

# S DEARBORN STREET

## PROTECTED BIKE LANE PROJECT

### WHAT IS A PROTECTED BIKE LANE (PBL)?

PBLs physically separate people riding bikes from people driving and are distinct from the sidewalk, adding safety and predictability.

### WHAT DOES THE GREEN PAVEMENT MEAN?

The green pavement alerts both drivers and bicyclists where they cross paths so they look out for each other. It is commonly used at intersections, alleys and driveways. Drivers must yield to bicyclists in green pavement areas.

### BENEFITS

- Make it safer and more comfortable to ride a bike
- Add predictability by separating people biking from people driving
- Encourage people to bike on the road, not on the sidewalks
- Improve access for people biking to frequent businesses
