

Aurora-Licton Draft Home Zone

Collaboration and Co-Creation

The Aurora-Licton Home Zone began in August and September of 2022. Community representatives led four walking tours of the Home Zone area. 72 participants shared over 200 comments and ideas with our staff. You can see these comments on our website, URL below.

After the walks, Aurora-Licton residents formed a steering committee. The steering committee developed the Draft Home Zone. We expect construction to begin in late 2024 and 2025.

Community Led Walking Tour

Funding

There is \$200,000 allocated for the Aurora-Licton Home Zone. In addition, Safe Routes to school is contributing \$80,000 for curb bulbs at 90th St and Stone Ave. Neighborhood Greenways and Healthy Streets are also funding projects in the Home Zone.

There are many additional improvements needed in this Home Zone. These improvements, based on community input, can be seen on our website. These projects will be considered when future funding becomes available.

Aurora Ave Corridor Project

The City of Seattle and King County Metro are working on a new design for Aurora Ave N. The Aurora-Licton Home Zone identifies some recommendations for the street. These options include green infrastructure, scooter / bike corrals, and turn restrictions.

Pilot Healthy Streets

The Healthy Streets along Fremont Ave, Ashworth Ave, and 100th St are under review to become permanent. We are working on a conceptual design based on what we have heard from the community. Because Healthy Streets are already closed to through traffic, you don't need a permit from the City of Seattle to host a Play Street. Get materials to enhance the closure and learn more on the Healthy Streets website.

Street Closure with Planters (left) or Concrete Blocks (right)

In order to finalize the Home Zone, community input is needed. Please take this survey and share

your thoughts with us.
