

Seattle Fire Prevention Division 220 3rd Avenue South Seattle, WA 98104 SFD_FMO_SystemsTesting@seattle.gov

SYSTEM TEST REPORT

Version 02-2025

DAMPERS (NOT PART OF SMOKE CONTROL SYSTEM)					STATUS						
	□ Confidence Test □ Deficiency Repair Test				🗆 Red		□ Yellow □ White				
Use this form to report inspection, testing, maintenance and repairs of fire dampers, smoke dampers, and combination fire/smoke dampers								mpers that are	*not*		
	part of a smoke control system (2018/2021 IFC 706.1). In existing, fully ducted HVAC systems, periodic testing shall not be required for a single damper that is										
	not accessible within a rated barrier or shaft (2019 NFPA 80, 19.5.1.3). [Use the Smoke Control form to report on dampers that are required by the Building										
Code for purposes of providing a tenable environment for the evaluation or relocation of occupants such as hoistway and stairwell pressurization systems.]

Tes	Test Information										
Date of Test:											
-					C . 1	· · · ·	с. с.				
	items on the checklists below shall be inspected and tested. This list does not constitute all of the require		-	-			-				
-	system. Refer to the CURRENT FIRE CODE AND REFERENCED NFPA 80 AND 105 and the MANUFACTURER'S INSTRUCTIONS for additional inspecting and testing										
requirements. ONLY SELECT N/A FOR ITEMS THAT DO NOT EXIST AT THE BUILDING, DO NOT USE N/A TO INDICATE THAT A TEST OR RESULT IS NOT AVAILABLE.											
PRE	-TEST CHECKS										
AVC	DID "FALSE ALARMS" TO FIRE DEPARTMENT BY PUTTING THE FIRE ALARM SYSTEM IN TEST MODE. Failure to	o place	the Fire	Alarm Sv	stem (F	AS) into	test				
	de and/or taking other precautions to may cause preventable alarms.	- 1				,					
FIRE DAMPERS AND COMBINATION FIRE/SMOKE DAMPERS (NFPA 80)											
1	This property has fusible link operated dampers.		Yes				N/A				
	Fusible link was removed or activated with damper in full open position, and the damper closed										
10	completely without assistance. 2019 NFPA 80 19.5.2.2		Yes		No		N/A				
1h	Where the damper is designed with a latch to hold the damper in the full-closed position, the operation										
10	of the latch was confirmed to function as designed. 2019 NFPA 80 19.5.2.2		Yes		No		N/A				
10	Any links that appear damaged have been replaced. 2019 NFPA 80 19.5.2.2		Yes		No		N/A				
	Damper was returned to the full open position, fusible link was reinstalled, and damper operation is		163		NO		N/A				
Iu	unobstructed. 2019 NFPA 80 19.5.2.2		Yes		No		N/A				
2	This property has dampers that do not require a fusible link to operate. Fans shall not be permitted to										
2	be shut down during the test.		Yes				N/A				
22	-										
2a		_				_					
	dampers were able to be commanded to the full-closed or full-open position, then restored to the		Yes		No		N/A				
	original operating position as required by system design. 2019 NFPA 80 19.5.2.3										
2b	Remote Inspection: Visual inspection of at least one damper confirmed that the position indication										
	capability correctly indictes the position of the damper when the damper is fully opened and fully		Yes		No		N/A				
	closed. 2019 NFPA 80 19.5.2.3										
3a	Remote Inspection: The full-open or full-closed position, as required by the system design, was		Yes		No		N/A				
	confirmed for all dampers with their position indication devices. 2019 NFPA 80 19.5.2.3		163		NO		N/A				
3b	Remote Inspection: All dampers were commanded and confirmed to the full-closed or full-open		Yes		No		N/A				
	position. 2019 NFPA 80 19.5.2.3		163		NU		N/A				
3c	Remote Inspection: All dampers were confirmed to the original operating position as required by the		Vac		No		NI / A				
	system design. 2019 NFPA 80 19.5.2.3		Yes		No		N/A				
4 Any reports of abrupt changes in airflow or noise from the duct system have been investigated and					N/A						
	verified to be not related to damper operation. 2019 NFPA 80 19.6		Yes		No		N/A				
5	All exposed moving parts of the damper were lubricated as required by the manufacturer. 2019 NFPA 80	_	Vee		Ne		N/A				
	19.6		Yes		No		N/A				
SM	OKE DAMPERS (NFPA 105). Fans shall not be permitted to be shut down during the test. 2019 NFPA 7.5.2	2.3.1.1.									
6	Visual Inspection: From a fully open or fully closed position, as required by the system design, all										
	dampers were able to be commanded to the full-closed or full-open position, then restored to the		Yes		No		N/A				
	original operating position as required by system design. 2019 NFPA 105 7.6.2						,				
7											
7	Remote Inspection: Visual inspection of at least one damper confirmed that the position indication	_	Vee		Na	_	NI / A				
	capability correctly indictes the position of the damper when the damper is fully opened and fully		Yes		No		N/A				
0	closed. 2019 NFPA 105 7.6.3										
8	Remote Inspection: The full-open or full-closed position, as required by the system design, was		Yes		No		N/A				
~	confirmed for all dampers with their position indication devices. 2019 NFPA 105 7.6.3.										
9	Remote Inspection: All dampers were commanded and confirmed to the full-closed or full-open		Yes		No		N/A				
	position. 2019 NFPA 105 7.6.3										
10	Remote Inspection: All dampers were confirmed to the original operating position as required by the		Yes		No		N/A				
	system design. 2019 NFPA 105 7.6.3	-		_		_					
11	Any reports of abrupt changes in airflow or noise from the duct system have been investigated and		Yes		No		N/A				
4.5	verified to be not related to damper operation. 2019 NFPA 105 7.7						·				
12	All exposed moving parts of the damper were lubricated as required by the manufacturer. 2019 NFPA		Yes		No		N/A				
l I	105 7.7										

FINAL CHECKS AND MANDATORY REPORTING								
Put the Fire Alarm/monitoring system back into service and/or other precautionary measures that were made to restore fire alarm system to normal operation								
(includes removal of protective coverings.)								
13	The dampers included on this report have an overall status of red (impaired), yellow (deficient) or v	vhite						
	(no deficiencies, all work as designed) based on my inspection today and SFD Administrative Rule 9	.02. 🗆	Red		Yellow		White	
	Note: Dampers do not require the placement of a physical service tag at the premesis, instead this	fire						
	agency uses TCE to access damper status.	_						
14	I will provide a copy of the confidence test report to the owner.		Yes		No			
15	I will submit this test report to the fire department through TCE.		Yes		No			
Any deficiencies found are noted in the report and have been reported to the building Owner/Manager for corrective action. By accepting this statement, I further attest that I am properly certified by the City of Seattle (and State of Washington if required for the work) to perform the work documented in this report, or exempt from those requirements. Finally, by accepting this statement I attest that the contractor on whose behalf this report is submitted holds the appropropriate Washington State licenses should any be required for the work documented in this report.								
	I accept. Statement.
