

Site Map for Guest Vendor Area—0093 Pike Street

Plan it to restore the green light bar to match the original that is still in place west of 93 Pike

The bar will be steel construction and will utilize historic fixtures

Existing light bar in green. New extension shown in red.

Picture of space as it currently exists. Old lighting superstructure from Read all About it will be removed and green light bar will be restored. Green light bar currently extends from Simply the Best to the east edge of Ed Newbold.

Market Green (see paint swatch above) used for both light bard and light

Photo of green lightbar over existing Market business

Historic green light bar still exists west of the 93 Pike space. Plan would be to restore the green lightbar to match using steel construction and utilizing the same lighting fixture (we have replacements on hand that were saved from other parts of the Market). The bar would be painted Market Green to match and the proposed lighting features will be the same dimensions as existing features.

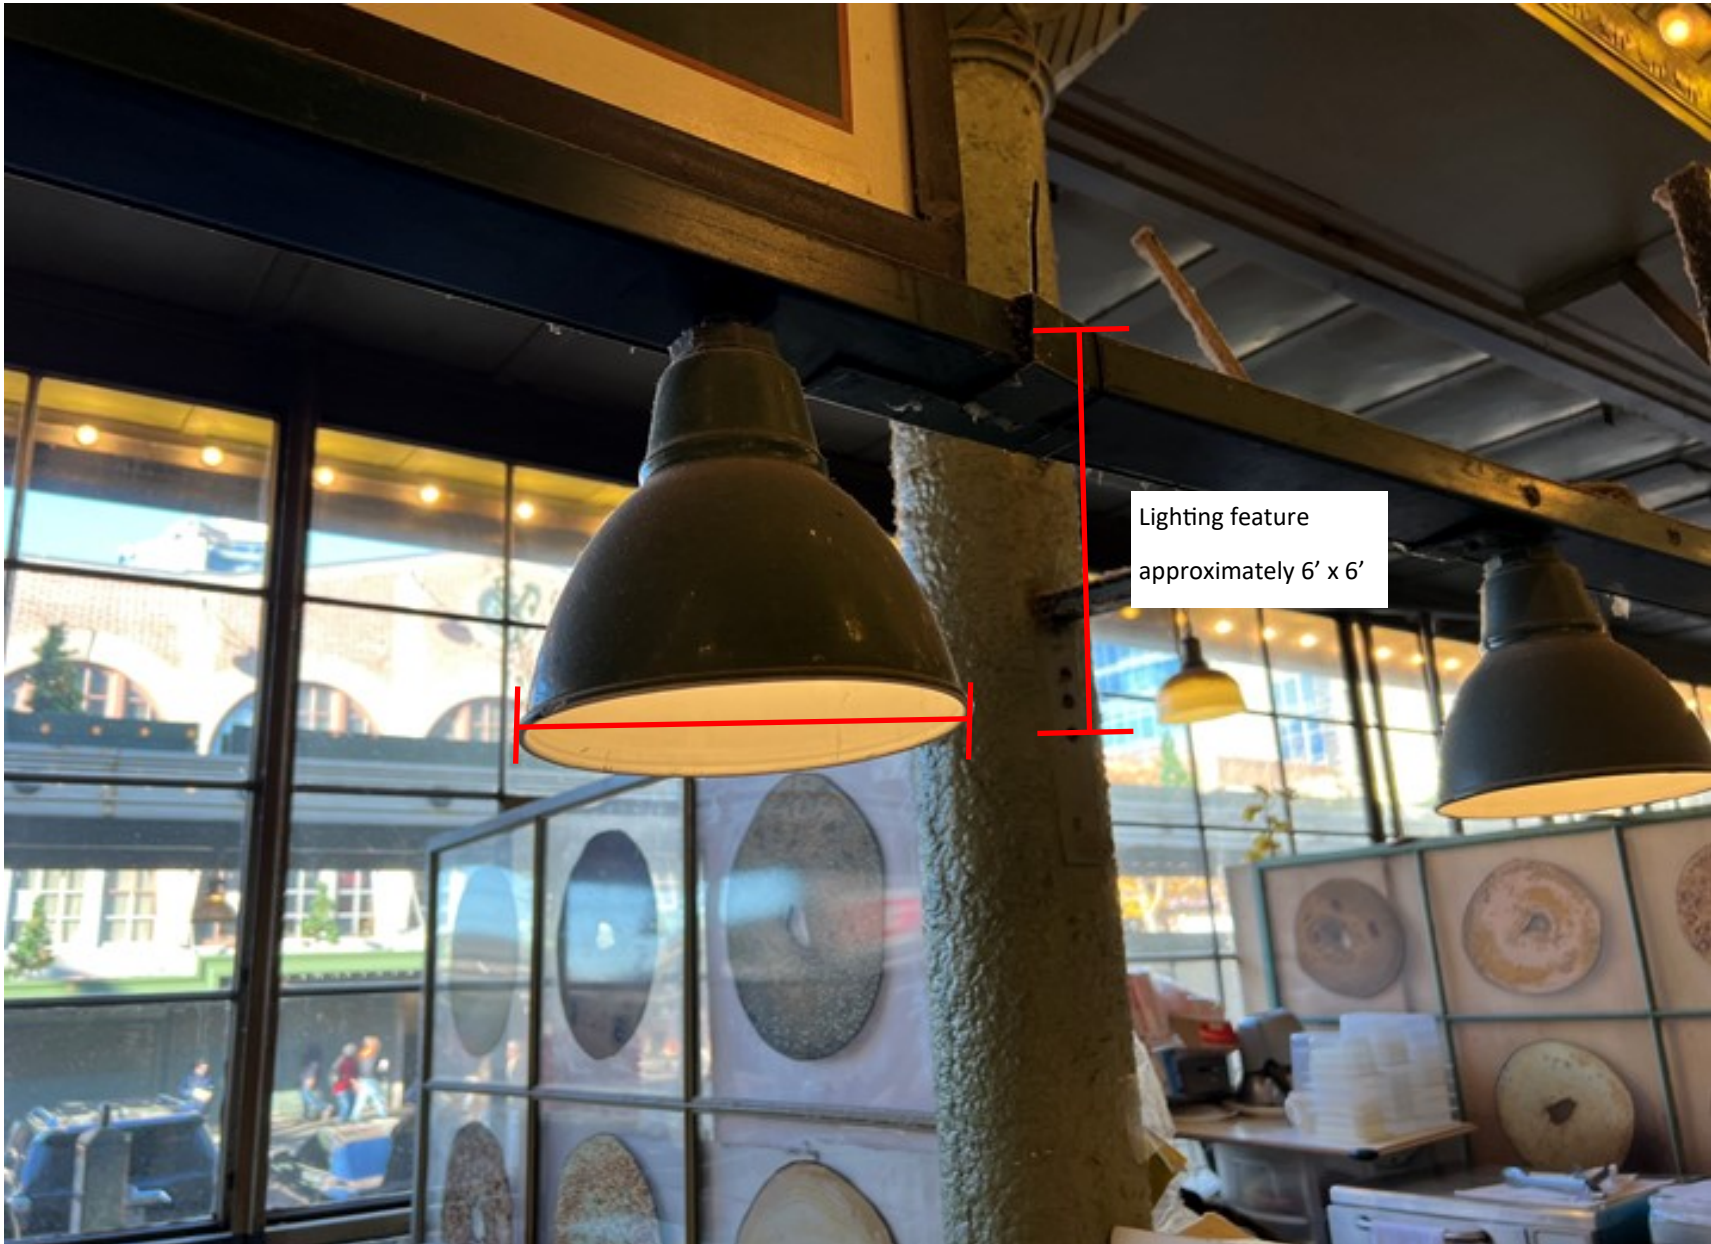

Image of space from the 1950's showing the original green light bar

Lighting bar will be attached to existing structural supports in arcade with brackets and screws matching what is existing
