

City of Seattle

Public Utilities Department of Construction and Inspections

Notice of Rulemaking

Under the authority of Seattle Municipal Code 3.02.030, 3.06.040, and 3.32.020, the Department of Construction and Inspections (SDCI) and Seattle Public Utilities (SPU) propose to revise Director's Rule DWW-200 / 03-2026, the Stormwater Manual. We invite the public's review and input.

The rule would support implementation of the City of Seattle's Stormwater Code (SMC 22.800-22.808) and provide specific technical requirements, criteria, guidelines, and additional information.

Drafts and summaries of changes to the code and manual are published in the Stormwater Code and Manual Update 2026 webpage:
