14th Ave. S Street Improvements

This project provides transportation and drainage improvements along 14th Avenue S in the South Park neighborhood. The project interconnects and upgrades three signalized intersections, provides new traffic controllers, and adds emergency vehicle preemption that will enhance the safety, quality and condition of the roadway. Enhancements include but are not limited to installing wheelchair ramps, making sidewalk repairs, resurfacing asphalt along with replacing concrete panels, and upgrading street lighting. There are minor close-out and landscape establishment costs in 2010-12.

15th Ave W/Elliott Ave W Street Improvements

This project implements Intelligent Transportation Systems (ITS) improvements in the Elliott Avenue West and 15th Avenue West corridor between Denny Way and NW 90th Street to manage traffic, provide traveler information, and support transit speed and reliability. It includes Dynamic Message Signs (DMS), traffic cameras, travel time measuring devices, bridge messaging, traffic signal upgrades, signal operations improvements, and transit signal priority as well as asphalt overlay, drainage improvements, and sidewalk and curb ramp improvements. Tree pits are to be constructed along sidewalks where space allows.

This project upgrades and interconnects traffic signals along 35th Avenue NE, NE 65th Street, and NE 75th Street, including installation of closed circuit television (CCTV) cameras and system detection. The project also upgrades the storm water detention system on 35th Avenue NE and replaces concrete panels, provides asphalt resurfacing, replaces sidewalks, and installs new curb bulbs throughout the project area. There are minor landscape establishment costs in 2010.

Alaskan Way Seawall Interim Repairs

This project constructs repairs to the facing material of the Alaskan Way Seawall in the vicinity of Clay Street. The project also installs monitoring along the Seawall from Madison Street to Broad Street to allow SDOT to gather information on the extent of deterioration, and monitor the risk of problems. The project is intended to extend the life of the Seawall marginally, given the eventual replacement of a portion of the Seawall from S Washington Street to approximately Pine Street. There are minor close-out costs in 2010.

Arterial Asphalt and Concrete Program

This ongoing project resurfaces asphalt and concrete arterial streets. The Department uses a pavement management system to track the condition of arterial street pavement, to develop maintenance needs and establish priorities, and to select the streets to be rehabilitated each year. This project improves the quality and condition of the City's arterials. Planned paving in 2010 includes: Virgina Street from First to Boren, Olive Way from Third to Sixth and Ninth to Terry, Second Avenue from Jackson to Pike, Fourth Avenue from Jackson to Olive, Dearborn from Fifth to Tenth, and Airport Way from Spokane Street to South Royal Brougham Way.

Aurora Transit, Pedestrian, and Safety Improvements

This project funds improvements to Aurora Avenue North between N 110th and N 145th Streets. Typical improvements may include, but are not limited to, a business access/transit lane; a left turn lane/landscaped center median; and a curb, gutter, and sidewalk/amenity zone to include sidewalks and landscaping. This project improves pedestrian safety, access, and transit service in the corridor. Design was put on hold in 2008 due to lack of funding.

Belltown/Queen Anne Waterfront Connections - Thomas St.

BCL/Program Name:	Mobility-Capital	BCL/Program Code:	19003
Project Type:	New Facility	Start Date:	Q1/2003
Project ID:	TC366210	End Date:	On Hold
Location:	Elliott Ave W/W Thomas St		
Neighborhood Plan:	Queen Anne	Neighborhood Plan Matrix:	Multiple
Neighborhood District:	Magnolia/Queen Anne	Urban Village:	Not in an Urban Village

This project constructs an overpass across the Burlington Northern Railroad tracks at W Thomas Street to connect lower Queen Anne to Myrtle Edwards Park with either elevators and stairs or ramps. The overpass allows pedestrian and bicycle access to Myrtle Edwards Park, creating a vital central link from the park to the west side of the Uptown and Belltown neighborhoods. This project has been suspended due to lack of funding. Funds will be reallocated, when possible. In the 2010 budget process, Council adopted a proviso on this project.

Bike Master Plan Implementation

This ongoing program implements the Seattle Bicycle Master Plan. Typical improvements may include installing bike lanes and sharrows, bicycle route signing, completing key links in the urban trails network, adding bicycle/pedestrian signals to complete the network, and reconstructing key sections of the trails. The goals of the program are to increase bicycle safety and access, while reducing bicycle crashes. This program includes funding for street improvement and trail construction and is consistent with the focus in the City's Transportation Strategic Plan (TSP) on encouraging walking and biking. In 2010, this project has been restructured to include, as sub-projects, the funding and scope from two former projects: the Bike Spot Safety Improvements and the Urban Trail and Bikeways Spot Improvements.

Bridge Load Rating

This project rates bridges for safe load-carrying capacity, as part of a federally-mandated program. The work on this project, performed by both City staff and consultants ensures public safety.

Bridge Painting Program

This ongoing asset preservation project provides for the periodic painting of each of the City's 20 structural steel bridges. The painting cycle is initially determined by applying Federal Highway Administration standards for coating life, and is supplemented by annual physical inspections to assess the actual rate of deterioration.

Bridge Rehabilitation and Replacement

This project addresses the major maintenance backlog for the City's bridge infrastructure. The bridges scheduled for maintenance are: Airport Way over Argo, 15th Avenue NE at NE 105th Street, East Duwamish Waterway, Jose Rizal, East Marginal Way at Horton Street, and NE 45th Street Viaduct.

Bridge Seismic Retrofit Phase II

This project analyzes the remaining 65 bridges that were not retrofitted during Phase I Seismic Retrofit. The project also completes partial retrofits that were part of Phase I. The project prioritizes the bridges based on traffic importance and seismic vulnerability. On the highest ranked bridges, conceptual level analysis is performed to develop a retrofit strategy and cost estimate. As funding allows, full retrofit design and construction will follow. The project enhances the safety of City bridges.

	Burke-Gilman Trail Extension
Mobility-Capital	BCL/Program C

BCL/Program Name:	Mobility-Capital	BCL/Program Code:	19003
Project Type:	New Facility	Start Date:	Q1/1995
Project ID:	TC364830	End Date:	Q4/2011
Location:	Various		
Neighborhood Plan:	Crown Hill/Ballard	Neighborhood Plan Matrix:	BGT-1
Neighborhood District:	Ballard	Urban Village:	Ballard

This project extends the Burke-Gilman Trail from its current terminus at Eighth Avenue NW to Golden Gardens Park. The segment from Eighth Avenue NW to 11th Avenue NW was constructed in 2001. The Ballard Locks to NW 60th Street segment was constructed in 2005. The NW 60th Street to Golden Gardens segment was constructed in 2008. The "Missing Link" segment from 11th Avenue NW to the Ballard Locks is planned for construction in 2009 and 2010.

Center City Access Strategy Program

This program supports the evaluation, prioritization, design, and construction of projects which may include, but are not limited to, transit signal priority and other signal upgrades, rechannelization (striping), and pedestrian and bicycle improvements. The program improves transit, pedestrian, bicycle, and freight movement into and around the Center City as part of SDOT's broader effort to build a sustainable transportation system.

Cheshiahud Lake Union Trail Project

BCL/Program Name:	Mobility-Capital	BCL/Program Code:	19003
Project Type:	Improved Facility	Start Date:	Q1/2009
Project ID:	TC367070	End Date:	Q4/2010
Location:	Lake Union		
Neighborhood Plan:	Not in a Neighborhood Plan	Neighborhood Plan Matrix:	N/A
Neighborhood District:	Lake Union	Urban Village:	South Lake Union

This project completes Fairview trail improvements and establishes the History Trail. The project addresses the challenges presented along the Fairview Avenues N and E corridors. This may include implementing a new separated bike/pedestrian path along Fairview Avenue N to the south of the old steam plant to Lake Union Park, and improving the shared route along Fairview Avenue E to the University Bridge. This will substantially complete the needed physical improvements along the trail. Three street-end parks will be improved through volunteer efforts. The Museum of History and Industry (MOHAI) and the Center for Wooden Boats (CWB) will implement interpretive elements for the History Trail.

Chief Sealth Trail

This project constructs 3.6 miles of the Chief Sealth Trail, the first off-street, multi-use trail in southeast Seattle. The work includes the design and construction of a pedestrian/bicycle asphalt trail located in the City Light transmission corridor between Interstate 5 and the Rainier Valley. The trail provides access to Sound Transit Link Light Rail stations at S Othello and S Henderson Streets. Phase II of the project constructs a new section of trail to connect the existing Chief Sealth Trail to the intersection of South Myrtle Place and Holly Park Drive South, and installs a new traffic signal at that intersection to facilitate the safe crossing of bicycles and pedestrians. A retaining wall is constructed along the north side of the bicycle path to bring the grade up to sidewalk level. This phase also includes construction of a bicycle ramp, sidewalk improvements, installation of pedestrian signals, vehicle and pedestrian detection, crosswalk markings, and warning strips for bicycles. Phase III, known as the Northern Extension, spans from Beacon Avenue South to South Angeline Street/15th Avenue South.

Collision Evaluation Program

The project provides low-cost, non-capital revisions to hazardous street locations. Annual collisions are reviewed at intersections and at mid-block locations. Locations with five or more annual vehicle collisions are checked for collision patterns. Revisions can include removal, relocation or shielding of fixed objects, improved signage, improved delineation with raised islands, or striping. This project enhances the safety of the City's streets.

This project improves freight movement, transit travel, commuter traffic, and ferry access in the Duwamish Industrial Area through the interconnection of traffic signals and controller equipment upgrades, the development of driver information systems, and information links to railroad control centers. Roadway signs and closed-circuit television are designed and installed to monitor traffic conditions and accidents, and inform drivers of congestion points with links between the cameras, the Seattle Channel, and the City traffic web page.

Duwamish Truck Mobility Improvement Program

			10000
BCL/Program Name:	Mobility-Capital	BCL/Program Code:	19003
Project Type:	Improved Facility	Start Date:	Q1/2004
Project ID:	TC365850	End Date:	Ongoing
Location:	Duwamish		
Neighborhood Plan:	Duwamish	Neighborhood Plan Matrix:	Multiple
Neighborhood District:	Greater Duwamish	Urban Village:	Not in an Urban Village

This project includes small scale improvements to the City's street system to improve connections between the port, railroad intermodal yards, industrial businesses, and the regional highway system. High-priority locations and two types of problems have been identified: inadequate turning radii at specific corners, forcing trucks to take circuitous routes or crawl through intersections; and busy intersections lacking signals or left-turn signal and queuing lanes, resulting in long waits for adequate gaps in traffic. The majority of the candidate truck mobility improvements are located in the Duwamish Industrial area, which is characterized by a high proportion of trucks in the traffic mix. Potential circulation improvements are also found in the street system crescent surrounding Port of Seattle facilities extending to Magnolia and the Ballard industrial area.

First Hill Streetcar

This project constructs a modern, low-floor streetcar system connecting First Hill employment centers to the regional Link light rail system, including but not limited to the International District/Chinatown Station, and Capitol Hill Station at Broadway and John Street. The system will provide reliable, frequent service (headways of approximately 10 minutes during peak periods) and operate the same hours as the light rail system (at least 20 hours per day Monday through Saturday and at least 12 hours per day Sundays). A light maintenance vehicle storage base and procurement of a six-vehicle streetcar fleet is also included in the scope of the project.

Golden Gardens Emergency Landslide Repair

This project stabilizes and repairs the damaged roadway and slope along Golden Gardens Drive NW caused by the December 2007 rainstorm. Typical repairs include but are not limited to: stabilization of the adjacent slope, reinforcement of the underlying material supporting the roadway, construction of a soldier pile wall, and drainage system repairs. Repairs to the roadway and slope are required to reopen that section of Golden Gardens Drive NW. There are minor landscape establishment costs in 2010-11.

Grant Match Reserve Opportunity Fund

This project is a reserve to provide a local match for potential new grants, appropriations, and partnership opportunities. SDOT typically applies for grants or requests appropriations through a variety of state and federal funding sources. Projects are located citywide and can address a wide range of transportation improvements including neighborhood plan projects, mobility improvements, asset preservation, safety improvements, or economic development opportunities.

Neighborhood Plan:	Broadview-Bitter Lake-Haller Lake	Neighborhood Plan Matrix:	Multiple
Neighborhood District:	Northwest	Urban Village:	Not in an Urban Village

This project widens the existing four lanes and adds a center two-way left-turn lane on Greenwood Avenue N between N 105th Street and N 112th Street. Improvements include parking, curb, planting strips, and concrete walkways on both sides of the street. All intersections are improved for pedestrian safety. Signals, street lighting, and drainage systems are upgraded as needed.

Hazard Mitigation Program - Areaways

This ongoing program implements inspection and repair of areaways in the Pioneer Square District to reduce risks to City facilities and the general public. Areaways are usable space, generally in the street right-of-way, constructed under sidewalks between a building foundation and the street wall. Typical improvements may include, but are not limited to, repairs to the existing areaway and/or filling the areaway with lightweight concrete. Improving these areaways is an action included in the South Downtown Strategic Plan.

Hazard Mitigation Program - Landslide Mitigation Projects

This project enables SDOT to address and repair landslide concerns that affect the right-of-way. The Landslide Mitigation Program provides SDOT with staff and resources to identify and prioritize landslide concerns, to undertake reconnaissance engineering and geotechnical studies of problem areas, and to make repairs at the highest priority locations, usually where landslide concerns have caused the roadway to be partially or completely closed.

Intelligent Transportation Systems (ITS) Plan Implementation

This project provides funding for high-priority projects identified in the City's Intelligent Transportation Systems (ITS) Strategic Plan and the ITS Master Plan, in combination with grant match and local ITS initiatives and spot improvements undertaken by City of Seattle crews. Examples of potential projects include transit signal priority strategies, ITS information systems, use of closed-circuit television (CCTV) cameras to monitor traffic in key travel corridors, real-time traffic responsive control, parking guidance systems, and traveler information. These projects are located in the Duwamish area, South Seattle, West Seattle, the downtown core, and Ballard.

King Street Station Multimodal Terminal

This project transforms the King Street Station into a transportation hub connecting express bus, commuter train, and light rail service. This project restores the historic character of the landmark King Street Station, incorporating sustainable features in compliance with the City's Sustainable Building Policy.

Lake City Way NE Multimodal

This project provides pedestrian and street improvements on Lake City Way NE (State Route 522) from I-5 to NE 145th Street (the northern city limits.) Improvements include transit signal priority installation and full interconnection at the 15 signalized intersections along the route, construction of transit queue jumps where feasible, sidewalk connections along the route including necessary drainage upgrades, and upgrading and modernizing lighting along the route for both vehicles and pedestrians. Amenities such as street trees and bus shelters at transfer points and transit stops are also provided. Landscaped medians, northbound Business Access, and a right-turn and transit lane (BAT lane) are constructed. There are minor landscape establishment costs in 2010.

Lake Union Ship Canal Trail

This project completes Phase II of a multi-use trail extending from the Fremont Bridge to Fisherman's Terminal, just west of 15th Avenue NW. Phase II begins at Sixth Avenue W, extends westward for about 0.75 miles, and is largely within, or adjacent to, a railroad right-of-way. This trail segment is a critical "missing link" in an urban and regional trails system that, when completed, will make it possible to bicycle almost exclusively on dedicated trails from Redmond to downtown Seattle.

Left Turn Signals

This ongoing project improves five to ten left-turn signals each year at locations with high left-turn collision occurrences. The Department established this project in 1992 to reduce accidents and meet state regulatory requirements. Locations are selected based on accident data.

Neighborhood District:	Northwest	Urban Village:	Bitter Lake Village

This project constructs road improvements on Linden Avenue North from N 128th Street to N 145th Street. Improvements include, but are not limited to concrete sidewalks, curb & gutters, and asphalt road section. The improvements will provide pedestrian, drainage and roadway improvements, and complete the final link in the Interurban Trail North.

Magnolia Bridge Replacement Project

BCL/Program Name:	Major Projects	BCL/Program Code:	19002
Project Type:	New Facility	Start Date:	Q1/2002
Project ID:	TC366060	End Date:	TBD
Location:	W Garfield St/15th Ave W/Thorndyke	Ave W	
Neighborhood Plan:	BINMIC (Ballard Interbay Northend)	Neighborhood Plan Matrix:	T-21
Neighborhood District:	Magnolia/Queen Anne	Urban Village:	Ballard Interbay

The environmental analysis for replacing this bridge evaluated several possible alternatives including rehabilitation of the existing structure. In 2007, an environmental assessment was published and described the preferred alternative, a new bridge south of and adjacent to the existing bridge. The Type, Size and Location (TS&L) Report was completed in 2007, selecting a concrete box girder supported on flared columns as the appropriate structure type for this new bridge. The structure will be a haunched concrete box at the highly visible section of the bridge over 15th Avenue NW and at the westerly high level bluff section. Current available funds will only allow completion of 50% of the design and contract plans. Funding to complete the design, purchase the necessary right-of-way, and construct the new bridge has not been identified. The estimate to complete the project is \$252.4 million.

Mercer Corridor Project

This project, part of the Bridging the Gap funding package, implements a comprehensive package of transportation improvements in the Mercer Corridor in South Lake Union. Improvements include, but are not limited to, a widened two-way Mercer St., improved pedestrian safety and access to Lake Union Park, and enhanced neighborhood circulation for all modes. The project aims to use existing street capacity more efficiently and enhance all modes of travel, including pedestrian mobility. In the 2010 budget process, Council adopted a proviso on this project.

Mercer Corridor Project West Phase

BCL/Program Name:	Major Projects	BCL/Program Code:	19002					
Project Type:	New Facility	Start Date:	Q1/2010					
Project ID:	TC367110	End Date:	Q4/2014					
Location:	Mercer ST/Elliot AVE W/Dexter AV	Mercer ST/Elliot AVE W/Dexter AVE N						
Neighborhood Plan:	In more than one Plan	Neighborhood Plan Matrix:	Multiple					
Neighborhood District:	In more than one District	Urban Village:	In more than one Urban Village					

This project will convert Mercer Street to a two-way street between Dexter Ave and Elliott Ave West. The Mercer underpass at Aurora Ave will be widened to allow for six travel lanes and a bicycle/pedestrian shared use path between Dexter Ave and 5th Ave North. Roy Street, between Aurora and Queen Anne Ave., will also be converted to a two-way street with on-road bicycle lanes. In the 2010 budget process, Council adopted a proviso on this project.

On October 26, 2009, the City Council budget committee held a special public hearing on this project. Special public hearings, also known as "CLEAN!" hearings, are held for certain major capital projects on which the City spends or is authorized to spend \$5 million or more in City money."

Location:	NE Northgate Wy/5th Ave NE		
Neighborhood Plan:	Northgate	Neighborhood Plan Matrix:	N/A
Neighborhood District:	In more than one District	Urban Village:	Northgate

This project purchases the right-of-way needed to widen Northgate Way at the Fifth Avenue NE intersection. This long planned improvement is part of the Fifth Avenue Development Plan and Northgate's Urban Center Revitalization Plan. Construction of the future intersection improvements is estimated to be \$2.24 million.

Neighborhood Traffic Control Program

This ongoing program installs traffic calming devices citywide, primarily neighborhood traffic circles, in response to investigations of citizen requests. The program also installs some mid-block traffic calming devices such as speed humps, as well as residential street speed limit signs and warning signs.

New Traffic Signals

This ongoing project installs new traffic signals to improve traffic flow, reduce the frequency and severity of traffic accidents, and support pedestrian activity. Location choices are based upon pedestrian and vehicle volumes; school, senior citizen, and handicapped accessible crossing requirements; and accident frequency criteria.

Non-Arterial Asphalt Street Resurfacing

This ongoing project repairs and/or replaces deteriorated asphalt pavement citywide. Project locations are chosen annually, based upon the degree of deterioration as confirmed by Department staff field observation, citizen service requests, claims, and potential City liability. High priority is given to repair non-arterial bus route streets.

North Queen Anne Drive Bridge - Seismic Improvements

This project seismically retrofits the North Queen Anne Drive Bridge, built in 1935. The bridge is a heavily-used primary arterial link between the densely-populated residential community and business district of Queen Anne and State Route 99 (Aurora Avenue N.) Seismic improvements strengthen the bridge to minimize the likelihood of heavy damage or collapse during an earthquake. There are minor landscape establishment costs in 2010-11.

NSF/CRS Neighborhood Program

This ongoing program has two elements: an annual program that identifies projects estimated less than \$100,000 that are prioritized by each of the 13 district councils; and a triennial program that identifies projects estimated between \$100,000 and \$500,000 that are prioritized by the community at large and a project review team. Typical improvements may include, but are not limited to, sidewalk construction, repairs and replacement, installation of curb bulbs or other traffic calming devices, and improvements to crosswalks. The program enhances the safety, quality and condition of the pedestrian and neighborhood environments.

Pay Stations

This project has installed approximately 2,100 pay stations citywide through 2008. In 2010, funding is available to install approximately 87 pay stations citywide to convert 800 single-space meter controlled spaces to pay station control and install approximately 69 new pay stations in the First Hill and Capital Hill neighborhoods. In future years, funding will be identified as parking plans are developed. The project provides more effective parking management.

Pedestrian Master Plan Implementation

This ongoing program implements the Pedestrian Master Plan. Typical improvements may include the construction of new sidewalks, the installation of curb ramps at high priority pedestrian locations, the installation of pedestrian lighting, and the rehabilitation or replacement of stairways. The goals of the program are to reduce the number and severity of crashes involving pedestrians; make Seattle a more walkable city for all through equity in public engagement, service delivery, accessibility, and capital investments; develop a pedestrian environment that sustains healthy communities and supports a vibrant economy; and raise awareness of the important role of walking in promoting health and preventing disease. This project includes, as sub-projects, the funding and scope from the following former projects: ADA Spot Improvements, Pedestrian Lighting - Capital Costs, Sidewalk Development Program, and Stairway Rehabilitation Program.

Railroad Crossing Signal Improvements

BCL/Program Name:	Mobility-Capital	BCL/Program Code:	19003
Project Type:	Improved Facility	Start Date:	Q1/2009
Project ID:	TC367090	End Date:	Q4/2010
Location:	100 S Orcas ST/S Orcas ST/S Orcas ST		
Neighborhood Plan:	Rainier Beach	Neighborhood Plan Matrix:	N/A
Neighborhood District:	Downtown	Urban Village:	Rainier Beach

This project provides railroad crossing gates and flashing lights at key railroad crossings in the Seattle Waterfront Quiet Zone: at Broad Street, Clay Street, Vine Street and Wall Street. By federal law, without these improvements, trains must sound their horn whenever they approach the crossings. The gates and flashing lights will be installed by Burlington Northern Santa Fe (BNSF) Railroad and SDOT will install other elements including curbs and signage. In addition, SDOT will install improvements for bicycle access to the Olympic Sculpture Park and Myrtle Edwards Park at the intersection of Alaskan Way and Broad Street.

S Henderson Street Improvements

This project funds improvements including widening the existing sidewalk, repairing pavement base, repairing existing bus layover areas, minor improvements to the existing drainage system, curb bulbs, pedestrian lighting, planting strips, and street trees. This project improves access and mobility for pedestrians, transit, bicyclists, freight, and vehicles and improves pedestrian safety. There are minor landscape establishment costs in 2010-11.

S Lander St. Grade Separation

This project develops a grade separation of the S Lander St. roadway and the Burlington Northern mainline railroad tracks between First Avenue S and Fourth Avenue S. Previously, City staff evaluated traffic conditions and identified an initial design concept. During the preliminary engineering phase of the project, a consultant conducted a Type, Size, and Location study to develop more detailed plans and cost estimates. The project design recommenced in November of 2006, and in January of 2007, survey, geotechnical, and scoping of the design work began. Design was put on hold in 2008 due to lack of funding. The estimated cost to design and construct this project is \$145 million.

Sidewalk Safety Repair

This ongoing project rehabilitates sidewalks significantly damaged by street trees or where there are serious safety concerns as evidenced by claims, service requests, and potential City liability. Asset management principles are used to identify repair needs and establish priorities.

Sound Transit - University Link

This project provides design review, permitting, and construction support services for the Sound Transit University Link project. The University link is the three mile extension of light rail transit from downtown to the University of Washington. The alignment is entirely underground and includes stations at Capitol Hill near Seattle Central Community College and at the University of Washington near Husky Stadium.

Spokane St. Viaduct

This project, part of the Bridging the Gap funding package, builds a new structure that will be parallel and connected to the existing one, and will widen the existing viaduct by about 41 feet. The project also includes construction of new ramps at First Avenue South and an eastbound Fourth Avenue off-ramp. This project improves the safety of the Spokane Street Viaduct through the addition of shoulders, a wider median, and a westbound "weave-lane."

SR-519 Phase II

This project constructs a new westbound off-ramp from I-5 and I-90 via the current South Atlantic Street Overpass. Additionally, this project constructs public plazas both on royal Brougham Way between the stadiums and between Third and Fourth Avenues. Work also includes, but is not limited to, the relocation and construction of public and private utilities and construction of a public elevator. The Washington State Department of Transportation is the lead agency.

SR-520 Project

This project provides policy, planning, and technical analysis support to the Seattle Department of Transportation Director and elected officials to review and comment on the Environmental Impact Statement and the design for SR-520. This regional project may include replacement of the SR-520 bridge with a six-lane bridge, new freeway interchanges at Montlake Boulevard and Lake Washington Boulevard, and other improvements.

Street Lighting Program

This project provides funding for the street lighting components of transportation projects, where the cost of those components will ultimately be borne by the City's General Subfund. The project enables the Seattle Department of Transportation, the Department of Finance, and Seattle City Light to plan for these costs. Funding is provided from the Light Fund, which recovers these costs through street light rates charged by Seattle City Light to the City's General Subfund. SDOT develops project specific estimates of the cost of lighting components in the year prior to construction. For 2010, funds are budgeted under the individual transportation projects in which the spending will occur. For 2011 through 2015, the funds displayed below have not yet been allocated to specific projects, but will be allocated once detailed project cost estimates are developed.

Transit Corridor Projects

This project constructs transit and pedestrian improvements along four major transit corridors - Aurora Avenue N, Ballard to Downtown, West Seattle to Downtown, and Rainier Avenue S. Funding from the Bridging the Gap package is used to leverage grant and partnership opportunities. As opportunities and priorities are identified, the budget is transferred to specific projects.

West Duwamish Trail

This project will create a linear park, including bicycle and trail improvements along the Duwamish River. This project is part of the 2008 Parks Levy.
