# General information

*The art piece will be installed on a concrete retaining wall divided into 42 “panels” with steel beams.*

The retaining wall is approximately 192 feet in length and varies between 6 feet to 9 feet in height.

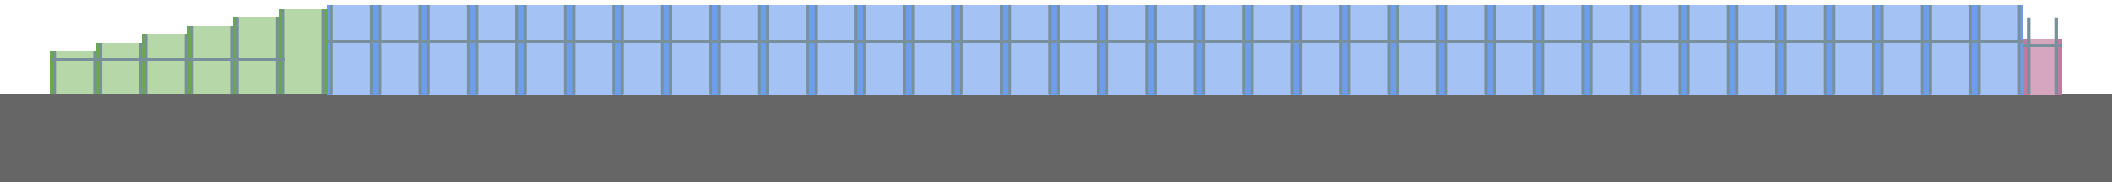
# Process

- CID Friends of I-5 identified project
- Friends of I-5 developed Request for Qualifications and selected Rafa Diaz and Shogo Ota
- The design of the mural came evolved from five community meetings between various community stakeholders
- Presentation to IDSRB
- Installation

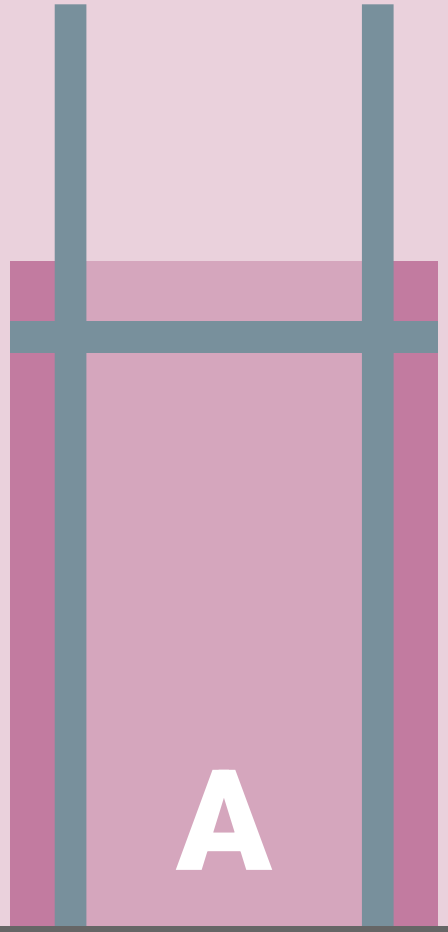
# Wall analysis (from right to left)

- ★ 42 concrete panels. From right to left:
  - First panel is narrower and significantly shorter (see Shape A and **purple section** below)
  - Following 35 panels are about the same size (see Shape B and **blue section** below)
  - Last 6 panels decrease in size (see Shape C and **purple section** below)
- ★ Surface and dimensions are irregular
  - Each panel has 1 horizontal and 2 vertical steel beams
  - Some panels are damaged (e.g. 1st panel)
  - Some panels have cavities (e.g. 9th panel)
  - Some panels have moss and other vegetation (e.g. 33th panel)



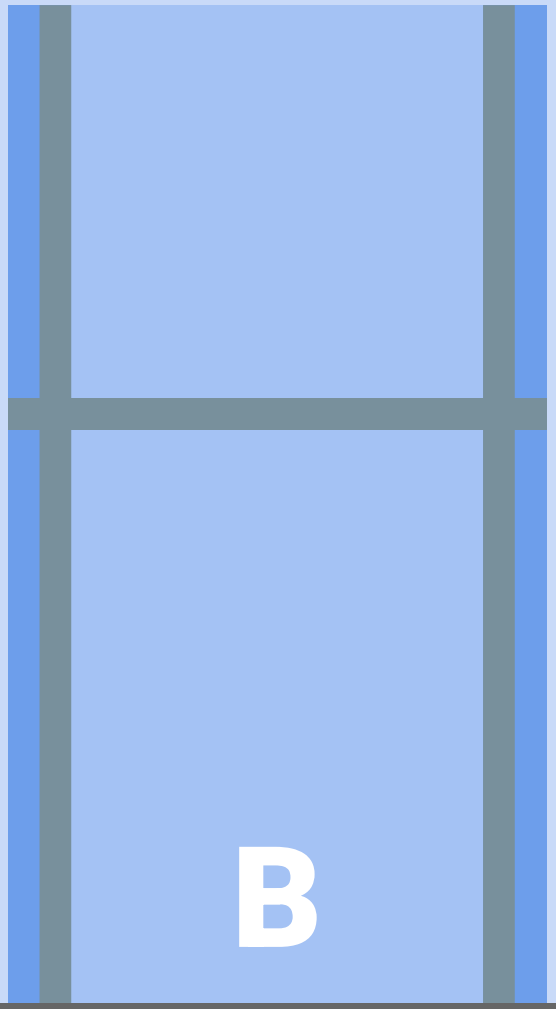
## Shape A

- ★ Height: 70in
- ★ Width: 45in
- ★ Middle section width: 29in



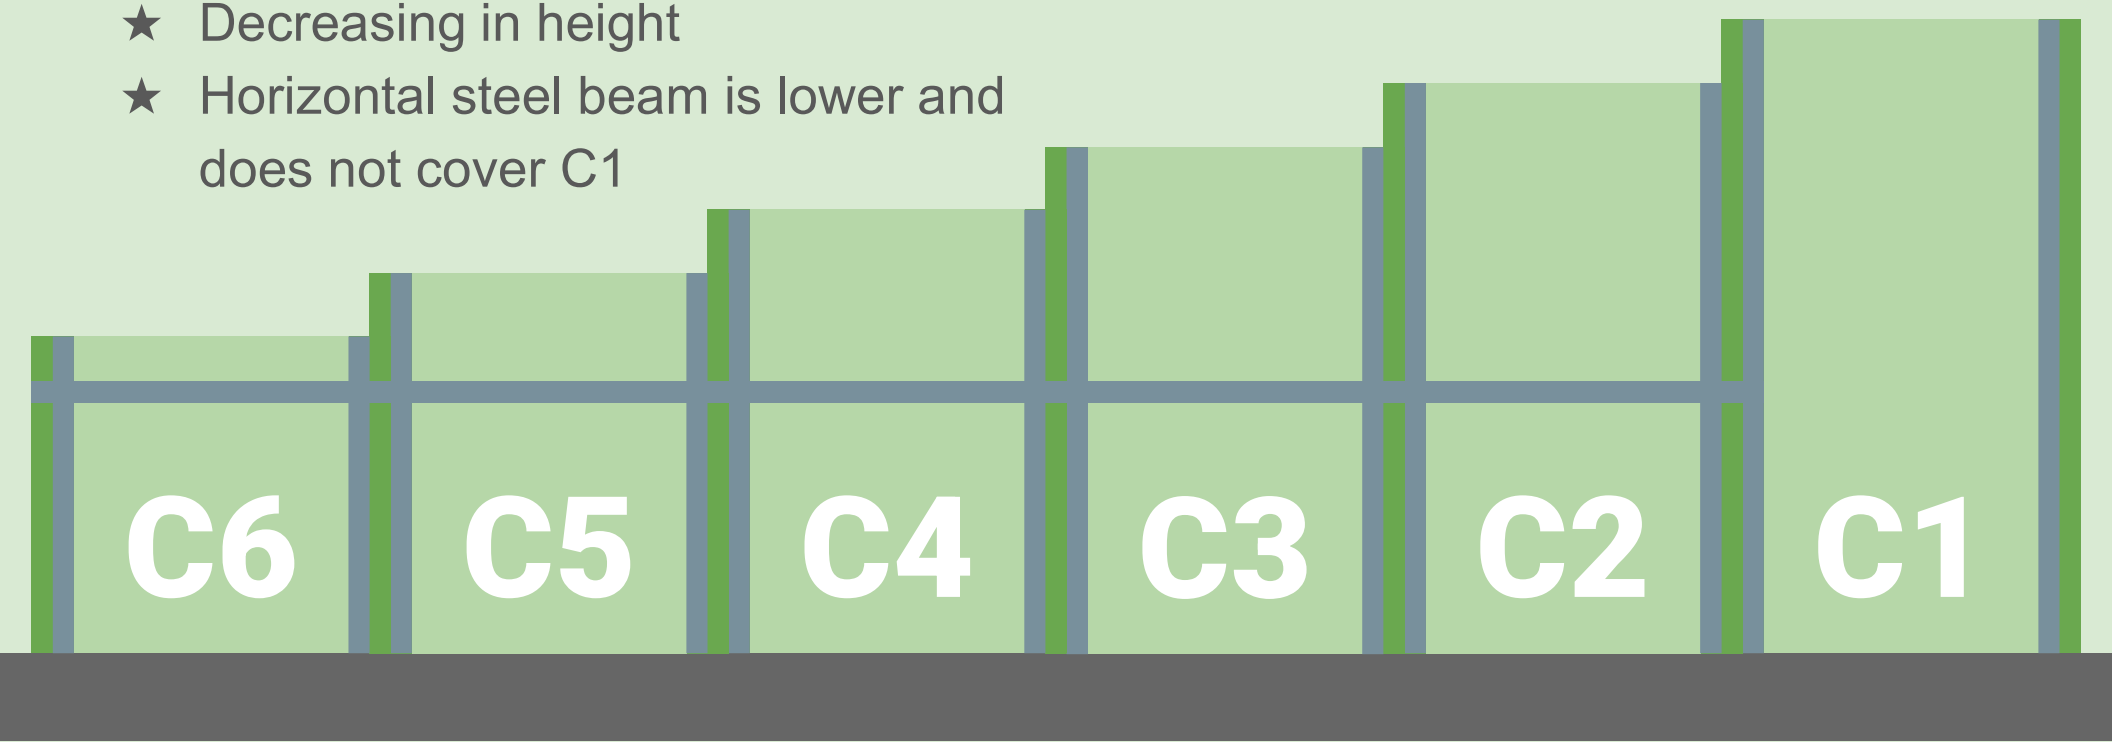
# Shape B

- ★ Height: 102-107in
  - 1st panel: 102in, 5th panel: 104in, 14th panel: 107in, 33th panel: 107in
  - Accumulated dirt could have impacted the measurements as it was hard to get to the bottom part of the panel
- ★ Width: 56-57in
  - 1st panel: 56in, 2nd panel: 57th, 4th: 56.5in, 5th: 56.5in, 6th panel: 56.5, 14th: 56in
- ★ Middle section width: 43-44in

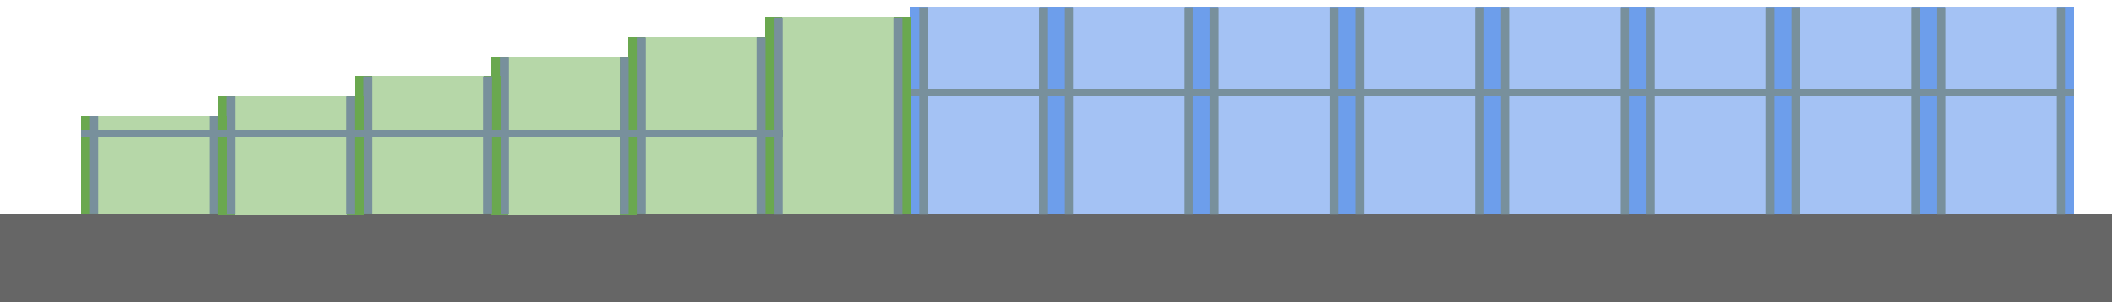


## Shape C

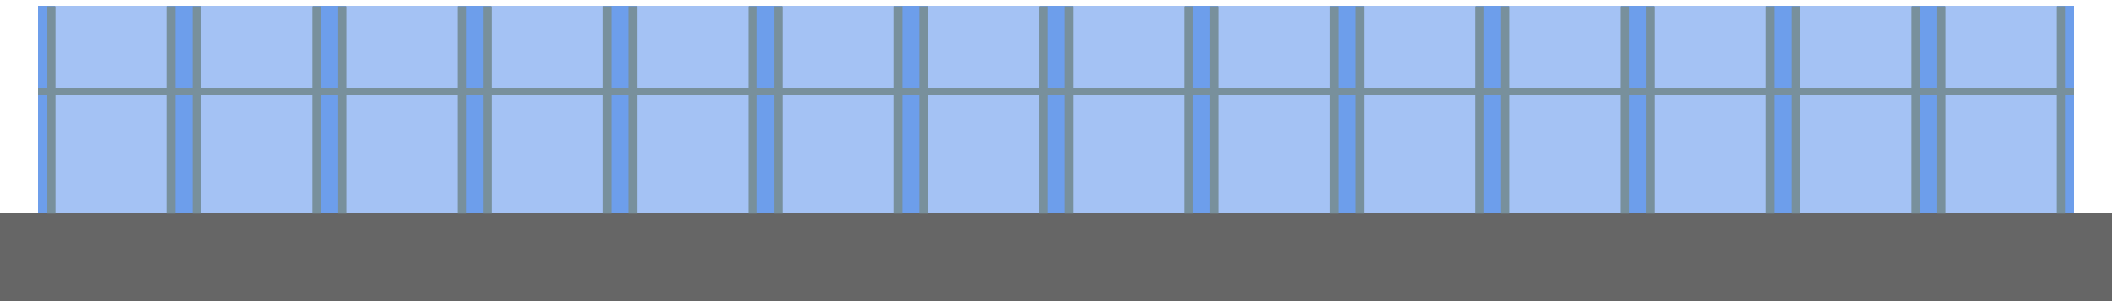
- ★ Could not take measurements
- ★ Might be narrower than Shape B
- ★ Decreasing in height
- ★ Horizontal steel beam is lower and does not cover C1



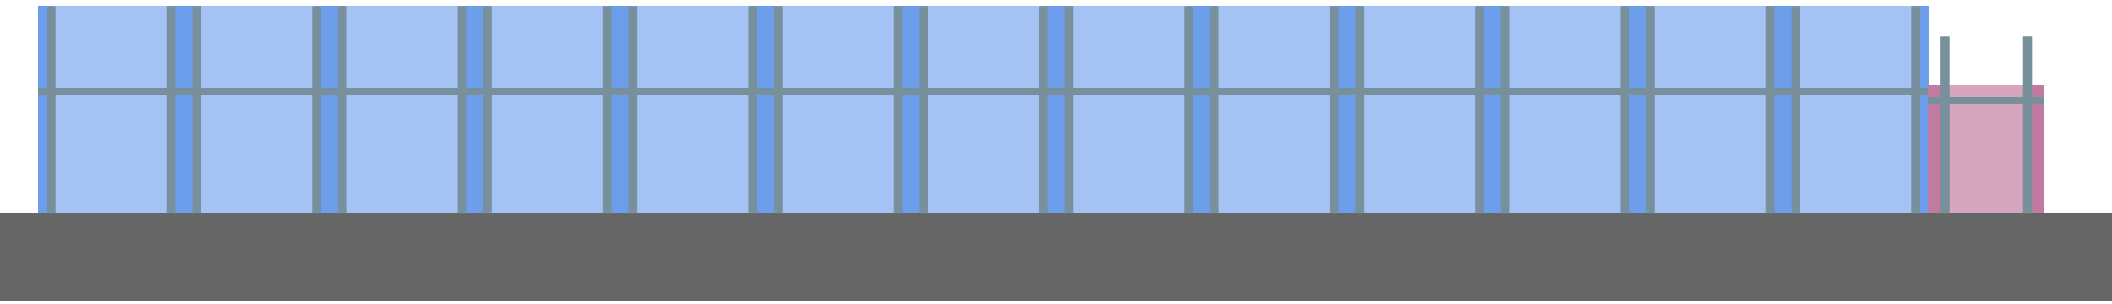
# Wall (42nd to 29th panels)



# Wall (28th to 15th panel)



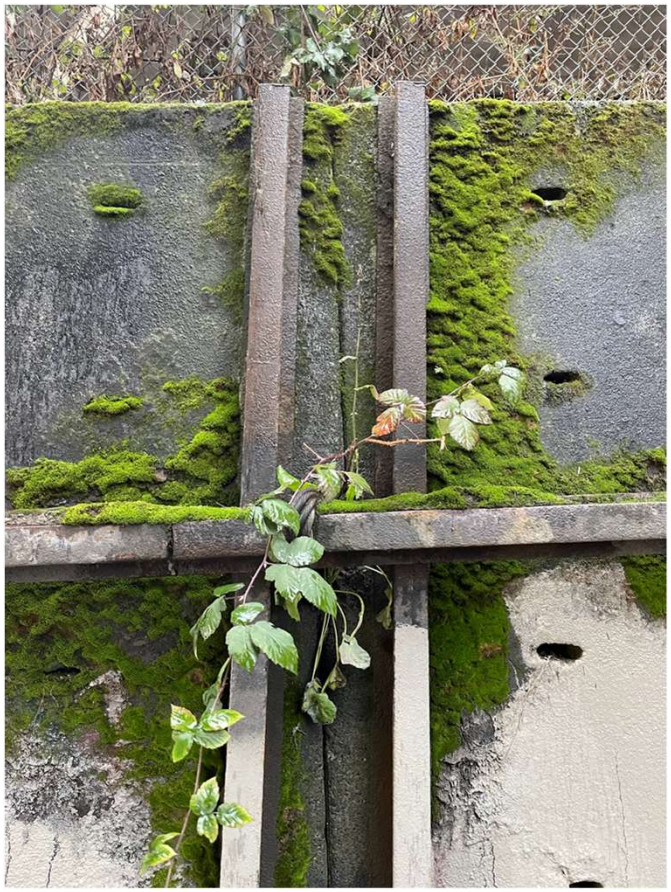
# Wall (14th to 1st panel)



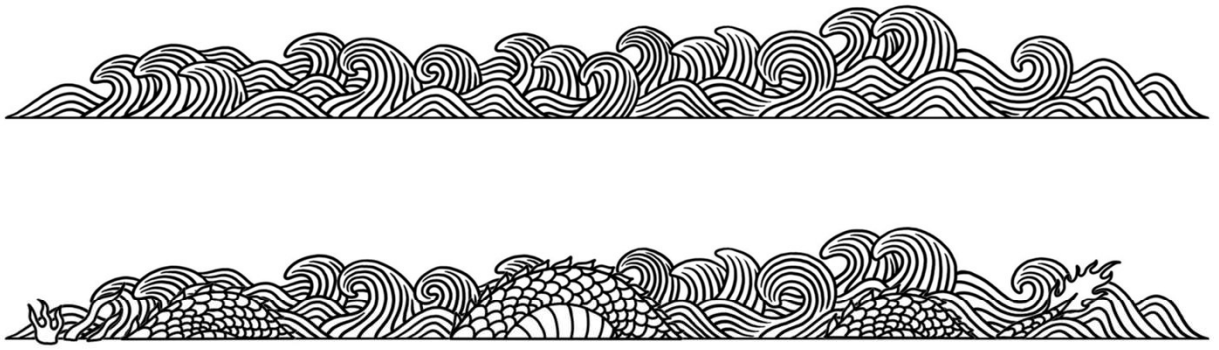
# 1st panel (most right one)

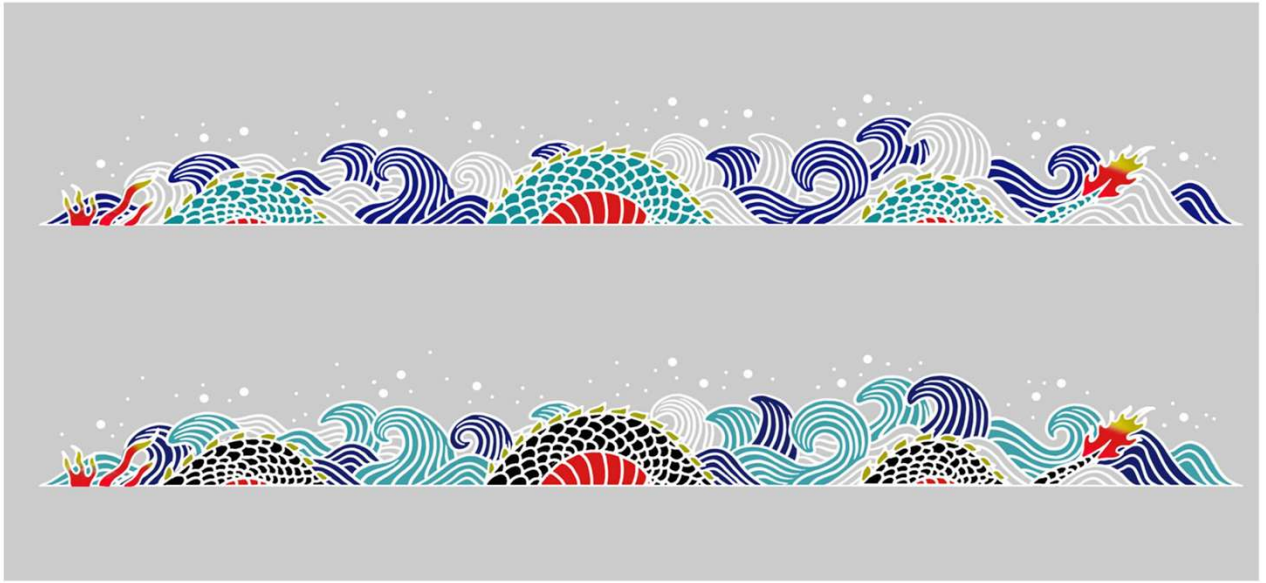
# Panels 39th to 42nd

# Vegetation and moss



Various stages
of mural project.





# Final Design

# Mural on the Retaining Wall
