or TNC endorsed vehicle. The approved mechanic is responsible for checking that the taxicab license plates, decals, customer notices, and other markings, as required by the City are legible and properly displayed as specified in Rule FOR-HIRE-TRANSPORTATION-02-2024 and Rule FOR-HIRE-TRANSPORTATION-03-2024.

Vehicle Type	External Markings	Interior Notices/Signs
Taxicab **Note: the for-hire vehicle medallion and vehicle type sunset on March 31, 2026. After this date, these vehicles will operate with a taxicab medallion, though they may still have "flat-rate" marked on their exteriors and use flat rates to price trips.**	**Uniform Color Scheme:** See most recent list from the Director, which is provided to the approved mechanic during training.	**Rates sign:** Must include the statement: "Rates or fares may vary. Confirm the fare or rate before you accept the ride." Must have a transparent background, be in dark 3/4-inch lettering, and be affixed to the driver's-side rear window.
	Trade Name/Telephone Number: On the upper one half (1/2) of both front doors. Trade name lettering must be at least 4 inches and telephone number lettering must be at least 2 and 1/2 inches.	**Passenger Information Decal:** Must include the regional dispatch agency trade name, medallion number, passenger complaint hotline, and requirement to provide customer with a receipt printed by the system or an electronic receipt. Must have a transparent background, 1/2-inch black lettering, and be affixed to the rear driver-side window beneath the rates decal.
	Medallion Number: Number must be at least 4-inch lettering on all 4 sides of the vehicle: hood, trunk lid, and both rear roof posts.	**Passenger Information in Raised and Braille Lettering:** Must include the regional dispatch agency trade name, medallion number, and passenger complaint hotline. Raised lettering must be at least 1/32 inch and a height of 5/8 inch and must be affixed on the inside of all passenger doors above the arm rest. Braille dots must be uniform in size, solid and rounded, with a height of at least 1/40-inch (0.025 inch) and a diameter of at least 3/50-inch (0.06 inch). The interdot spacing center-to-center will be at least 1/10-inch (0.1 inch). The horizontal distance between cells will be at least 3/10-inch (0.3 inch).
	Rates: On the upper half of both rear doors in 3/4-inch lettering. Must include the statement: "Rates or fares may vary. Confirm the fare or rate before you accept the ride."	
	Medallion Decal: Must be affixed at the rear end of vehicle.	
TNC Endorsed Vehicle	**Trade Dress:** See most recent list published by the Director.	
	Endorsement Decal: Fixed to inside surface of windshield in the center above rear view mirror. Endorsement decal is not required for initial licenses.	

Vehicle safety inspections done by an approved mechanic shall include thorough inspection of the following Seattle Municipal Code (Rule FOR-HIRE-TRANSPORTATION-02-2024 and Rule FOR-HIRE-TRANSPORTATION-03-2024):

Display Name	Criteria For Passing
Foot Pedals	Must have rubber or comparable material foot pads in good condition (no metal showing).
Brake system	Must operate properly and have no defects. Emergency brake capable of holding vehicle on a 30-degree incline in neutral.
Tires including emergency equipment	Wheels (including spare) must be properly aligned, inflated, free of defects, and have a minimum tread depth of 2/32 inch. There must be a tire jack, jack handle, and lug wrench or comparable equipment to ensure vehicle can operate immediately after occurrence of a flat tire.
Windshield and wipers	Windshield and wipers No chips or cracks larger than one inch. Wipers must operate properly and dispense washer fluid.
Rear window and other glass	No chips or cracks larger than one inch and must open and close properly.
Heating and cooling	Must operate properly and have no defects.

Not for Official Use Sample

Exterior lights	Covered with undamaged lenses and all bulbs operating properly including headlights, high beams, taillights, turn indicators, hazard lights, brake lights, high center brake light, back-up lights and license plate light.
