

Queen Anne Ave N Protected Bike Lane Extension

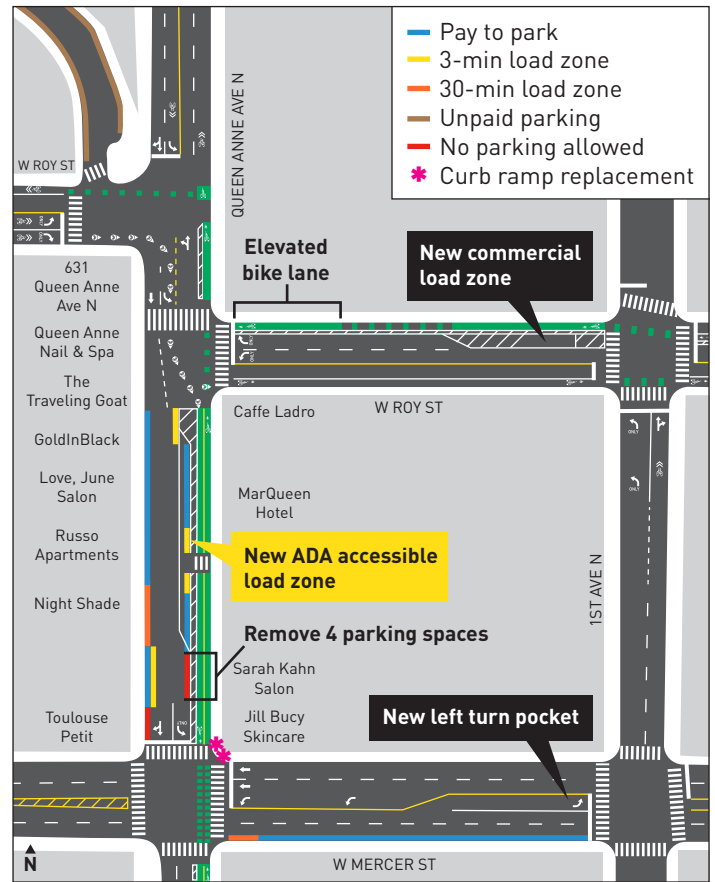

Project Overview

As part of the [North Downtown Mobility Action Program](#), we're building a new two-way protected bike lane (PBL) on Queen Anne Ave N. The lane will connect existing biking facilities on Queen Anne Ave N from W Mercer St to bike lanes on Roy St and make it easier for people to get around in our North Downtown neighborhoods.

Project Design

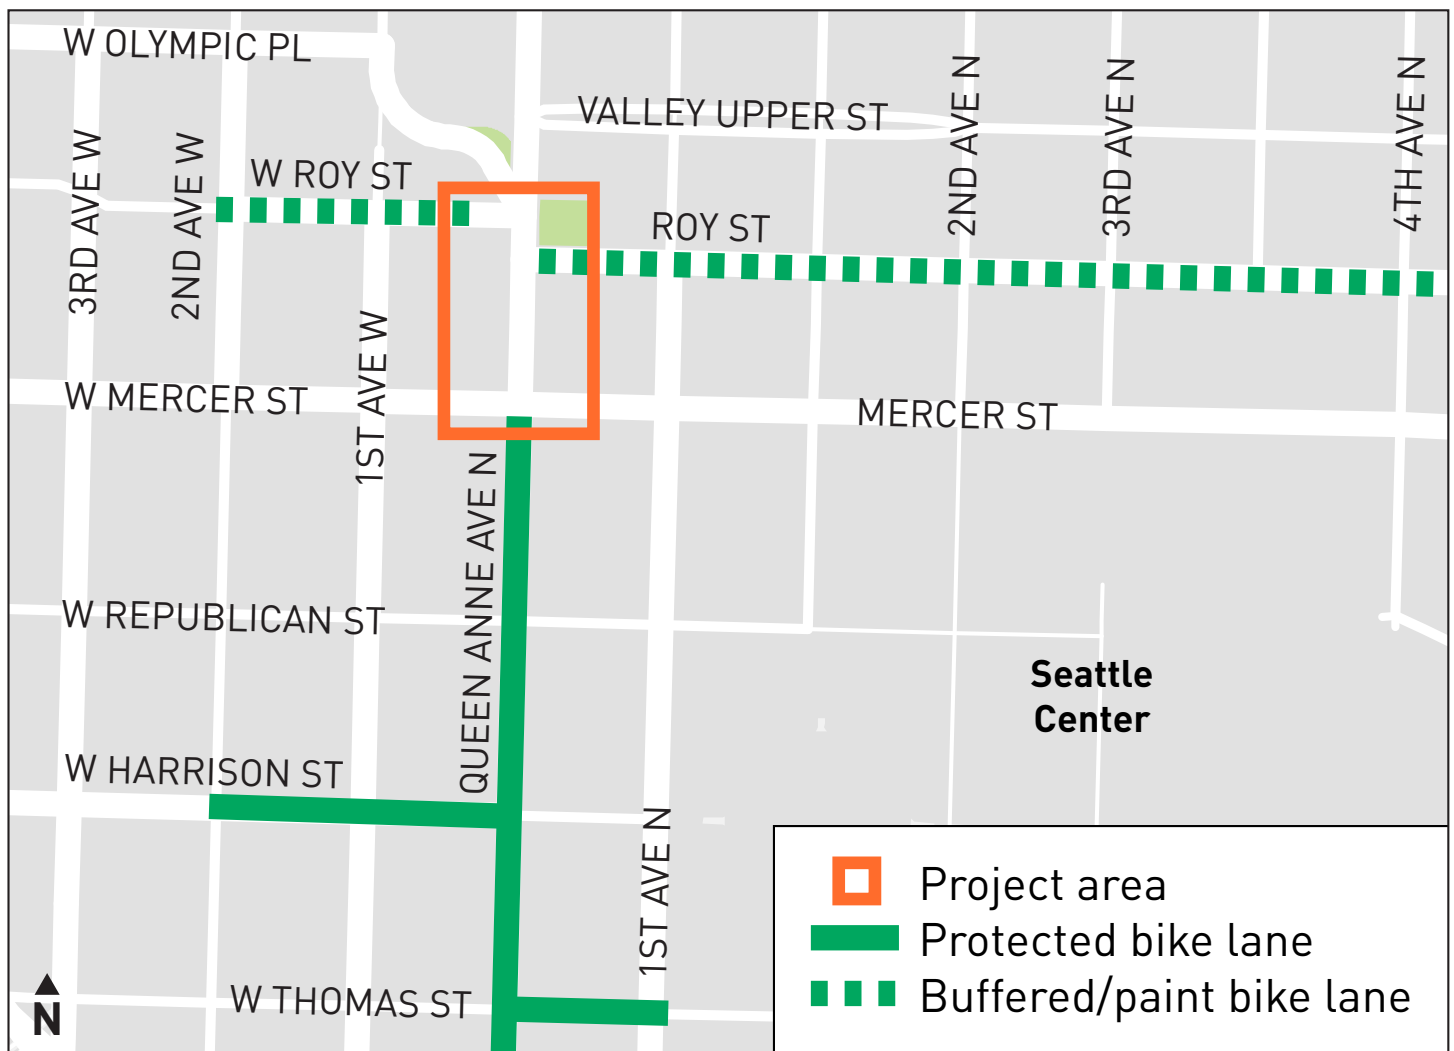

The new two-way protected bike lane on Queen Anne Ave N will separate people biking from moving vehicles with pre-cast concrete curbs.

Proposed changes on this block include:

- We're changing the two-way street on this block to a one-way street going southbound only
- Updated turning movements with pavement markings, signage, and signal changes at nearby intersections
- East side of Queen Anne Ave N parking adjustments include an additional ADA load zone
- We'll install a new commercial load zone on Roy St just west of 1st Ave N

Project Area

The map below shows the project area along Queen Anne Ave N, from W Mercer St to Roy St, and its connection to the North Downtown bicycle network.

Project Timeline

We expect the design to be ready sometime this fall, with construction beginning later this year.
