

# MAGNUSON PARK CIRCULATION STUDY AND COMFORT STATION FEASIBILITY STUDY ONLINE PUBLIC MEETING #1

We invite the Sand Point community, surrounding neighborhoods and visitors to Magnuson Park to register and participate in our first online public meeting for the **Magnuson Park Circulation and Comfort Station Feasibility Studies**. This planning process will

- Develop a Circulation Plan and identify future improvements for all modes of transportation to, from and through the park;
- Identify the preferred location and layout for a future comfort station (a.k.a. restrooms);
- Recommend updates to the existing wayfinding system within the park and historic district.

During this meeting, Seattle Parks and Recreation and its consultants, Heffron Transportation and MIG, will describe the existing conditions that affect park circulation, the location of a proposed comfort station and possible wayfinding solutions.

We are seeking input from the community to inform next stages of this project.

A second public meeting will be held later this spring.

This meeting will be recorded and posted on the project website for the community to review.

## MARCH 30, 2021, 6:00 TO 7:15 PM

To register visit the project website:
