Staff Report

Board meeting Oct 7, 2026

Board Members Please Note: The citations from the District Ordinance, Rules for the Pioneer Square Preservation District, and Secretary of the Interior's Standards listed below are for your consideration in addition to any other citations you find relevant in considering each application.

100726.41 **Alaska Building**
Courtyard Marriot
612 2nd Ave
DONH-COA-02147
Applicant: Western Neon

Proposed: Replace existing blade sign with new exterior neon blade sign

Staff report: The ARC reviewed a previous proposal on 7/29/26. Because the proposal was for an internally lit sign, the Board requested alternatives to the sign design, lighting, and color that is more compatible with the historic character of the district and with the architecture of the building. They have revised the application to include two alternatives using exterior neon tubing. Because the application still asks for exception to rules, the staff could not approve the application with an administrative Certificate of Approval so it is before the Board for consideration. The proposal states that they are proposing bronze as the bracket to match the existing window mullions, however, the windows are a dark blue, not bronze. In the previous application the Board asked that the brackets match the frame of the sign rather than adding a different color.

The existing sign was approved in April 2010 following multiple reviews and changes to the design to make it more compatible with the historic character of the building. The sign used the detail from the building's decorative elements. The sign was amended from the original proposed brand sign to be more compatible with the building. The sign was originally proposed with

The Seattle Department of Neighborhoods**

"Printed on Recycled Paper"

neon but changed to LED during one of the revisions with the intention of the sign looking like a neon sign. No internal lighting was identified on the existing sign drawings.

The Board at the time made the following exceptions:

The sign was allowed to be installed above the intermediate cornice so that it does not hide damage or obscure architectural features on the lower portion of the building.

The sign was allowed larger than the 6 square feet normally allowed because the entire building is in the hotel use and the height and scale of the building. the existing sign was 90 square feet (18X5).

Letters were allowed larger in scale with the sign. Courtyard letter size was not marked on the sign but Marriot is marked as 12 inches.

Since this approval the hotel has added signage on the awning with approval. The hotel also later added window decal signage and window film, which is generally prohibited, without approval as seen in the existing conditions photo. Any approval may be conditioned on applying for or removing the window film and window decal signage.

Draft Motion:

I move to recommend granting a Certificate of Approval for Installation of sign specify option 1 o option 2)

Specify any changes to the bracket color

Optional condition: to remove existing window film and decal signage installed without approval or to submit an application for the installation of the window decal signage.

All per the applicant's submittal.

The Board directs staff to prepare a written recommendation of approval based on considering the application submittal and Board discussion at the October 7, 2026 public meeting and forward this written recommendation to the Department of Neighborhoods Director.

Seattle Municipal Code

23.66.030 Certificates of Approval required

Certificate of approval required. No person shall alter, demolish, construct, reconstruct, restore, remodel, make any visible change to the exterior appearance of any structure, or to the public rights-of-way or other public

spaces in a special review district, and no one shall remove or substantially alter any existing sign or erect or place any new sign or change the principal use of any building, or any portion of a building, structure or lot in a special review district, and no permit for such activity shall be issued unless a certificate of approval has been issued by the Department of Neighborhoods Director.

23.66.160 Signs

B. To ensure that flags, banners and signs are of a scale, color, shape and type compatible with the Pioneer Square Preservation District objectives stated in Section 23.66.100 and with the character of the District and the buildings in the District, to reduce driver distraction and visual blight, to ensure that the messages of signs are not lost through undue proliferation, and to enhance views and sight lines into and down streets, the overall design of a sign, flag, or banner, including size, shape, typeface, texture, method of attachment, color, graphics and lighting, and the number and location of signs, flags, and banners, shall be reviewed by the Board and are regulated as set out in this Section 23.66.160. Building owners are encouraged to develop an overall signage plan for their buildings.

C. In determining the appropriateness of signs, including flags and banners used as signs as defined in Section 23.84A.036, the Preservation Board shall consider the following:

1. Signs Attached or Applied to Structures.

a. The relationship of the shape of the proposed sign to the architecture of the building and with the shape of other approved signs located on the building or in proximity to the proposed sign;

b. The relationship of the texture of the proposed sign to the building for which it is proposed, and with other approved signs located on the building or in proximity to the proposed sign;

c. The possibility of physical damage to the structure and the degree to which the method of attachment would conceal or disfigure desirable architectural features or details of the structure (the method of attachment shall be approved by the Director);

d. The relationship of the proposed colors and graphics with the colors of the building and with other approved signs on the building or in proximity to the proposed sign;

e. The relationship of the proposed sign with existing lights and lighting standards, and with the architectural and design motifs of the building;

f. Whether the proposed sign lighting will detract from the character of the building; and

g. The compatibility of the colors and graphics of the proposed sign with the character of the District.

6. Projecting signs and neon signs may be recommended only if the Preservation Board determines that all other criteria for permitted signs have been met and that historic precedent, locational or visibility concerns of the business for which the signing is proposed warrant such signing.

Pioneer Square Preservation District Rules

XX. RULES FOR TRANSPARENCY, SIGNS, AWNINGS AND CANOPIES

The Pioneer Square Preservation Ordinance reflects a policy to focus on structures, individually and collectively, so that they can be seen and appreciated. Sign proliferation or inconsistent paint colors, for example, are incompatible with this focus, and are expressly to be avoided. (8/93)

B. General Signage Regulations

All signs on or hanging from buildings, in windows, or applied to windows, are subject to review and approval by the Pioneer Square Preservation Board. (8/93) Locations for signs shall be in accordance with all other regulations for signage. (12/94)

The intent of sign regulations is to ensure that signs relate physically and visually to their location; that signs not hide, damage or obscure the architectural elements of the building; that signs be oriented toward and promote a pedestrian environment; and that the products or services offered be the focus, rather than signs. (8/93)

C. Specific Signage Regulations

1. Letter Size. Letter size in windows, awnings and hanging signs shall be consistent with the scale of the architectural elements of the building (as per SMC 23.66.160), but shall not exceed a maximum height of 10 inches unless an exception has been approved as set forth in this paragraph. Exceptions to the 10-inch height limitation will be considered for individual letters in the business name (subject to a limit of no more than three letters) only if both of the following conditions are satisfied: a) the exception is sought as part of a reduced overall sign package or plan for the business; and b) the size of the letters for which an exception is requested is consistent with the scale and character of the building, the frontage of the business, the transparency requirements of the regulations, and all other conditions under SMC 23.66.160. An overall sign package or plan will be considered reduced for purposes of the exception if it calls for approval of signage that is substantially less than what would otherwise be allowable under the regulations. (12/94)

3. Projecting Elements (e.g. blade signs, banners, flags and awnings). There shall be a limit of one projecting element, e.g. a blade sign, banner, or

awning per address. If a business chooses awnings for its projecting element, it may not also have a blade sign, flag, or banner, and no additional signage may be hung below awnings. (6/03) Exceptions may be made for businesses on corners, in which case one projecting element per facade may be permitted. (12/94)

4. Blade signs (signs hanging perpendicular to the building). Blade signs shall be installed below the intermediate cornice or second floor of the building, and in such a manner that they do not hide, damage, or obscure the architectural elements of the building. Typically, non-illuminated blade signs will be limited to eight (8) square feet. (12/94)

Blade signs incorporating neon of any kind shall not be permitted unless all of the following conditions are met: a) the neon blade sign is sought as part of a reduced overall sign package or plan for the business; b) neon blade signs shall be limited to six (6) square feet in dimension with letters not to exceed eight (8) inches in height; c) the sign meets the requirements of Neon Signs - Paragraph 3 for the number and type of colors of neon; d) the sign meets the requirements of Signs - Paragraph 5 (above) for installation of a blade sign; e) electrical connection from exterior walls to the blade sign shall be made using rigid, paintable electrical tubing painted to match the building facade and all bends shall closely follow the support structure; f) all signage supports shall be fastened to the exterior wall by the use of metal anchors at existing grout joints only; and g) the sign taken as a whole is consistent with the scale and character of the building, the transparency requirements of the regulations, and all other conditions under SMC 23.66.160. An overall sign package or plan will be considered reduced for purposes of the exception. if it calls for approval of signage that is substantially less than what would otherwise be allowable under regulations. (5/96)

6. Upper Floor Signage. Upper floor signage is not permitted, except for temporary signage as per SMC 23.66.160D or when it is proposed as part of an overall integrated sign plan for the building. (7/99) When permitted, the preferred location for temporary signs is in windows, rather than attached to the building. (8/93)

7. Internally Lit Signs. Internally lit or backlit signs are prohibited. (8/93)

D. NEON SIGNS

1. The number of neon signs shall be limited to one for each 10 linear feet of business frontage for the first forty feet of business, and one for each additional 15 feet of frontage for businesses over forty feet. For a business that has transom windows beginning at ten (10) feet above the sidewalk, one additional neon sign to be located within the transom windows would be permitted for every 30 feet of frontage. Signs need not be spaced one per ten feet, but may be clustered, provided the maximum number of approved

signs is not exceeded and the grouping does not obscure visibility into the business. Permitted neon signs may be located in transom windows, according to the guidelines contained in this section. (12/94)

Secretary of Interior Standards for Rehabilitation

2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.

5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.

9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.
