23.66.030 Certificates of Approval required

Certificate of approval required. No person shall alter, demolish, construct, reconstruct, restore, remodel, make any visible change to the exterior appearance of any structure, or to the public rights-of-way or other public spaces in a special review district, and no one shall remove or substantially alter any existing sign or erect or place any new sign or change the principal use of any building, or any portion of a building, structure or lot in a special review district, and no permit for such activity shall be issued unless a certificate of approval has been issued by the Department of Neighborhoods Director.

23.66.190 Streets and sidewalks.

A. Review by the Preservation Board shall be required before any changes are permitted to sidewalk prism lights, sidewalk widths or street paving and curbs.

Rules for the Pioneer Square Preservation District

III. GENERAL GUIDELINES FOR REHABILITATION AND NEW CONSTRUCTION

Rehabilitation is defined as the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values.

A. Street Paving. Streets within the District are to be paved according to standard Engineering Department practices with a weaving coat of asphalt concrete.

B. Curbs. Where granite curbing presently exists, it will be the required replacement material. In other instances the same concrete and lampblack mixture used for the sidewalk will be used.

XI. STREET FURNITURE

The cast iron and wood benches located in Pioneer Place Park ~~and Occidental Park~~ are the standard for the District. Approval to install benches will be determined by need and availability. All other elements of street furniture will be reviewed by the Board as to their specific compatibility within the Preservation District. This review will be extended to all bus shelters, bollards, signal boxes, mailboxes, pay phones, trash receptacles, newspaper stands, and vending carts which are both permanent and mobile. Pay phones, mail boxes, trash receptacles, and newspaper stands shall be located in the sidewalk zone adjacent to the curb, in line with street trees and light standards to reduce impediments to pedestrian flow and to avoid obscuring visibility into street level retail storefronts. (7/99, 7/03)

XIII. SIDEWALK CAFES

Sidewalk cafes may not impede the flow of pedestrian traffic. Movable structural elements that can be brought back against the building wall or elements that can be removed when not in use will generally be required if some structural element is necessary. No walls or roofs of any kind are permitted to enclose sidewalk cafes. Free-standing and table umbrellas are permitted, however, the Board may limit their number and placement to ensure compatibility with transparency and signage regulations. (7/03) Planter boxes are discouraged and will be permitted only in exceptional circumstances.

Materials for any structural elements on the sidewalk should be of durable, weatherproof, and vandal-proof quality. The Board will consider the compatibility of the color and design of structural elements with the building facade and the character of the District. The maximum allowable height of structural elements, including fencing, is 42". (7/03)

XIV. STREET TREES AND VEGETATION

London Plane is the preferred street tree in Pioneer Square, and the required street planting in Occidental Mall, its future extension, and all north/south Avenues. Throughout the rest of the District's street right of ways, if physical site constraints preclude use of London Planes, a tree similar in habit and form may be substituted, subject to City Arborist approval. For individual small parks and spaces, a different, complementary tree may be proposed as a signature tree for that area. (7/99)

Median strips and permanent plant beds shall contain plants approved for urban conditions, combining evergreen shrubs with ground cover and, where appropriate, flowers. Hanging baskets with seasonal flowers are recommended. Given the maintenance required to keep plant material lush and full, temporary ground-level planters are not recommended. (7/99)

XV. STREET LIGHTING

The three-globe Chief Seattle bronze base light fixture currently used in the District will be the approved street lighting standard. Additional alternative lighting standards and fixtures that are compatible with the historic character of the District may be approved by the Board for installation in conjunction with three-globe fixtures as needed to improve pedestrian-level lighting and public safety. (7/03)

XVII. SIDEWALK TREATMENT

A. Standards

Sidewalk paving and improvements shall be completed with one pound lamp-black per cubic yard of concrete, scored at two-foot intervals. This material shall be used for all projects of 1/4 block or greater size. On small projects, if it is feasible, sidewalk material may be selected as for all projects of 1/4 block or greater size. On small projects, if it is feasible, sidewalk material may be selected to match adjacent sidewalks in color, pattern and texture.

Secretary of Interior Standards for Rehabilitation

2. The historic character of a property will be retained and preserved.
3. Each property will be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as

adding conjectural features or elements from other historic properties, will not be undertaken.

9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

[Guidelines for Setting](#)

The setting is the area or environment in which a historic property is found. It may be an urban or suburban neighborhood or a natural landscape in which a building has been constructed.

The elements of setting, such as the relationship of buildings to each other, setbacks, fence patterns, views, driveways and walkways, and street trees together create the character of a district or neighborhood. In some instances, many individual building sites may form a neighborhood or setting.
