

2024 Surveillance Impact Report

Closed-Circuit Television Camera Systems

Seattle Police Department

Surveillance Impact Report ("SIR") overview

About the Surveillance Ordinance

The Seattle City Council passed Ordinance 125376, also referred to as the "Surveillance Ordinance," on September 1, 2017. SMC 14.18.020.b.1 charges the City's executive with developing a process to identify surveillance technologies subject to the ordinance. Seattle IT, on behalf of the executive, developed and implemented a process through which a privacy and surveillance review is completed prior to the acquisition of new technologies. This requirement, and the criteria used in the review process, are documented in Seattle IT Policy PR-02, the "Surveillance Policy".

How this Document is Completed

This document is completed by the requesting department staff, support and coordinated by the Seattle Information Technology Department ("Seattle IT"). As Seattle IT and department staff complete the document, they should keep the following in mind.

- Responses to questions should be in the text or check boxes only; all other information (questions, descriptions, etc.) Should **not** be edited by the department staff completing this document.
- 2. All content in this report will be available externally to the public. With this in mind, avoid using acronyms, slang, or other terms which may not be well-known to external audiences. Additionally, responses should be written using principally non-technical language to ensure they are accessible to audiences unfamiliar with the topic.

Surveillance Ordinance Review Process

The following is a high-level outline of the complete SIR review process.

Upcoming for Review	Initial Draft	Open Comment Period	Final Draft	Working Group	Council Review
The technology is upcoming for review, but the department has not begun drafting the surveillance impact report (SIR).	Work on the initial draft of the SIR is currently underway.	The initial draft of the SIR and supporting materials have been released for public review and comment. During this time, one or more public meetings will take place to solicit feedback.	During this stage the SIR, including collection of all public comments related to the specific technology, is being compiled and finalized.	The surveillance advisory working group will review each SIR's final draft and complete a civil liberties and privacy assessment, which will then be included with the SIR and submitted to Council.	City Council will decide on the use of the surveillance technology, by full Council vote.

Privacy Impact Assessment

Purpose

A Privacy Impact Assessment ("PIA") is a method for collecting and documenting detailed information collected in order to conduct an in-depth privacy review of a program or project. A PIA asks questions about the collection, use, sharing, security and access controls for data that is gathered using a technology or program. It also requests information about policies, training and documentation that govern use of the technology. The PIA responses are used to determine privacy risks associated with a project and mitigations that may reduce some or all of those risks. In the interests of transparency about data collection and management, the City of Seattle has committed to publishing all PIAs on an outward facing website for public access.

When is a Privacy Impact Assessment Required?

A PIA may be required in two circumstances.

- 1. When a project, technology, or other review has been flagged as having a high privacy risk.
- 2. When a technology is required to complete the surveillance impact report process. This is one deliverable that comprises the report.

1.0 Abstract

1.1 Please provide a brief description (one paragraph) of the purpose and proposed use of the project/technology.

Gun violence, human trafficking, and other persistent felony crimes are concentrated at specific geographic places in the city. This concentrated crime is often anchored at these places and requires a holistic crime-prevention strategy.

The Crime Prevention Technology pilot is one component of an overall strategy of addressing felony crime at specific places. These technologies will be coupled with police patrols, continued investments in community-based initiatives, and enhanced lighting and cleaning.

This SIR covers closed-circuit television (CCTV) camera systems proposed by the Seattle Police Department (SPD) to deter and detect criminal activity. The CCTV camera systems are proposed to be installed at locations where gun violence, human trafficking, and persistent felony crime is concentrated. The cameras will face toward the street, sidewalk, and other public areas. Signs acknowledging the use of the cameras will be posted in the immediate area of deployment, and street fliers will be distributed. In addition to the city-owned and operated CCTV cameras, privately-owned security systems will be able to voluntarily share video of storefronts and areas where the public has access with SPD. This voluntary sharing of CCTV images of publicly accessible areas will increase the effectiveness of the technology-assisted crime prevention effort. CCTV camera systems contribute to averting harm to individuals and property and reducing crime by assisting in collecting evidence related to serious and/or violent criminal activity as part of investigations. For example, CCTVs could be used to review firearms-related homicides or aggravated assaults to identify the offender(s)

and hold them accountable and provide justice for the victims and remove deadly weapons from the street.

1.2 Explain the reason the project/technology is being created or updated and why the PIA is required.

The City's police staffing crisis, now in its fourth year, has resulted in over 700 officers departing SPD since 2019. As of January 2024, 913 police officers are available for deployment in the city, the lowest number of in-service officers since 1991 and significantly below per-capita staffing relative to comparative jurisdictions. Low staffing levels also affect investigations, which hinders police effectiveness in solving cases and holding violent criminals accountable.

Gun violence, human trafficking, and other persistent felony crimes are concentrated at specific geographic places and long-time efforts to prevent these crimes have not been consistently successful. Implementing technology tools to bolster policing capabilities, as one part of a holistic crime prevention and reduction plan is essential to address ongoing gun violence, vehicle theft, human trafficking, and persistent felony crime at specific places, including within our most victimized communities.

The Crime Prevention Technology pilot is one component to this overall strategy of addressing this issue. These technologies will be coupled with police patrols, continued investments in community-based initiatives, and enhanced lighting and cleaning.

SPD's proposed CCTV camera systems would capture video of identifiable individuals, some of whom may be unaware of the recording, despite signage. Without appropriate safeguards, this raises significant privacy concerns which has resulted in this review. Recognizing these concerns, SPD proposes the CCTV camera systems will be utilized in a limited fashion and only in public-facing locations. The cameras will face toward the street, sidewalk, and other public areas and signs acknowledging use of the cameras will be posted.

2.0 Project / Technology Overview

Provide an overview of the project or technology. The overview gives the context and background necessary to understand the purpose, mission and justification for the project / technology proposed.

2.1 Describe the benefits of the project/technology.

The theory of change supporting the pilot project is that these technologies (1) bolster police effectiveness in public places where crime is concentrated when used with other crime prevention efforts, including increased police patrols, enhanced lighting, graffiti mitigation, and others (CPTED), (2) deter criminal behavior when the public is aware of the cameras, and (3) gather evidence to hold offenders accountable. These efforts can improve public safety and enhance the public's confidence in the city government's ability to maintain safe neighborhoods.

Serious felony crimes are often concentrated at specific geographic locations in Seattle and long-time efforts to prevent these crimes have not been consistently successful. Police effectiveness is further hindered due to unprecedented patrol and investigation staffing shortages in the Seattle Police Department.

The purpose of the CCTV pilot program is to mitigate unprecedented patrol and investigations staffing shortages by leveraging evidence-based and industry-standard technologies to deter and detect persistent felony criminal behavior, gun violence, and human trafficking at specific places where these crimes are concentrated.

CCTV camera systems contribute to averting harm to individuals and property and reducing crime by assisting in collecting evidence related to serious and/or violent criminal activity as part of investigations thereby supporting closing investigative cases, holding criminals accountable, and removing deadly weapons off the street. For example, CCTVs could be used to review a firearms-related homicide to identify the suspect and provide information that would provide justice for the victims and remove deadly weapons from the street.

2.2 Provide any data or research demonstrating anticipated benefits.

Research has shown that CCTV cameras can be effective when deployed to address specific crime problems in specific geographic places and coupled with crime prevention through environmental design (CPTED) measures, other crime prevention technologies, patrol, and public support. The federal Department of Justice, the National Institute of Justice, and George Mason University's Center for Evidence Based Crime Policy rate the technology as "promising," meaning there is evidence of its effectiveness in preventing crime and aiding criminal investigations. Research is strong that CCTV increases the effectiveness of investigations.

In one broad study, researchers found that: "Results of this systematic review—based on 40 years of evaluation research—lend support for the continued use of CCTV to prevent crime as well as provide a greater understanding of some of the key mechanisms of effective use" 1 . The study also showed that there is evidence that "CCTV schemes incorporating active monitoring (n = 54) were associated with a significant reduction in crime" 2 , highlighting the role of active monitoring (e.g., Real-Time Crime Center) in enhancing the efficacy of CCTV systems.

Similar CCTV technology is widely used both internationally and domestically. Major cities in the United States with a comparable or greater number of residents to Seattle using CCTV include Atlanta, Baltimore, Chicago, Los Angeles, New York, Philadelphia, Phoenix, Portland,

¹ Piza, E., Welsh, B., Farrington, D. and Thomas, A. (2019). CCTV Surveillance for Crime Prevention: A 40-Year Systematic Review with Meta-Analysis. *Criminology & Public Policy*, *18*(1): 135-159

² Ibid

San Diego, San Francisco, and others. At least 43 municipalities in Washington State use some or all the technologies being proposed by SPD.

Here are some additional studies that look into these technologies:

- 2023 study of CCTV: <u>"Evaluating the Effect of CCTV on Crime Occurrence and Case Clearances</u>" by Amanda L. Thomas (cuny.edu)
- 2021 study of CCTV in Dallas. <u>SocArXiv Papers | The effect of public surveillance cameras on crime clearance rates (osf.io)</u>
- 2019 study of CCTV from New York. <u>CCTV surveillance for crime prevention Piza 2019 Criminology & Public Policy Wiley Online Library.</u>
- 2012 study of the St. Louis program. https://academic.oup.com/policing/article-abstract/6/1/26/1457126

SPD will evaluate the efficacy of the CCTV implementation through standard performance measures already in use: violent crime rate, priority one response time, patrol coverage when not responding to calls (over/under policing), equity, perceptions of trust, perceptions of safety. Successful implementation of this suite of technologies (CCTV/RTCC/enhanced ALPR) will be indicated by a decrease in violent crime, priority one response time, no increase or a decline in measures of police over-presence, measure of disparate impact, and an increase in perceptions of trust and safety.

This pilot will be data-informed and guided. It will terminate if data suggests the technology is ineffective. Utilizing the abilities of the Performance Analytics and Research Unit, the Seattle Police Department has a plan to actively manage performance measures reflecting the "total cost of ownership of public safety," Equity, Accountability, and Quality ("EAQ"), which includes measures of disparate impact and over-policing. In addition to a robust Continuous Intervention Assessment designed to inform, in real-time, the active development of a safer, more effective, Evidence-Based Policing (EBP) competency, the EAQ program assures just right policing is achieved with undue collateral harm.

2.3 Describe the technology involved.

Each CCTV system consists of the following, with some variance depending on the specific technology/vendor solution that is selected:

- Cameras: these can range from simple fixed cameras to more sophisticated cameras with pan-tilt-zoom (PTZ) as well as other capabilities (infrared night vision, high-definition imaging, etc.).
- Recording Devices: DVRs (digital video recorders) or NVRs (network video recorders)
 are used for storing video footage. DVRs are used for analog cameras, whereas NVRs
 are designed for IP (internet protocol cameras).

- Storage: the video footage is stored locally within hard drives within DVRs/NVRS for 30 days before being deleted. If video is identified as evidence in an investigation, it will be stored in SPD's secure electronic evidence storage.
- Video Management System: the software system that enables authorized users to view the live feed of the CCTV system and review recordings.
- Edge-Based Analytics capabilities: many modern CCTV systems have built-in processing power that enables them to perform a range of analytics such as motion detection and object recognition (e.g., identifying vehicles or people by the clothing they are wearing or items they may be carrying). "Edge-Based" refers to this processing being done on the camera, reducing the need for high network bandwidth. SPD will not use AI facial recognition tools.
- Technology exists for private owners of video security systems to voluntarily share streams of specific cameras with SPD.
- Data Encryption and Security: to ensure privacy and security, cloud-based systems encrypt data both in transit (when being uploaded) and at rest (when stored).
- Connectivity can either be through a wired fiber connection or via cellular modem.
- Cameras and supporting hardware (router, modem, DVR. etc.) that is self-contained in an enclosure that allows easy movement from one location to another if need be.
- Software that manages camera and supporting hardware, allowing monitoring of device status, power consumption, etc.

2.4 Describe how the project or use of technology relates to the department's mission.

The mission of the Seattle Police Department is to prevent crime, enforce the law, and support quality public safety by delivering respectful, equitable, professional, and dependable police services. SPD's priorities include the use of best practices that include officer safety guidelines and performance-based accountability to provide progressive and responsive police services to crime victims, witnesses, and all members of the community, and to structure the organization to support the SPD mission and field a well-trained sworn and non-sworn workforce that uses technology, training, equipment, and research strategically and effectively.

CCTV camera systems contribute to averting harm to individuals and places and reduce crime by collecting evidence related to serious and/or violent criminal activity as part of investigations.

2.5 Who will be involved with the deployment and use of the project / technology?

Seattle IT and SPD will collaborate to plan, procure, and deploy the technology. Operational management will be handled by SPD's Real Time Crime Center (RTCC), and SPD will also provide ongoing management and administration of the system (including user account creation, inventory management, audit log access, etc.). Technical support for the CCTV camera systems will be handled by Seattle IT and vendor support contracts. Seattle's Office

of Inspector General (OIG) will be given access to the system at any time for auditing purposes. Other City departments or private contractors may be involved in installing the device dependent on permitting needs.

3.0 Use Governance

Provide an outline of any rules that will govern the use of the project/ technology. Please note: non-City entities contracting with the City are bound by restrictions specified in the surveillance ordinance and privacy principles and must provide written procedures for how the entity will comply with any restrictions identified.

3.1 Describe the processes that are required prior to each use, or access to/ of the project / technology, such as a notification, or check-in, check-out of equipment.

The system will have a set of access controls based on what is required for each user. Only authorized/trained SPD and OIG personnel will have direct access to the CCTV system.

Video may only be accessed or extracted for legitimate law enforcement purposes, as governed by SPD Policy 12.050.

SPD is developing an omnibus surveillance technology policy to provide general guidance on several topics, including value and equity statements for technology use, an explanation of the surveillance ordinance requirements, internal processes for technology approval and acquisition, general tracking metrics for surveillance technologies, retention requirements and limitations, and general use requirements for surveillance technologies. Additionally, issues and guidance unique to specific surveillance technologies would be included for each technology. As such, the department will create a policy section for each surveillance technology, including those proposed here. The need for ALPR, CCTV, and RTCC technologies and the strategic deployment of the SPD policies is driven by gun violence and persistent felony crime at specific locations. SPD's use of these technologies will focus on these crimes.

3.2 List the legal standards or conditions, if any, that must be met before the project / technology is used.

The CCTV cameras will be placed to capture events in plain view in public areas. The cameras will face toward the street, sidewalk, and other public areas and signs will be posted identifying their presence and use. Street fliers will also be distributed in the pilot area.

Since minors (children) are present in public spaces, SPD may record video with children present, however, because disclosure of images of any minor is presumed highly offensive, images of an identifiable minor are almost always exempt from public disclosure.

SPD is developing an omnibus surveillance technology policy to provide general guidance on several topics, including value and equity statements for technology use, an explanation of the surveillance ordinance requirements, internal processes for technology approval and acquisition, general tracking metrics for surveillance technologies, retention requirements and limitations, and general use requirements for surveillance technologies.

Additionally, issues and guidance unique to specific surveillance technologies would be included for each technology. As such, the department will create a policy section for each surveillance technology, including those proposed here. The need for ALPR, CCTV, and RTCC technologies and the strategic deployment of the SPD policies is driven by gun violence and persistent felony crime at specific locations. SPD's use of these technologies will focus on these crimes.

3.3 Describe the policies and training required of all personnel operating the project / technology, and who has access to ensure compliance with use and management policies.

Supervisors and commanding officers are responsible for ensuring compliance with policies.

CCTV camera systems will only be made accessible to authorized SPD, OPA, and OIG personnel. Authorized personnel will receive training in the CCTV video management system prior to authorization.

All SPD employees must adhere to laws, City policy, and Department Policy (<u>SPD Policy 5.001</u>), and any employees suspected of being in violation of laws or policy or other misconduct are subject to discipline, as outlined in <u>SPD Policy 5.002</u>.

4.0 Data Collection and Use

4.1 Provide details about what information is being collected from sources other than an individual, including other IT systems, systems of record, commercial data aggregators, publicly available data and/or other City departments.

Until data is extracted from the CCTV system's local storage, the data is temporarily stored on the device. Video may only be extracted for legitimate law enforcement purposes (such as a dispatched call for service or investigations of crimes), as governed by SPD Policy 12.050. Video recordings will be kept on the cameras for 30 days, and not retained for a longer duration unless manually extracted by authorized personnel via the video management system software. Private, 3rd party video, if used, will be subject to the 30-day retention on SPD storage, unless used as evidence for a criminal investigation.

<u>SPD Policy 7.010</u> governs the submission of evidence and requires that all collected evidence be documented in a General Offense (GO) Report. Evidence is submitted to the Evidence Unit and associated with a specific GO Number and investigation.

4.2 What measures are in place to minimize inadvertent or improper collection of data?

In order to minimize inadvertent collection of data, the CCTV cameras will only be placed to capture events in plain view in public areas.

CCTV video recordings are automatically purged by the system after 30 days unless the footage holds evidentiary value related to criminal activity or assists in the pursuit of a criminal investigation.

Additionally, the CCTV camera systems will maintain a complete audit log of activities (including but not limited to personnel access and video extraction logs) and would be subject to an audit by the Office of Inspector General at any time.

4.3 How and when will the project / technology be deployed or used? By whom? Who will determine when the project / technology is deployed and used?

The desired deployment date is late summer in 2024. This date is dependent on the completion of the SIR process, vendor selection, and installation needs.

In the pilot project, CCTV cameras will be temporarily placed at specific geographic locations to deter and detect criminal activity. Locations will be prioritized based on the concentration of gun violence, human trafficking, and persistent felony crimes. Depending on final RFP cost estimates, one or three geographic areas will be chosen for the pilot project. A preliminary assessment indicates these locations could be Aurora Avenue North in the North Precinct, downtown in areas along and adjacent to the Third Avenue corridor, and the Chinatown International District.

4.4 How often will the technology be in operation?

The technology will be in continuous operation for the duration of the pilot program. The possible initial pilot areas under consideration are Aurora Avenue North, Chinatown-International District, and the Downtown Commercial Core including parts of Belltown. The exact duration of the pilot will be evaluated under a *Continuous Impact Assessment*³ framework; however, time to prove an effect may vary depending the number of factors. Outside academic subject matter experts will be retained to design and manage an evaluation plan with an assessment at the end of one year and another at the end of year two.

4.5 What is the permanence of the installation? Is it installed permanently, or temporarily?

At a minimum, the installation of the CCTV systems will last for the duration of the pilot program. It may extend beyond that period if effective. The CCTV cameras may be moved if there is an emerging need in another area.

4.6 Is a physical object collecting data or images visible to the public? What are the markings to indicate that it is in use? What signage is used to determine department ownership and contact information?

The cameras themselves will be visible to the public, and signs will be placed to alert the public to their presence and use.

³ <u>"Test-As-You-Go" for Hot Spots Policing: Continuous Impact Assessment with Repeat Crossover Designs | Cambridge Journal of Evidence-Based Policing (springer.com)</u>

4.7 How will data that is collected be accessed and by whom?

Only authorized SPD, OPA and OIG users can access the CCTV camera feed or the data it captures. Access to the systems/technology is limited to authorized personnel via password-protected login credentials.

Data extracted from the system/technology and entered into investigative files is securely inputted and used on SPD's password-protected network with access limited to authorized detectives and identified supervisory personnel.

Access to video evidence is controlled by SPD Manual Title 12 provisions governing Department Information Systems including SPD Policy 12.040 - Department-Owned Computers, Devices & Software, SPD Policy 12.050 - Criminal Justice Information Systems, SPD Policy 12.080 - Department Records Access, Inspection & Dissemination, SPD Policy 12.110 - Use of Department E-mail & Internet Systems, and SPD Policy 12.111 - Use of Cloud Storage Services.

Personal or inappropriate use or dissemination of information being used for law enforcement purposes can result in internal discipline, termination, and penalties under federal or state law.

Data collected on 3rd party systems will be accessed by SPD personnel using the above guidelines, but will be owned by the 3rd party, unless taken into evidence. 3rd party streams that are recorded by SPD will be subject to Washington State public disclosure laws.

4.8 If operated or used by another entity on behalf of the City, provide details about access, and applicable protocols.

SPD's CCTV camera systems will not be used or operated by other law enforcement agencies. Video extracted/obtained as evidence may be shared with an outside agency, as described in SIR section 6.1. Vendors and external partners will not be able to view private criminal incident information unless it is being used for troubleshooting technical issues. Video shared with vendors for technical purposes will only be shared with permission from SPD.

4.9 What are acceptable reasons for access to the equipment and/or data collected?

Data will be accessed and used by police to provide precise data and information in real time to responding patrol and specialty units allowing them to make better decisions, reduce unnecessary work, and increase effectiveness, leading to better, more desired outcomes. Cameras may also be accessed to assist in active investigations. Data may only be viewed or extracted for legitimate law enforcement purposes (such as a dispatched call for service or investigations of crimes), as governed by SPD Policy 12.050. Recorded video will only be retained for 30 days unless manually extracted by authorized personnel via the video management system software and stored in SPD's secure digital evidence lockers. Other City of Seattle departments may access cameras as defined by their internal policies.

4.10 What safeguards are in place, for protecting data from unauthorized access (encryption, access control mechanisms, etc.) And to provide an audit trail (viewer logging, modification logging, etc.)?

Storage of CCTV video will take place within secure City of Seattle facilities under the administration of the Information Technology Department. If cloud storage is utilized, it will follow city security guidelines and will only be accessible to outside parties as part of system maintenance and support only when authorized.

Various measures will be in place to protect data from unauthorized access.

- Data Encryption
- Access control mechanisms (meeting CJIS requirements*)
- Strict user permission settings
- Industry standard network security measures (meeting CJIS requirements)

The system will maintain audit logs of user and system actions. These logs will be maintained within the system and be accessible to those with permission to view. Logs will be accessible to the Office of Inspector General upon request.

* Criminal Justice Information Services (CJIS) Division of the Federal Bureau of Investigation (FBI) sets requirements for organizations that access or use criminal justice information. These requirements are referred to as "CJIS requirements" and are developed and audited for compliance by the FBI.

5.0 Data Storage, Retention and Deletion

5.1 How will data be securely stored?

The data will be encrypted at rest (where it is stored) and in transit (either through vendor encryption or through VPN on the City network side) as it's being transmitted from the camera device to the storage system, server, or cloud. The storage configuration may vary from vendor to vendor, but SPD expects similar industry standards when it comes to cloud storage and access controls.

5.2 How will the owner allow for departmental and other entities, to audit for compliance with legal deletion requirements?

Per the Washington Secretary of State's Law Enforcement Records Retention Schedule, the required records retention period for surveillance video that does not involve a specific incident is "Retain for 30 days after last recording or until determined that no security incident has occurred, whichever is sooner, then Destroy." Data associated with criminal investigations will be saved as evidence in SPD's digital evidence locker consistent with retention guidelines for evidence.

Audits from the Office of Inspector General or other official auditors, will be allowed as needed.

5.3 What measures will be used to destroy improperly collected data?

As noted in section 5.2 above, CCTV data stored by the city will be automatically purged by the system after 30 days for any data that is not determined to be related to criminal activity/investigation. Data collected from a private security system will only be stored by the City for 30 days unless it contains evidence of criminal behavior

<u>SPD Policy 7.010</u> governs the submission of evidence and requires that all collected evidence be documented in a General Offense Report. Evidence is submitted to the Evidence Unit and associated with a specific GO Number and investigation.

All information must be gathered and recorded in a manner that is consistent with <u>SPD Policy 6.060</u>, such that it does not reasonably infringe upon "individual rights, liberties, and freedoms secured by the Constitution of the United States and of the State of Washington, including, among others, the freedom of speech, press, association and assembly; liberty of conscience; the exercise of religion; and the right to petition government for redress of grievances; or violate an individual's right to privacy."

All SPD employees must adhere to laws, City policy, and Department Policy (<u>SPD Policy 5.001</u>), and any employees suspected of being in violation of laws or policy or other misconduct are subject to discipline, as outlined in <u>SPD Policy 5.002</u>.

5.4 which specific departmental unit or individual is responsible for ensuring compliance with data retention requirements?

Unit supervisors are responsible for ensuring compliance with data retention requirements within SPD.

Additionally, any appropriate auditor, including the Office of Inspector General can audit for compliance at any time.

6.0 Data Sharing and Accuracy

6.1 Which entity or entities inside and external to the City will be data sharing partners?

Data obtained from the technology may be shared outside SPD with the other agencies, entities, or individuals within legal guidelines or as required by law.

Data may be shared with outside entities in connection with criminal prosecutions:

- Seattle City Attorney's Office
- King County Prosecuting Attorney's Office
- King County Department of Public Defense
- Private Defense Attorneys
- Seattle Municipal Court
- King County Superior Court
- Similar entities where prosecution is in Federal or other State jurisdictions

Data may be made available to requesters pursuant to the Washington Public Records Act, Chapter 42.56 RCW ("PRA"). SPD will apply applicable exemptions to the data before disclosing it to a requester. Individuals have the right to inspect criminal history record information maintained by the department (RCW 10.97.030, SPD Policy 12.050). Individuals can access their own information by submitting a public disclosure request.

Per <u>SPD Policy 12.080</u>, the Crime Records Unit is responsible for receiving, recording, and responding to requests "for General Offense Reports from other City departments and from other law enforcement agencies, as well as from insurance companies."

Discrete pieces of data collected by CCTV cameras may be shared with other law enforcement agencies in wanted bulletins, in connection with law enforcement investigations jointly conducted with those agencies, or in response to requests from law enforcement agencies investigating criminal activity as governed by SPD Policy 12.050 and 12.110. All requests for data from Federal Immigration and Customs Enforcement (ICE) authorities are referred to the Mayor's Office Legal Counsel in accordance with the Mayoral Directive, dated February 6, 2018.

SPD shares data with authorized researchers pursuant to properly executed research and confidentiality agreements as provided by <u>SPD Policy 12.055</u>. This sharing may include discrete pieces of data related to specific investigative files collected by the devices.

6.2 Why is data sharing necessary?

Data sharing is necessary for SPD to fulfill its mission of contributing to crime reduction by assisting in collecting evidence related to serious and/or violent criminal activity as part of investigations, and to comply with legal requirements.

6.3 Are there any restrictions on non-City data use?

Yes ⊠ No □

6.3.1 If you answered yes, provide a copy of the department's procedures and policies for ensuring compliance with these restrictions.

Law enforcement agencies receiving criminal history information are subject to the requirements of <u>CFR Title 28</u>, <u>Part 20</u>, regulating criminal justice information systems. In addition, Washington State law enforcement agencies are subject to the provisions of <u>WAC 446-20-260</u> (auditing and dissemination of criminal history record information systems), and RCW Chapter 10.97 (Washington State Criminal Records Privacy Act).

Once disclosed in response to PRA request, there are no restrictions on non-City data use; however, applicable exemptions will be applied prior to disclosure to any requestor who is not authorized to receive exempt content.

6.4 How does the project/technology review and approve information sharing agreements, memorandums of understanding, new uses of the information, new access to the system by organizations within City of Seattle and outside agencies?

Sharing agreements must meet the standards reflected in <u>SPD Policy 12.055</u>. Law enforcement agencies receiving criminal history information are subject to the requirements of <u>CFR Title 28</u>, <u>Part 20</u>. In addition, Washington State law enforcement agencies are subject to the provisions of <u>WAC 446-20-260</u>, and <u>RCW Chapter 10.97</u>.

Following Council approval of this SIR, SPD must seek Council approval for any material change to the purpose or manner in which the CCTV cameras may be used.

6.5 Explain how the project/technology checks the accuracy of the information collected. If accuracy is not checked, please explain why.

CCTV cameras capture and record video of what is occurring within the range of the cameras. The devices do not check for accuracy.

In regard to overall outcomes, the goals of this project are:

- 1. Reduction in gun violence, human trafficking, and other persistent felony crimes in the pilot area.
- 2. Reduction in 911 calls in the pilot area.
- 3. To minimize crime displacement outside of the pilot area.
- 4. Improved police response times, crime clearance rates, and community satisfaction measures.

SPD will also report the rate of arrests and prosecutions that occur as a result of the pilot and any negative unintended consequences, such as over or under policing.

This pilot will be data-informed and guided. It will terminate if data suggests the technology is ineffective. Utilizing the abilities of the Performance Analytics and Research Unit, the Seattle Police Department has a plan to actively manage performance measures reflecting the "total cost of ownership of public safety," Equity, Accountability, and Quality ("EAQ"), which includes measures of disparate impact and over-policing. In addition to a robust Continuous Intervention Assessment designed to inform, in real-time, the active development of a safer, more effective, Evidence-Based Policing (EBP) competency, the EAQ program assures just right policing is achieved with undue collateral harm.

6.6 Describe any procedures that allow individuals to access their information and correct inaccurate or erroneous information.

Individuals may request records pursuant to the PRA, and individuals have the right to inspect criminal history record information maintained by the department (<u>RCW 10.97.030</u>, <u>SPD Policy 12.050</u>). Individuals can access their own information by submitting a public disclosure request.

7.0 Legal Obligations, Risks and Compliance

7.1 What specific legal authorities and/or agreements permit and define the collection of information by the project/technology?

When reasonable suspicion of criminal activity exists, the CCTV cameras will be placed to capture events in plain view in public areas.

7.2 Describe what privacy training is provided to users either generally or specifically relevant to the project/technology.

<u>SPD Policy 12.050</u> mandates that all SPD employees receive Security Awareness Training (Level 2), and all employees also receive City Privacy Training.

7.3 Given the specific data elements collected, describe the privacy risks identified and for each risk, explain how it was mitigated. Specific risks may be inherent in the sources or methods of collection, or the quality or quantity of information included.

Privacy risks revolve around improper collection of images of members of the general public. As it relates to CCTV recording, all CCTV cameras will face toward the street, sidewalk, and other public areas. Signs acknowledging the use of the cameras will be posted and street fliers will be distributed.

SMC 14.12 and SPD Policy 6.060 directs all SPD personnel that any documentation of information concerning a person's sexual preferences or practices, or their political or religious activities must be for a relevant reason and serve a legitimate law enforcement purpose. The purpose of policy 6.060 is "to ensure that the collection and review of such information serves a legitimate law enforcement purpose and does not unreasonably infringe upon individual rights, liberties, and freedoms secured by the Constitution of the United States and of the State of Washington, including, among others, the freedom of speech, press, association and assembly; liberty of conscience; the exercise of religion; and the right to petition government for redress of grievances; or violate an individual's right to privacy." SPD only documents sexual preferences or practices, political or religious activities if it is related to unlawful act, for example, a child pornography investigation.

Additionally, <u>SPD Policy 5.140</u> forbids bias-based policing and outlines processes for reporting and documenting any suspected bias-based behavior, as well as accountability measures. The policy states that "employees shall not make decisions or take actions that are influenced by bias, prejudice, or discriminatory intent. Law enforcement and investigative decisions must be based upon observable behavior or specific intelligence," as well as outlining specifics related to this area.

Finally, see 5.3 for a detailed discussion about procedures related to noncompliance.

7.4 Is there any aspect of the project/technology that might cause concern by giving the appearance to the public of privacy intrusion or misuse of personal information?

Inherent in video obtained through CCTV cameras is the risk that private information may be obtained about members of the public without their knowledge. This risk and those privacy risks outlined in section 7.3 above are mitigated by legal requirements and auditing processes that allow for the Office of Inspector General to inspect the use and deployment of CCTV cameras.

8.0 Monitoring and Enforcement

8.1 Describe how the project/technology maintains a record of any disclosures outside of the department.

Sharing of recorded video is primarily done through SPD's digital evidence management system. Records of when data was shared and who it is shared with is noted in the system audit logs. Digital evidence shared outside of the digital evidence management system (e.g., using media such as DVDs, thumb drives, etc. is done though SPD's Digital Forensic Unit, which logs requests.

Per <u>SPD Policy 12.080</u>, the Crime Records Unit is responsible to receive and record all requests "for General Offense Reports from other City departments and from other law enforcement agencies, as well as from insurance companies."

Any requests for public disclosure are logged by SPD's Public Disclosure Unit. Any action taken, and data released subsequently, is then tracked through the request log. Responses to Public Disclosure Requests, including responsive records provided to a requestor, are retained by SPD for two years after the request is completed.

8.2 What auditing measures are in place to safeguard the information, and policies that pertain to them, as well as who has access to the audit data? Explain whether the project/technology conducts self-audits, third party audits or reviews.

OIG conducts independent audits of SPD as instructed by the City Council and by City ordinance.

Financial Information

Purpose

This section provides a description of the fiscal impact of the surveillance technology, as required by the surveillance ordinance.

1.0 Fiscal Impact

Provide a description of the fiscal impact of the project/technology by answering the questions below.

1.1 Current or potential sources of funding: initial acquisition costs.

Current \square potential \boxtimes

carrent = potential =					
Date of initial acquisition	Date of go live	Direct initial acquisition cost	Professional services for acquisition	Other acquisition costs	Initial acquisition funding source
Q3 2024	Q4 2024	\$600,000	\$200,000	\$300,000	General Fund

Notes:

SPD's 2024 budget includes \$1.5 million for use of acquiring CCTV technologies. At the time of writing, the procurement process has not yet been started, so the costs above are estimates. The specific geographic deployment of CCTV will depend on costs; for example, it may not be possible to deploy CCTV in all of the areas that have been preliminarily identified for deployment.

1.2 Current or potential sources of funding: on-going operating costs, including maintenance, licensing, personnel, legal/compliance use auditing, data retention and security costs.

Current \square potential \boxtimes

Annual maintenance and licensing	Legal/compliance, audit, data retention and other security costs	Department overhead	IT overhead	Annual funding source
TBD	TBD	TBD	TBD	General Fund

Notes:

At the time of writing, the planning process has not yet been completed.

1.3 Cost savings potential through use of the technology

The use of CCTV may help mitigate SPD's shortage of sworn staffing by more effectively deploying patrol resources to incidents and follow-up investigations. However, use of the CCTV and the other related technologies being assessed does not necessarily correlate to direct cost savings.

1.4 Current or potential sources of funding including subsidies or free products offered by vendors or governmental entities.

No funding beyond city General Fund dollars have been identified for this technology.

Expertise and References

Purpose

The following information is provided to ensure that Council has a group of experts to reference while reviewing the completed surveillance impact report ("SIR"). Any individuals or agencies referenced must be made aware ahead of publication that their information has been included. All materials must be available for Council to access or review, without requiring additional purchase or contract.

1.0 Other Government References

Please list any other government bodies that have implemented this technology and can speak to the implementation of this technology.

Agency, municipality, etc.	Primary contact	Description of current use
Atlanta		Currently in use
Baltimore		Currently in use
Berkeley		Currently in use
Chicago		Currently in use
Los Angeles		Currently in use
New York		Currently in use
Philadelphia		Currently in use
Phoenix		Currently in use
Portland		Currently in use
San Diego		Currently in use
San Francisco		Currently in use

2.0 Academics, Consultants, and Other Experts

Please list any experts in the technology under consideration, or in the technical completion of the service or function the technology is responsible for.

Agency, municipality, etc.	Primary contact	Description of current use

3.0 White Papers or Other Documents

Please list any publication, report or guide that is relevant to the use of this technology or this type of technology.

The effect of public surveillance cameras on crime clearance rates	SocArXiv Papers	https://osf.io/preprints/socarxiv/eh5bg

Racial Equity Toolkit ("RET") and engagement for public comment worksheet

Purpose

Departments submitting a SIR are required to complete an adapted version of the Racial Equity Toolkit ("RET") in order to:

- Provide a framework for the mindful completion of the SIR in a way that is sensitive to the historic exclusion of vulnerable and historically underrepresented communities.
 Particularly, to inform the public engagement efforts departments will complete as part of the surveillance impact report.
- Highlight and mitigate any impacts on racial equity from the adoption and the use of the technology.
- Highlight and mitigate any disparate impacts on individuals or vulnerable communities.
- Fulfill the public engagement requirements of the surveillance impact report.

In addition to completing the RET template sections below, the 2024 Council Budget Action SPD-900-A requested that the Executive, the Office for Civil Rights (OCR) and the Inspector General for Public Safety (OIG) co-prepare a Racial Equity Toolkit (RET) analysis for these technologies, pursuant to the process that the Executive has already created to comply with the Surveillance Ordinance. Please see Appendix B: Office for Civil Rights RET Analysis.

Adaptation of the RET for Surveillance Impact Reports

The RET was adapted for the specific use by the Seattle Information Technology Departments' ("Seattle IT") Privacy Team, the Office of Civil Rights ("OCR"), and Change Team members from Seattle IT, Seattle City Light, Seattle Fire Department, Seattle Police Department, and Seattle Department of Transportation.

Racial Equity Toolkit Overview

The vision of the Seattle Race and Social Justice Initiative ("RSJI") is to eliminate racial inequity in the community. To do this requires ending individual racism, institutional racism and structural racism. The RET lays out a process and a set of questions to guide the development, implementation and evaluation of policies, initiatives, programs, and budget issues to address the impacts on racial equity.

1.0 Set Outcomes

1.1. Seattle City Council has defin	ned the following inclusion criteria in the surveillance
ordinance, and they serve as imp	ortant touchstones for the risks departments are being
asked to resolve and/or mitigate.	. Which of the following inclusion criteria apply to this
technology?	
☐ The technology disparately imp	pacts disadvantaged groups.

\square There is a high likelihood that personally identifiable information will be shared with non-City
entities that will use the data for a purpose other than providing the City with a contractually
agreed-upon service.

☑ The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

☑ The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

1.2 What are the potential impacts on civil liberties through the implementation of this technology? How is the department mitigating these risks?

Gun violence, human trafficking, and other persistent felony crimes are concentrated at specific geographic places in the city. This concentrated crime is often anchored at these places and requires a holistic crime-prevention strategy.

The Crime Prevention Technology pilot is one integrated component to this overall strategy of addressing this issue. These technologies will be coupled with police patrols, continued investments in community-based initiatives, enhanced lighting, and enhanced cleaning.

The technology will be used for the following purposes:

- Closed-Circuit (CCTV) camera systems will assist investigators in collecting evidence related to serious and violent crimes, including homicides, assaults, and other offenses. The CCTV system can aid investigators in identifying suspects, clearing the innocent, and removing deadly weapons from the street, thereby reducing the risk of harm to the public. It will also be used in real-time to assist coordination and deployment of patrol and specialty unit resources. For example, camera feeds in the Real-Time Crime Center can be used to assess the severity of incidents and either increase or decrease the resources dispatched to the scene accordingly.
- Real-Time Crime Center (RTCC) software helps provide situational awareness to increase officers' and the public's safety and reactively investigate incidents. Having real-time, accurate information in one place helps increase the reliability of the location of victims and suspects, enabling quicker aid and safer apprehension. Having better visual and spatial suspect information will help reduce unnecessary stops by officers, focusing their efforts on verified locations and accurate descriptions.

Potential impacts on civil liberties include but are not limited to:

- Privacy concerns associated with surveillance of people, vehicles, and license plates in public places.
- Misuse of collected video and information/mission creep.
- Lack of transparency with the public on what is being done with recordings.
- Loss of personal autonomy with surveillance of an area.

To mitigate these potential community concerns, SPD will:

- Post signs indicating that police surveillance and video recordings are occurring.
- Ensure technology is being used for crimes related to gun violence, human trafficking, and other persistent crimes in the surveillance area.
- SPD will create a public-facing dashboard that will update frequently and report on the uses of the technologies, including areas where cameras are recording, and the resulting number of police actions, such as arrests, court-authorized warrants, recovery of stolen vehicles, or other law enforcement actions.
- CCTV technology will only monitor public places, such as sidewalks, streets, and parks.
- Recorded material will only be kept for 30 days unless it is evidence of criminal behavior, in which case it will be transferred to SPD's secure digital evidence storage system.
- Provide access to CCTV, ALPR, and SPD's Real Time Crime Center (RTCC) user and device logs to the Office of Inspector General (OIG) for compliance audits.
- Limit access to essential SPD personnel and accountability partners.
- The Office of the Inspector General will have full access to the RTCC operation.

Additionally, the technologies will only be implemented once the City's surveillance ordinance requirements are met and the City Council authorizes the use.

1.3 What are the risks for racial or ethnicity-based bias through each use or deployment of this technology? How is the department mitigating these risks?

Include a description of any issues that may arise such as algorithmic bias or the possibility for ethnic bias to emerge in people and/or system decision-making.

The mission of the Seattle Police Department is to prevent crime, enforce the law, and support quality public safety by delivering respectful, professional, and dependable police services. SPD Policy 5.140 forbids bias-based policing and outlines processes for reporting and documenting any suspected bias-based behavior and other accountability measures. This pilot will be data-informed and guided. It will terminate if data suggests the technology is ineffective. Utilizing the abilities of the Performance Analytics and Research Unit, the Seattle Police Department has a plan to actively manage performance measures reflecting the "total cost of ownership of public safety," Equity, Accountability, and Quality ("EAQ"), which includes measures of disparate impact and over policing. In addition to a robust Continuous Intervention Assessment designed to inform, in real-time, the active development of a safer and more effective, Evidence-Based Policing (EBP) competency, the EAQ program assures just right policing is achieved with undue collateral harm.

It's worth noting that many factors can contribute to disparate impacts in policing, most of which occur early in a person's life, long before there is engagement with the police. For example, systems and policies that perpetuate poverty, the failure to provide children with the strong and fair start they deserve in the crucial birth-to-five years, inadequate public education, and a lack of economic opportunity can all contribute to disparate outcomes. In

addition, family dynamics and peer pressure can also create negative outcomes. We recognize these factors and strive to do our part to mitigate them, but we can't expect our police officers by themselves to cure these contributory factors. However, we do expect our officers to do their jobs respectfully and fairly as they interact with community members.

These technologies are location-specific, with a place-based focus, meaning they will record people who choose to be in a public place where the technologies are being used. This mitigating factor reduces, to an extent, the possible disparate impact of potential police actions.

1.4 Where in the City is the technology used or deployed?

The following neighborhoods are being considered for deploying the CCTV technologies. Specific areas will be selected based on the data analysis indicating where gun violence, human trafficking, and persistent felony crimes are concentrated.

\square all Seattle neighborhoods	
☑ Aurora Ave N 85th to 145th	\square Northwest
□ Ballard	☐ Madison Park / Madison Valley
☑ Belltown	☐ Magnolia
☐ Beacon Hill	\square Rainier Beach
☐ Capitol Hill	☐ Ravenna / Laurelhurst
☐ Central District	\square South Lake Union / Eastlake
Chinatown/International District	☐ Southeast
☐ Columbia City	\square Southwest
☑ Downtown Commercial Core	☐ South Park
☐ Delridge	\square Wallingford / Fremont
☐ First Hill	☐ West Seattle
☐ Georgetown	☐ King county (outside Seattle) (Mutual
☐ Greenwood / Phinney	Aid)
☐ International District	☐ Outside King County (Mutual Aid)
☐ Interbay	
☐ North	
\square Northeast	

If possible, please include any maps or visualizations of historical deployments / use.

Downtown & Belltown Area

Chinatown-International District Area

Aurora Avenue North Corridor (Aurora Ave, 95th to 130th Streets)

1.4.1 What are the racial demographics of those living in this area or impacted by these issues?

Race/Ethnicity	Aurora	Chinatown	Belltown	Downtown	Citywide
,		International District		Commercial	•
American Indian or Alaska Native	0.8%	0.7%	0.6%	1.1%	0.4%
Asian	14.0%	49.2%	30.4%	16.8%	16.9%
Black/African American	8.9%	8.6%	5.5%	11.1%	6.8%
Hispanic or Latino of Any Race	11.3%	7.6%	7.1%	8.3%	8.2%
Native Hawaiian or Pacific Islander	0.3%	0.2%	0.2%	0.3%	0.3%
Other	0.7%	0.7%	0.6%	0.7%	0.6%
Multiple Races	7.9%	5.8%	4.9%	5.6%	7.3%
White	56.2%	27.2%	50.8%	56.1%	59.5%

Source: U.S. Census Bureau Decennial Census; OPCD

Note: Geographical areas provided are <u>2020 Census Block Assignments of Urban Villages</u> within the Downtown Urban Center, with the exception of Aurora. Aurora's boundaries are based on ½ mile buffer from Aurora between Meridian and Greenwood, and from 85th to 145th.

1.4.2 How does the Department to ensure diverse neighborhoods, communities, or individuals are not specifically targeted through the use or deployment of this technology?

CCTV will be deployed where crimes related to gun violence, human trafficking, and other persistent felony crimes are concentrated. <u>SPD Policy 5.140</u> forbids bias-based policing and outlines processes for reporting and documenting any suspected bias-based behavior, as well as other accountability measures. This technology does not enhance the risks of racial or ethnicity-based bias.

These technologies are geographically focused on specific areas where gun violence, human trafficking, and other persistent felony crimes are concentrated. They are focused on individuals only if they are present in these areas.

1.5 How do decisions around data sharing have the potential for disparate impact on historically targeted communities? What is the department doing to mitigate those risks?

Data from the technology may be shared outside SPD with other agencies, entities, or individuals within legal guidelines or as required by law. Data may be shared with outside entities in connection with criminal prosecutions.

Data may be made available to requesters under the Washington Public Records Act, Chapter 42.56 RCW ("PRA").

Data sharing has the potential to be a contributing factor to disparate impact on historically marginalized communities. To mitigate this possibility, SPD has established policies regarding disseminating data related to criminal prosecutions, Washington Public Records Act (Chapter 42.56 RCW), and authorized researchers. Further, SPD Policy 5.140 forbids bias-based policing and outlines processes for reporting and documenting any suspected bias-based behavior.

1.6 How do decisions around data storage and retention have the potential for disparate impact on historically targeted communities? What is the department doing to mitigate those risks?

As with decisions around data sharing, data storage and data retention have similar potential for disparate impact on historically marginalized communities. CCTV will be deployed where crimes related to gun violence, human trafficking, and other persistent felony crimes are concentrated. Video from CCTVs will be stored for 30 days unless imagery is needed for investigations or to comply with legal requirements. Further, SPD Policy 5.140 forbids biasbased policing and outlines processes for reporting and documenting any suspected biasbased behavior, and other accountability measures.

1.7 What are potential unintended consequences (both negative and positive potential impact)? What proactive steps can you can / have you taken to ensure these consequences do not occur.

The most important unintended possible negative consequence related to the implementation of CCTVs and RTCC is the possibility that the civil rights of individuals may be compromised by unreasonable surveillance. To mitigate this risk, SPD is enacting a specific policy codifying the allowable circumstances under which SPD may utilize CCTVs and Real-Time Crime Center software. Access to user and device logs will be given to the OIG so they can audit the use of these technologies.

To prevent unintended outcomes, the City will develop signage in areas that are covered by the cameras' view to alert the public to their presence and use. Additionally, the Office of the Inspector General will have access at any time to monitor and evaluate the use of these technologies. During the public outreach sessions described below, the City will listen to feedback from the public and provide responses during the technology review process.

The potential positive impact will be reduced serious crime concentrated in the locations where the technologies are deployed. If achieved, these reductions will create a safer environment for everyone who lives, works, plays, or visits these areas.

SPD is developing an omnibus surveillance technology policy to provide general guidance on several topics, including value and equity statements for technology use, an explanation of the surveillance ordinance requirements, internal processes for technology approval and

acquisition, general tracking metrics for surveillance technologies, retention requirements and limitations, and general use requirements for surveillance technologies.

2.0 Public Outreach

2.1 Organizations who received a personal invitation to participate.

Please include a list of all organizations specifically invited to provide feedback on this technology.

A 4 Apple Learning Center, ACLU, Alliance for Pioneer Square, Amazon, Asian Counseling and Referral Services, Ballard BIA, Beacon Business Alliance, Belltown Community Council, Broadview/Bitter Lake CC, Build Lake City Together/Akin, Chief Seattle Club, Chinese Information Service Center, CID BIA, Crown Hill, Downtown Seattle Association, Dunn Lumber, Duwamish Valley Youth Corps, Epic Life Church, Ethiopian Community in Seattle, Ewing & Clark, For North Seattle, Friends of Little Saigon, Friends of Waterfront, Green Lake Community Center, Greenwood Community Center, Haller Lake Community Club, Home Depot Aurora, Korean Community Service Center, Licton Springs CC, Lowe's Aurora, Magnolia Chamber of Commerce, Matt Talbot Center, NAACP, North PCT Advisory Comm, Black Coffee NW, Phinney Neighborhood Association, Pike Place Market PDA, Pioneer Square Alliance, Jackson Place Community Council and Central Area Neighborhood District Council, PSQ Residence Council, Public Safety Council Chair, Queen Anne Block Watch Network, Queen Anne Community Council, Seattle Association, Seattle Chamber of Commerce, Seattle Chinatown-International District Preservation and Development Authority, Seattle Public Schools, Seniors in Action President, SoDo BIA, South Lake Union Chamber of Commerce, SPD African-American Council, Tecta America, U District BIA, Uptown Alliance, Urban Renaissance Group, Visit Seattle, VOCAL- WA, We R Seattle, WPAC, Yelser Terrace Community Council, and GSBA.

The Department of Neighborhoods, Human Services Department, and Office for Civil Rights were also asked to share with their community outreach list.

2.1 Scheduled public meeting(s).

Meeting notes, sign-in sheets, all comments received, and questions from the public included in Appendix C, D, E, F, and G.

Location	Webex virtual meeting and in person option at the Bertha Knight Landes Room located on Floor 1 of City Hall (600 Fourth Avenue, Seattle, WA 98104)	
Time	February 12, 2024, 12:00 pm	

Location	Webex virtual meeting and in person option at a Community Center (details will be posted online shortly).	
Time	February 27, 2024, 6:00 pm	

Additionally, the City convened 15 neighborhood-specific organizations meetings to discuss the technology and receive feedback and questions. See the list of organizations below:

SPD's North, South, East, and West Precinct Advisory Councils

- NAACP
- Seattle Chamber of Commerce
- Greater Seattle Business Association (GSBA)
- Community Police Commission (CPC)
- African American Community Advisory Council
- East African Advisory Council
- Filipino Community of Seattle
- Emerald City Bible Fellowship Church
- Downtown public hearing
- Bitter Lake public hearing
- CID Community Safety Council (Including Friends of Little Saigon, CIDBIA, Seniors in Action etc.)
- For North Seattle
- ACLU
- Businesses along Aurora Ave North

3.0 Public Comment Analysis

This section will be completed after the public comment period has been completed on April 12, 2024.

3.1 Summary of Response Volume

Total responses to the public form (https://forms.office.com/g/y7jRUZSRNm): 1152

Question	Responses
1) What concerns, if any, do you have about the use of this technology?	1107
2) Do you have any additional concerns about the use of technology (in case you ran out of space in section one)	378
3) What value, if any, do you see in the use of this technology?	938
4) Do you have additional comments/questions re what value do you see in this technology?	311
5) What would you want City leadership to consider when making a decision about the use of this technology?	944
6) Do you have additional comments/considerations that leadership should take into account when making a decision about this technology?	328

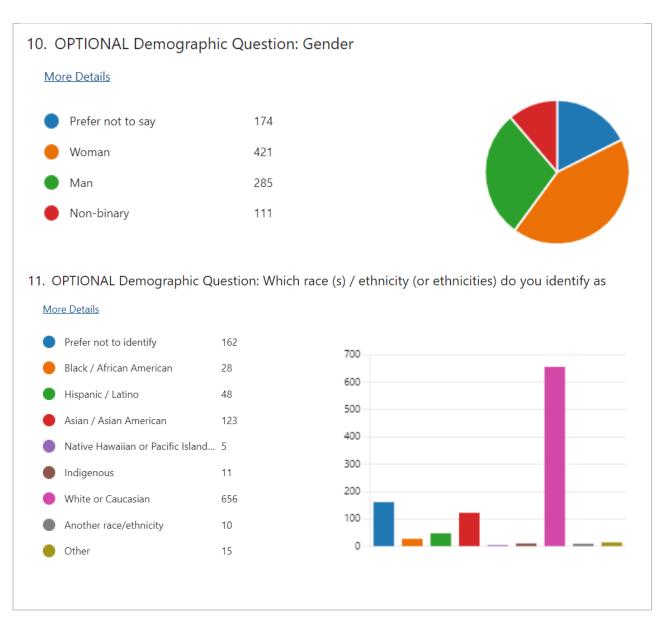

7) Do you have any additiona	al comments or questions?	243
8. OPTIONAL Demographic	c Question: Age Range	
Prefer not to identify	99	
Under 1818 - 44	1 643	
45 - 6465+	182 109	

9. OPTIONAL Demographic Question: Neighborhood More Details Prefer not to identify 118 Aurora Ave N 85th to 145th 35 Ballard 59 Belltown 12 Beacon Hill 47 Capitol Hill 101 Central District 76 Chinatown/International District 40 Columbia City 36 Delridge Downtown Commercial Core 9 First Hill 120 Georgetown 2 Greenwood / Phinney 100 International District 11 80 Interbay 60 North 38 40 Northeast Madison Park/ Madison Valley 17 Magnolia Queen Anne 23 Rainier Beach 20 Ravenna / Laurelhurst 32 South Lake Union Southeast 14 Southwest South Park Uptown 11 Wallingford / Fremont 42 West Seattle King County 55 Outside King County

3.2 Question One: What concerns, if any, do you have about the use of this technology?

Please see Appendix E.

3.3 Question Two: What value, if any, do you see in the use of this technology?

Please see Appendix E.

3.4 Question Three: What would you want City leadership to consider when making a decision about the use of this technology?

Please see Appendix E.

3.5 Question Four: General response to the technology.

Please see Appendix E.

3.5 General Surveillance Comments

These are comments received that are not particular to any technology currently under review.

Please see Appendix E.

4.0 Response to Public Comments

This section will be completed after the public comment period has been completed on April 12, 2024.

4.1 How will you address the concerns that have been identified by the public?

Concerns that have been raised through public comment and engagement will be addressed in SPD policy. SPD is developing an omnibus surveillance technology policy to provide general guidance on several topics, including value and equity statements for technology use, an explanation of the surveillance ordinance requirements, internal processes for technology approval and acquisition, general tracking metrics for surveillance technologies, retention requirements and limitations, and general use requirements for surveillance technologies. Additionally, issues and guidance unique to specific surveillance technologies would be included for each technology. As such, the department will create a policy section for CCTV.

5.0 Equity Annual Reporting

5.1 What metrics for this technology be reported to the CTO for the annual equity assessments?

The goals of this project are:

- 1. Reduction in gun violence, human trafficking, and other persistent felony crimes in the pilot area.
- 2. Reduction in 911 calls in the pilot area.
- 3. To minimize crime displacement outside of the pilot area.
- 4. Improved police response times, crime clearance rates, and community satisfaction measures.

We will also report the rate of arrests and prosecutions that occur as a result of the pilot and any negative unintended consequences, such as over or under policing.

The Seattle Police Department, utilizing the Data Analytics Team and working with the Office of the City Auditor, will monitor these objectives and the outcomes closely to watch for disparate impacts. If data analysis shows any disparate impacts, SPD will work with the Auditor and the Office of the Inspector General to make the needed changes to address

these impacts. Further, the City will retain outside academic subject matter experts to develop and manage an evaluation plan related to the use of the technologies.

Privacy and Civil Liberties Assessment

Purpose

This section shall be completed after public engagement has concluded and the department has completed the racial equity toolkit section above. The privacy and civil liberties assessment is completed by the community surveillance working group ("working group"), per the surveillance ordinance which states that the working group shall:

"Provide to the executive and the City Council a privacy and civil liberties impact assessment for each SIR that must be included with any departmental request for surveillance technology acquisition or in-use approval. The impact assessment shall include a description of the potential impact of the surveillance technology on civil rights and liberties and potential disparate impacts on communities of color and other marginalized communities. The CTO shall share with the working group a copy of the SIR that shall also be posted during the period of public engagement. At the conclusion of the public engagement period, the CTO shall share the final proposed SIR with the working group at least six weeks prior to submittal of the SIR to Council for approval. The working group shall provide its impact assessment in writing to the executive and the City Council for inclusion in the SIR within six weeks of receiving the final proposed SIR. If the working group does not provide the impact assessment before such time, the working group must ask for a two-week extension of time to City Council in writing. If the working group fails to submit an impact statement within eight weeks of receiving the SIR, the department and City Council may proceed with ordinance approval without the impact statement."

V	Working Group Privacy and Civil Liberties Assessment

Submitting Department Response

Description

Provide the high-level description of the technology, including whether software or hardware, who uses it and where/when.

Purpose

State the reasons for the use cases for this technology; how it helps meet the departmental mission; benefits to personnel and the public; under what ordinance or law it is used/mandated or required; risks to mission or public if this technology were not available.

Benefits to the Public

Provide technology benefit information, including those that affect departmental personnel, members of the public and the City in general.

Privacy and Civil Liberties Considerations

Provide an overview of the privacy and civil liberties concerns that have been raised over the use or potential mis-use of the technology; include real and perceived concerns.

Summary

Provide summary of reasons for technology use; benefits; and privacy considerations and how we are incorporating those concerns into our operational plans.

Appendix A: Glossary

Accountable: (taken from the racial equity toolkit.) Responsive to the needs and concerns of those most impacted by the issues you are working on, particularly to communities of color and those historically underrepresented in the civic process.

Community outcomes: (taken from the racial equity toolkit.) The specific result you are seeking to achieve that advances racial equity.

Contracting equity: (taken from the racial equity toolkit.) Efforts to achieve equitable racial outcomes in the way the City spends resources, including goods and services, consultants and contracting.

DON: "department of neighborhoods."

Immigrant and refugee access to services: (taken from the racial equity toolkit.) Government services and resources are easily available and understandable to all Seattle residents, including non-native English speakers. Full and active participation of immigrant and refugee communities exists in Seattle's civic, economic and cultural life.

Inclusive outreach and public engagement: (taken from the racial equity toolkit.) Processes inclusive of people of diverse races, cultures, gender identities, sexual orientations and socio-economic status. Access to information, resources and civic processes so community members can effectively engage in the design and delivery of public services.

Individual racism: (taken from the racial equity toolkit.) Pre-judgment, bias, stereotypes about an individual or group based on race. The impacts of racism on individuals including white people internalizing privilege, and people of color internalizing oppression.

Institutional racism: (taken from the racial equity toolkit.) Organizational programs, policies or procedures that work to the benefit of white people and to the detriment of people of color, usually unintentionally or inadvertently.

OCR: "Office for Civil Rights."

Opportunity areas: (taken from the racial equity toolkit.) One of seven issue areas the City of Seattle is working on in partnership with the community to eliminate racial disparities and create racial equity. They include: education, health, community development, criminal justice, jobs, housing, and the environment.

Racial equity: (taken from the racial equity toolkit.) When social, economic and political opportunities are not predicted based upon a person's race.

Racial inequity: (taken from the racial equity toolkit.) When a person's race can predict their social, economic, and political opportunities and outcomes.

RET: "racial equity toolkit"

Seattle neighborhoods: (taken from the racial equity toolkit neighborhood.) Boundaries defined for the purpose of understanding geographic areas in Seattle.

Stakeholders: (taken from the racial equity toolkit.) Those impacted by proposed policy, program, or budget issue who have potential concerns or issue expertise. Examples might include: specific racial/ethnic groups, other institutions like Seattle housing authority, schools, community-based organizations, change teams, City employees, unions, etc.

Structural racism: (taken from the racial equity toolkit.) The interplay of policies, practices and programs of multiple institutions which leads to adverse outcomes and conditions for communities of color compared to white communities that occurs within the context of racialized historical and cultural conditions.

Surveillance ordinance: Seattle City Council passed ordinance <u>125376</u>, also referred to as the "surveillance ordinance."

SIR: "surveillance impact report", a document which captures the fulfillment of the Council-defined surveillance technology review process, as required by ordinance <u>125376</u>.

Workforce equity: (taken from the racial equity toolkit.) Ensure the City's workforce diversity reflects the diversity of Seattle.

Appendix B: Office for Civil Rights RET Analysis

Appendix C: Public Hearing Notice(s)

Appendix D: Public Comment from the Public Hearings

Appendix E: Public Comment from the Online Form

Appendix F: Letters from Organizations

Appendix G: Public Comment from Other Sources
