# Concrete Finish and Color Matching Confirmation

We won't know the exact condition beneath the existing fountain until it is removed. However, we have experience installing these stations in multiple locations and are confident in our ability to match the surrounding concrete. For example, at 100 Pike, we used Euclid Lamp Black color additive to successfully match the existing concrete. If needed we would take the same approach at 1520 Pike Place to ensure a consistent, in-kind appearance.
