

LAKE FOREST PARK RESERVOIR COVER REPLACEMENT PROJECT

Preserving water quality for the communities we serve.

Updated Fall 2021

Project Overview

Lake Forest Park Reservoir is located in the City of Lake Forest Park and is part of Seattle Public Utilities' regional drinking water system. The reservoir has a floating cover that was installed in 2001 and designed to last about 20 years. Due to increased maintenance and repair work needed to keep the aging cover operational, SPU has decided to replace it with a new floating cover.

To perform this work, crews will:

- Remove and dispose of the existing floating cover
- Install a new liner and floating cover
- Replace pumps, pipes & other equipment
- Perform final site restoration and demobilize from the site

Location

The Lake Forest Park Reservoir is located north of NE 195th St between 45th Ave NE and 47th Ave NE. All work will be performed within the reservoir site location.

Schedule

Work began in May 2021. Due to equipment and shipping delays, the contractor will pause work in mid-November and resume in Spring 2022. Construction work in 2022 is expected to take about 4 months.

During construction, crews will typically work weekday, daytime hours with possible work on Saturdays.

Anticipated Impacts

During construction, you can expect:

- General construction activities and noise during working hours
- No planned road closures, but residents can expect increased construction traffic with equipment and materials entering and exiting the site
- Walking path around the reservoir site may be temporarily blocked for construction activities
- Homes and businesses will continue to receive water services during construction

Next Steps

SPU will provide updates to the community throughout construction. To learn more about the project and sign up for the email list, visit:
