- “Detention” (See SMC, Subsection 22.801.050.D)
- “Development” (See SMC, Subsection 22.801.050.D)
- “Dewatering” is the act of removing groundwater or construction stormwater away from a construction site. See definitions for Construction Stormwater Dewatering or Groundwater Dewatering.

- “Dewatering, Construction Stormwater” is the removal of stormwater from a construction site. Construction stormwater does not include construction (process) wastewater or groundwater.
- “Dewatering, Groundwater” is the removal of groundwater, both temporary and permanent, from a project site. Examples of temporary groundwater dewatering include dewatering of groundwater during construction (e.g. trench dewatering, well-point dewatering, dewatering from sumps in excavations)—and dewatering for temporary remediation systems. Examples of permanent groundwater dewatering include dewatering through foundation drainage systems that extend into any zone of groundwater, perched or otherwise, as well as any other subsurface drainage system that extends into a zone of groundwater. See Groundwater definition.
