

Obtaining a Fuel Gas Piping Annual Inspection for Compliance with IFC 319.10.3 v06172026

Guidance to Food Truck Operators

-Request a timed pressure drop test/manometer test. Upon passing inspection, agency shall affix a tag on the fuel gas system indicating name of inspection agency and date; if no tag is available, a written test report shall be maintained in the food truck. Providers should have a qualification such as RVIA, RVDA, NVRTA, LPG service technicians, gas fitters, certified fuel gas installers, or a company registered w/USDOT or other qualification approved by the local fire marshal.

* This is a non-vetted list of companies that provide fuel gas piping inspections. WSAFM members have spoken to each of these companies and were advised that the company is interested and able to perform fuel gas piping inspection, also referred to as a timed pressure drop test or manometer test. Food Truck operators are recommended to call around **for quotes and are welcome to locate other providers.**

* If you provide annual fuel gas piping inspections for food trucks and would like to be added to the non-vetted list, please contact us at wsafm@wsafm.com. Please also indicate which national certification your company/technicians hold related to working on trucks and servicing LPG.
