# MORE INFORMATION

## Frequently Asked Questions

### Who is Atlas Networks?

We are a local telecommunications company based right here in Seattle that provides truly high speed Internet, telephone, TV, and security services to residential and commercial customers. We were started in 2008 by Seattleites like yourself.

### How is your service delivered?

We deliver our service via Ethernet over a robust Cisco powered network that we own and operate in the building. This building is then connected to our city-wide metro Ethernet backbone.

### How quickly can I get service?

Internet, TV, and Phone service are generally installed within 1-3 business days. Ask us if your building has our exclusive Instant-On internet service!

### Do I need a router?

Yes, it's very important that you have a router. Routers typically provide your home WiFi functionality, but they also act as firewalls between your devices and the internet. You can use any ethernet-based router, or rent a modern gigabit router from us for \$6.00/month. When you rent a router, we provide unlimited support for your Internet service.

### Who handles Setup?

Our experienced technicians handle the entire Internet, phone, and TV set up for you.

### Tell me more about the building-wide wireless access.

In select buildings, we partner with Property Managers to install wireless access points in the building. As an Atlas customer, you can get online anywhere in the building. If your building participates in this, your access code is provided when you sign up for Internet service at no additional charge.

### How is Atlas Networks different than the big cable & telephone companies?

At Atlas, we believe in delivering ON the promise of gigabit Internet. This means providing our customers with truly high speed Internet at reasonable rates. Enjoy the power of gigabit Internet service right from your apartment. We are local and our entire staff works right here in Seattle. Help support our local economy by buying local!

### Do you require a contract or term?

We believe that the best way to retain customer loyalty is through top notch service and customer care. We think you'll love our service so much you won't ever want to leave us... We do not require a contract for our residential Internet and phone services.

### What's this I hear about Atlas events in my building?

A successful business is about customer satisfaction. As such, we hold periodic events in the building where we bring refreshments and mingle with residents. Keep an eye open for our events and come meet our staff!

## Phone

Phone Service	LD Minutes	Monthly*
Basic Phone	None Included	\$9 <sup>99</sup>
Unlimited Phone	Unlimited**	\$24 <sup>99</sup>
