THE CHAPEL LOUNGE
White Vinyl
Letters with
transparent
background sign

“THE CHAPEL LOUNGE” sign will be painted, designers at different companies have said it is the best option.

Other color options that go well with our inside and outside look

Lounge- .5 inch

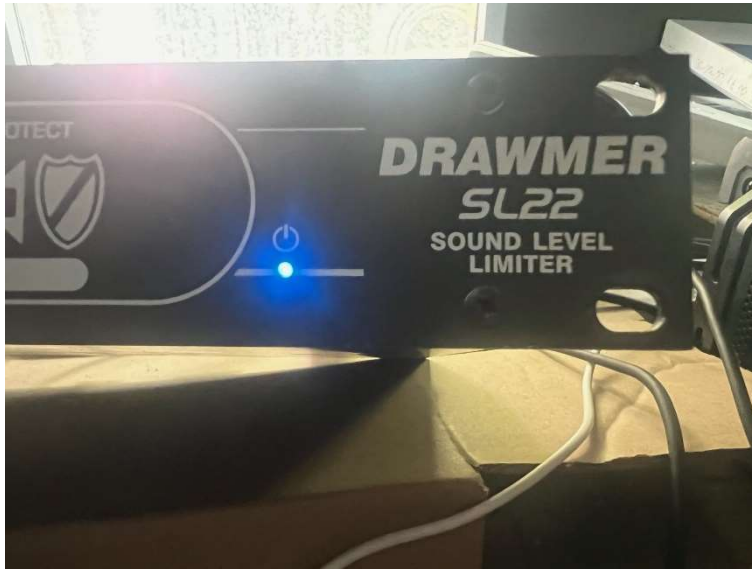

Chapel- 1 inch

Sound Monitoring

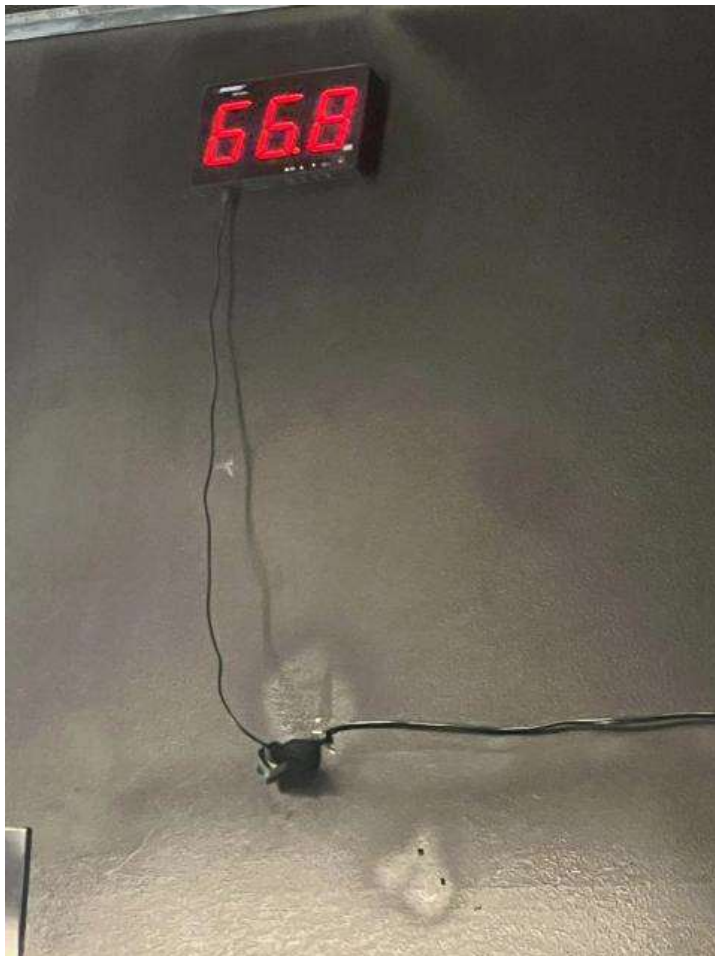

Installed, programmed, and regulated by Led & Sound Solutions

Sound Limiter

There is no maximum decibels (dB) for nightclub in Seattle but average is at 100dB to prevent hearing problems. Our sound limiter was programmed to be as high as 95dB. Even if the DJ tries to raise the volume, they won't be able to raise it above 95dB. We try to keep it even lower.

Sound Monitor

There are two Sound Monitors in the unit, one at the top of the south wall to make sure neighbors are not bothered by noise and the other by the entrance to make sure the noise is only in the inside.

The second floor of the building is rented occasionally as an Airbnb and it is listed as being above a nightclub.
