

# Seattle City Light

## BEACON HILL NOTIFICATION WORK IN YOUR NEIGHBORHOOD

The City of Seattle continues to follow guidance from our public health authorities including Public Health - Seattle and King County, Washington State Department of Health, and the Centers for Disease Control and Prevention (CDC) regarding COVID-19. At Seattle City Light, we are continuing to provide essential services to our customers throughout this time. For additional resources, please visit: [powerlines.seattle.gov/COVID-19-resources](https://powerlines.seattle.gov/COVID-19-resources).

### PROJECT OVERVIEW

The streetlight system along Columbia Drive South (and its surrounding streets) is failing and requires replacement. Seattle City Light plans to improve electrical reliability by replacing the aging underground infrastructure, installing new decorative streetlight poles and light-emitting diode (LED) fixtures. **We'd like your feedback on the streetlight design.**

A portion of the streetlight work is tentatively scheduled to start in early to mid-2021 along South Pearl Street. The remainder of the streetlight replacement project may happen later in 2021 and will be phased in several stages. This schedule is subject to change due to the COVID-19 pandemic.

### COMMUNITY FEEDBACK

City Light is seeking community input on the streetlight design for this project. Customers can provide their feedback by completing our online survey at [surveymonkey.com/r/columbialights](https://surveymonkey.com/r/columbialights). Responses will be collected until **Sunday, November 15 at 11:59 p.m.**

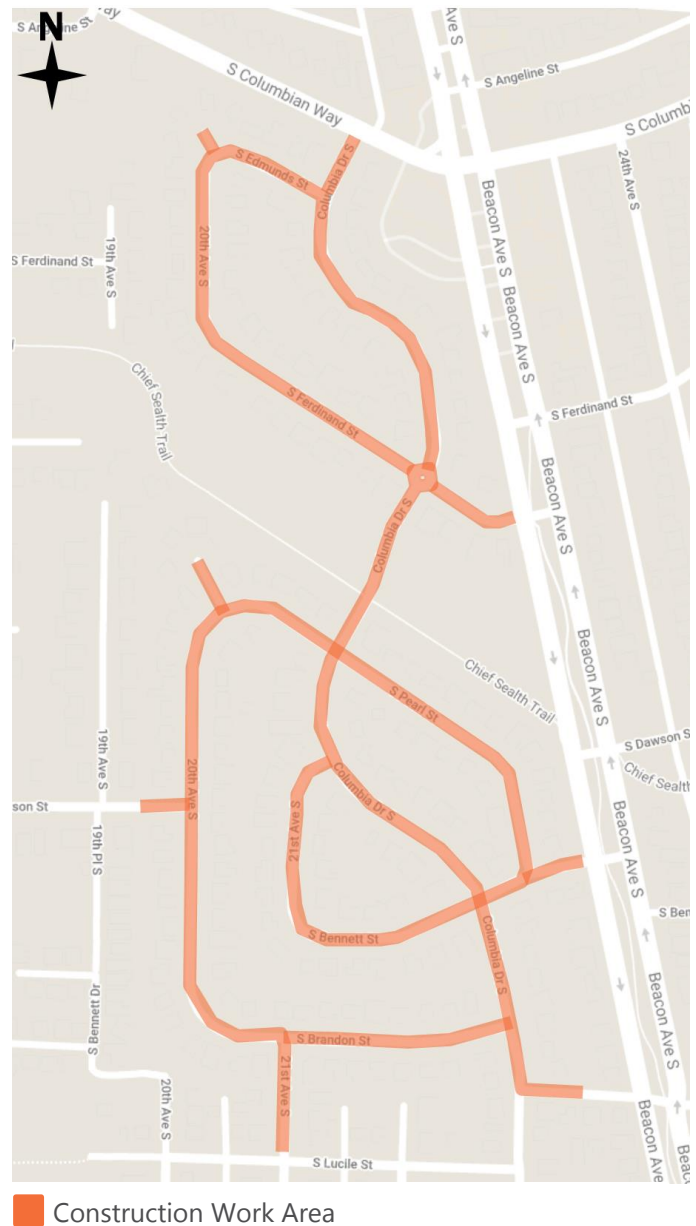

**Option A:** Cobrahead streetlight fixture and aluminum pole (current fixtures in neighborhood)

**Option B:** Arieta streetlight fixture and bronze pole (proposed fixtures for project)

## PROJECT DETAILS

- The utility will design the streetlight project based on the community's preference for the streetlight design and fixtures. Design consultants may be included in this process to guide the discussion on community preference and feedback.
- Construction will be phased in several stages to minimize street closures in the neighborhood. Only one side of the street will be closed at a time during construction.
- Contracted crews will be trenching along the sidewalks and street to install underground electrical conduit. The conduit protects electrical cables from the elements. Cables will be pulled in to connect the new streetlight system.
- Customers can expect temporary parking, sidewalk and traffic restrictions during this project. Flaggers will direct traffic through the work zone.
- Some streetlights may be relocated from their existing fixture locations during this project.
- Curbside landscaping will be impacted during construction. All affected landscaping will be restored to its original condition. Existing curb ramps will also be upgraded to ADA standards.

## TIMING AND COORDINATION

**Survey Feedback:** Customers can provide their feedback by visiting [surveymonkey.com/r/columbialights](https://surveymonkey.com/r/columbialights). Feedback will be collected until Sunday, November 15.

**Construction Start:** A portion of this work could start in early to mid-2021. Additional work will follow later in 2021. Customers will be notified before construction begins.
