

2007

**ANNUAL SURVEY OF WHOLESALE CUSTOMERS:
SUMMARY OF RESULTS**

Seattle
 Public
Utilities

August 2008

RESULTS OF THE 2007 SEATTLE SURVEY OF WHOLESALE CUSTOMERS

Each year, Seattle Public Utilities (SPU) asks its wholesale customers to provide information on their current and forecast water demand (both retail and wholesale), sources of supply (in addition to SPU), and their water and sewer rates. A complete set of this data by wholesale customer and by year is of critical importance in Seattle Public Utilities' efforts to better forecast wholesale demand. Wholesale customers often find the current and historical information provided in this report useful in their own analysis and planning. It also allows them to see how they compare to other wholesale customers and Seattle in a number of areas.

This report summarizes much of the data that was collected in the 2007 wholesale customer survey and is the 14th year the report has appeared in this format. *Seattle Public Utilities appreciates the time and effort each wholesale customer has taken in completing and returning the survey.* Comparative information is presented on water rates, bills and consumption patterns. Questions about this report or the survey data should be directed to Bruce Flory at (206) 684-5859.

Overview

About half the water produced by Seattle Public Utilities is sold directly to consumers in Seattle's direct service area. The rest is sold wholesale to 25 neighboring cities and water districts. These wholesale customers are listed below.

Wholesale Customers of Seattle Public Utilities

<u>Cities</u>	<u>Water Districts</u>
· City of Bellevue ¹	· Cedar River Water & Sewer District
· City of Bothell	· Coal Creek Utility District
· City of Duvall	· Highline Water District
· City of Edmonds	· Lake Forest Park Water District
· City of Kirkland ¹	· Northshore Utility District
· City of Mercer Island	· Olympic View Water & Sewer District
· City of Redmond ¹	· Shoreline Water District
· City of Renton	· Skyway Water & Sewer District ^{1,2}
· City of Tukwila ¹	· Soos Creek Water & Sewer District
	· Woodinville Water District
	· Water District No. 20 ³
	· Water District No. 45
	· Water District No. 49
	· Water District No. 90
	· Water District No. 119
	· Water District No. 125

¹ Bellevue, Kirkland, Redmond, Skyway, and Tukwila are members of the Cascade Water Alliance which signed a block supply contract with SPU effective January 1, 2004.

² Skyway and Bryn Mawr-Lakeridge merged in 1999. The name of the merged utility was changed to Skyway in 2002.

³ Water District 85 was merged with Water District 20 in 2003.

While there are almost 1,500 public water systems in King County and an estimated fourteen thousand private systems, the 45 largest water utilities serve 95% of the county's population. Seattle and its wholesale customers alone provide water to about 74% of the population of King County as well as 43,000 people in the southwest corner of Snohomish County.

Percent of Population Served by Water Providers in King County

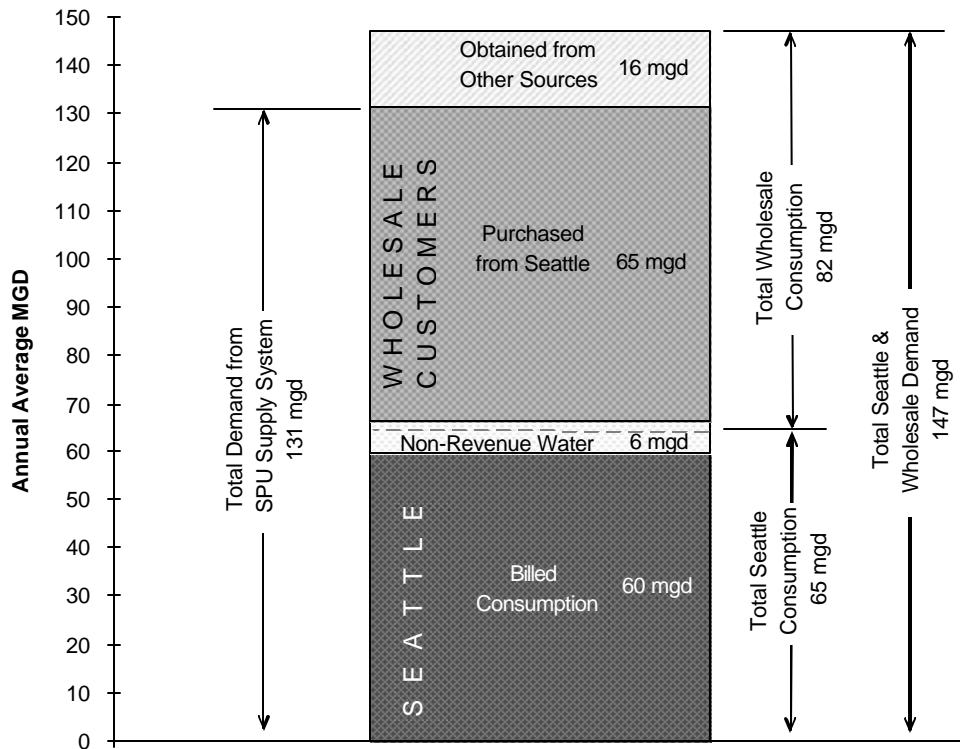

Supply: Seattle Public Utilities has two surface water sources and a small ground water source: the Cedar River system, the South Fork Tolt Reservoir, and the Seattle Well Field (used primarily for summer peaking). On average, the Cedar River system provides about 70 percent of total supply, the South Fork Tolt system delivers 29 percent, and the Seattle Well Field delivers 1 percent. With the addition of the Tolt Treatment Facility in 2001, total annual average firm yield from the current system is estimated at 171 mgd.

A number of Seattle's wholesale customers have their own sources of supply, which reduce their demand from Seattle. These utilities and the approximate annual capacity of their sources are listed below:

- **Edmonds** – Purchased all of its water from Alderwood in 2006.
- **Highline** - Wells, 1.9 mgd
- **Lake Forest Park** - Well, 0.4 mgd
- **Olympic View** - Surface Water, 0.5 mgd
- **Redmond** - Wells, 2.7 mgd
- **Renton** - Wells, 13.2 mgd.
- **Skyway** - Well, 0.2 mgd
- **Water District 90** - 0.6 mgd

Demand: Seattle and wholesale water demand totaled 147 mgd in 2006, up from 142 mgd in 2005. Of that, 131 mgd came from the SPU supply system and 16 mgd was obtained from wholesale customers' own sources of supply. Various components of Seattle and wholesale demand are shown in the chart, below⁴. Seattle demand was 65 mgd including 5 mgd of non-revenue water. Total wholesale demand of 82 mgd consisted of 66 mgd from Seattle (65 mgd purchased and 1 mgd transmission losses) and 16 mgd obtained from other sources. Included in wholesale demand, but not shown separately on the chart, is about 5 mgd of distribution system non-revenue water.

Components of Seattle and Wholesale Water Demand: 2006

⁴ Components may not add to total due to rounding.

* All utilities with seasonal rates use a 4 month peak season except Soos Creek which has a 3 month peak season.

** Break Points are the number of ccf per month at which the next rate block is attained. For example, W.D. 45 charges \$1.75 per ccf for the first 5 ccf consumed, \$2.75 per ccf for the next 20 ccf per month, and \$3.75 per ccf for all consumption in excess of 25 ccf per month.

*** WD 119, Mercer Island, Olympic View, Soos Creek, and Seattle have both seasonal and block rates. For example, WD 119's 2nd block rate of \$2.30/ccf increases to \$2.86 during the peak season.

26	Edmonds	\$25.03	\$22.67	\$29.75	31.2%
WHOLESALE AVERAGE					
		\$35.27	\$30.60	\$44.79	46.4%

* Note that the summer/winter differential is not the differential in rates but in bills. Most purveyors have a differential of less than 50% even though bills are calculated with 50% more consumption in summer than in winter. This means that the average rate charged per ccf by these purveyors is actually less in the summer than in the winter. This seemingly contradictory result is due to the impact of the meter charge which is spread over a greater number of ccf in the summer.

* Consumption data is missing for Bothell in 2004 and Northshore in 2005. Redmond did not provide data for 2004, 2005, and 2006. Bellevue and Tukwila did not provide data for 2006. Total consumption calculated for 2004, 2005 and 2006 excludes these utilities and is therefore less than the actual total.

Figure 2.3

2006 Wholesale Customer Non-Revenue Water as a Percentage of Total Water Use

(2003, 2004, & 2005 Non-Revenue Shown in Gray)

* 2006 non-revenue data not available for Bellevue, Lake Forest Park, Redmond, and Tukwila.
