HISPANIC OR LATINO AND RACE					
Total population:	83,909	+/- 1,555	100.0%	X	High
Hispanic or Latino of any race:	4,031	+/- 667	4.8%	+/- 0.8	High
Mexican	2,183	+/- 519	2.6%	+/- 0.6	Moderate
Puerto Rican	130	+/- 83	0.2%	+/-0.1	Moderate
Cuban	147	+/- 85	0.2%	+/- 0.1	Moderate
Other Hispanic or Latino	1,571	+/- 417	1.9%	+/- 0.5	Moderate
Not Hispanic or Latino:	79,878	+/- 1,557	95.2%	+/- 0.6	High
White alone	70,423	+/- 1,447	83.9%	+/- 0.7	High
Black or African American alone	1,111	+/- 416	1.3%	+/- 0.5	Moderate
American Indian and Alaska Native alone	246	+/- 115	0.3%	+/- 0.1	Moderate
Asian alone	4,620	+/- 570	5.5%	+/- 0.7	High
Native Hawaiian and Other Pacific Islander alone	24	+/- 41	0.0%	+/-0.1	Low
Some other race alone	290	+/- 123	0.3%	+/- 0.1	Moderate
Two or more races:	3,164	+/- 590	3.8%	+/- 0.7	High
Two races including Some other race	14	+/- 21	0.0%	+/-0.1	Low
Two races excluding Some other race and Three or more races	3,150	+/- 590	3.8%	+/- 0.7	High
HOUSING					
Total Housing Units:	43,347	+/- 298	100.0%	X	High

Source: U.S. Census Bureau, 2006-2010 American Community Survey (ACS), 5-Year estimates

Produced by: City of Seattle, Department of Planning and Development (DPD)
On the Web at: http://www.seattle.gov/dpd/Research/Population_Demographics/Overview/

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are: DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

¹ The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

² The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.

"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.

"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.

"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP05:

"For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

Selected Social Characteristics (DP02)

Source: U.S. Census Bureau, 2006-2010 American Community Survey (ACS), 5-Year estimates

Produced by: City of Seattle, Department of Planning and Development (DPD)
On the Web at: http://www.seattle.gov/dpd/Research/Population_Demographics/Overview/

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are: DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

¹The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

² The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.

"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.

"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.

"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP02:

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

1.85 to 1.99	1,114	+/- 264	1.3%	+/-0.3	Moderate
2.00 and over	69,222	+/- 1,318	83.2%	+/-0.6	High

Source: U.S. Census Bureau, 2006-2010 American Community Survey (ACS), 5-Year estimates

Produced by: City of Seattle, Department of Planning and Development (DPD)
On the Web at: http://www.seattle.gov/dpd/Research/Population_Demographics/Overview/

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are: DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

¹The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

² The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.

"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.

"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.

"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP03:

"There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC) 2010. The 2010 Census occupation codes were updated in accordance with the 2010 revision of the SOC. To allow for the creation of 2006-2010 and 2008-2010 tables, occupation data in the multiyear files (2006-2010 and 2008-2010) were recoded to 2010 Census occupation codes. We recommend using caution when comparing data coded using 2010 Census occupation codes with data coded using previous Census occupation codes. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."

Selected Housing Characteristics (DP04)

2006-2010 American Community Survey 5-Year Estimates (Not decennial census counts. See notes after table.)

Council District # 6

Subject	Estimate	Estimate Margin of Error ¹	Percent	Percent Margin of Error ¹	Reliability ²
HOUSING OCCUPANCY					
Total housing units:	43,347	+/- 298	100.0%	X	High
Occupied housing units	41,023	+/- 515	94.6%	+/-1	High
Vacant housing units	2,324	+/- 439	5.4%	+/-1	High
Homeowner vacancy rate	1.1	+/- 1	X	X	Low
Rental vacancy rate	2.4	+/- 1.8	X	X	Low
UNITS IN STRUCTURE					
Total housing units:	43,347	+/- 298	100.0%	X	High
1-unit, detached	24,294	+/- 576	56.0%	+/-1.3	High
1-unit, attached	1,778	+/- 265	4.1%	+/-0.6	High
2 units	2,285	+/- 367	5.3%	+/-0.8	High
3 or 4 units	2,680	+/- 356	6.2%	+/-0.8	High
5 to 9 units	4,368	+/- 440	10.1%	+/-1	High
10 to 19 units	3,013	+/- 312	7.0%	+/-0.7	High
20 to 49 units	2,588	+/- 339	6.0%	+/-0.8	High
50 or more units	2,190	+/- 280	5.1%	+/-0.6	High
Mobile home	114	+/- 101	0.3%	+/-0.2	Low
Boat, RV, van, etc.	37	+/- 59	0.1%	+/-0.1	Low
YEAR STRUCTURE BUILT					
Total housing units:	43,347	+/- 298	100.0%	X	High
Built 2005 or later	1,283	+/- 244	3.0%	+/-0.6	High
Built 2000 to 2004	1,480	+/- 236	3.4%	+/-0.5	High
Built 1990 to 1999	2,352	+/- 334	5.4%	+/-0.8	High
Built 1980 to 1989	3,004	+/- 385	6.9%	+/-0.9	High
Built 1970 to 1979	3,902	+/- 420	9.0%	+/-1	High
Built 1960 to 1969	3,846	+/- 401	8.9%	+/-0.9	High
Built 1950 to 1959	4,622	+/- 435	10.7%	+/-1	High
Built 1940 to 1949	4,201	+/- 382	9.7%	+/-0.9	High
Built 1939 or earlier	18,657	+/- 651	43.0%	+/-1.5	High
ROOMS					
Total housing units:	43,347	+/- 298	100.0%	X	High
1 room	1,272	+/- 263	2.9%	+/-0.6	Moderate
2 rooms	2,913	+/- 354	6.7%	+/-0.8	High
3 rooms	6,507	+/- 554	15.0%	+/-1.3	High
4 rooms	7,685	+/- 562	17.7%	+/-1.3	High
5 rooms	6,744	+/- 520	15.6%	+/-1.2	High
6 rooms	6,091	+/- 501	14.1%	+/-1.2	High
7 rooms	4,553	+/- 400	10.5%	+/-0.9	High
8 rooms	3,205	+/- 326	7.4%	+/-0.8	High
9 or more rooms	4,377	+/- 374	10.1%	+/-0.9	High
Median rooms	5.4	+/- 0.1	X	X	High
BEDROOMS					
Total housing units:	43,347	+/- 298	100.0%	X	High
No bedroom	1,466	+/- 272	3.4%	+/-0.6	High
1 bedrooms	9,818	+/- 569	22.6%	+/-1.3	High
2 bedrooms	13,901	+/- 657	32.1%	+/-1.5	High
3 bedrooms	11,368	+/- 604	26.2%	+/-1.4	High
4 bedrooms	5,286	+/- 401	12.2%	+/-0.9	High
5 or more bedrooms	1,508	+/- 231	3.5%	+/-0.5	High

HOUSING TENURE					
Occupied housing units:	41,023	+/- 515	100.0%	X	High
Owner-occupied	23,129	+/- 584	56.4%	+/-1.2	High
Renter-occupied	17,894	+/- 638	43.6%	+/-1.5	High
Average household size of owner-occupied unit	2.20	+/- 0.04	X	X	High
Average household size of renter-occupied unit	1.80	+/- 0.08	X	X	High
YEAR HOUSEHOLDER MOVED INTO UNIT					
Occupied housing units:	41,023	+/- 515	100.0%	X	High
Moved in 2005 or later	17,372	+/- 667	42.3%	+/-1.5	High
Moved in 2000 to 2004	8,860	+/- 562	21.6%	+/-1.3	High
Moved in 1990 to 1999	7,792	+/- 485	19.0%	+/-1.2	High
Moved in 1980 to 1989	3,342	+/- 344	8.1%	+/-0.8	High
Moved in 1970 to 1979	1,988	+/- 277	4.8%	+/-0.7	High
Moved in 1969 or earlier	1,669	+/- 220	4.1%	+/-0.5	High
VEHICLES AVAILABLE					
Occupied housing units:	41,023	+/- 515	100.0%	X	High
No vehicles available	3,430	+/- 379	8.4%	+/-0.9	High
1 vehicle available	18,005	+/- 727	43.9%	+/-1.7	High
2 vehicle available	14,939	+/- 623	36.4%	+/-1.4	High
3 or more vehicle available	4,649	+/- 418	11.3%	+/-1	High
HOUSE HEATING FUEL					
Occupied housing units:	41,023	+/- 515	100.0%	X	High
Utility gas	19,316	+/- 643	47.1%	+/-1.5	High
Bottled, tank, or LP gas	375	+/- 125	0.9%	+/-0.3	Moderate
Electricity	16,369	+/- 668	39.9%	+/-1.5	High
Fuel oil, kerosene, etc.	4,402	+/- 391	10.7%	+/-0.9	High
Coal or coke	0	+/-123	0.0%	+/-0.6	NC
Wood	126	+/- 70	0.3%	+/-0.2	Moderate
Solar energy	74	+/- 71	0.2%	+/-0.2	Low
Other fuel	248	+/- 113	0.6%	+/-0.3	Moderate
No fuel used	113	+/- 60	0.3%	+/-0.1	Moderate
SELECTED CHARACTERISTICS					
Occupied housing units:	41,023	+/- 515	100.0%	X	High
Lacking complete plumbing facilities	334	+/- 165	0.8%	+/-0.4	Moderate
Lacking complete kitchen facilities	634	+/- 225	1.5%	+/-0.5	Moderate
No telephone service available	1,217	+/- 251	3.0%	+/-0.6	Moderate
OCCUPANTS PER ROOM					
Occupied housing units:	41,023	+/- 515	100.0%	X	High
1.00 or less	40,625	+/- 519	99.0%	+/-0.2	High
1.00 to 1.50	213	+/- 113	0.5%	+/-0.3	Moderate
1.51 or more	185	+/- 109	0.5%	+/-0.3	Moderate
VALUE					
Owner-occupied units:	23,129	+/- 584	100.0%	X	High
Less than \$50,000	110	+/- 74	0.5%	+/-0.3	Low
\$50,000 to \$99,999	128	+/- 64	0.6%	+/-0.3	Moderate
\$100,000 to \$149,999	57	+/- 38	0.2%	+/-0.2	Moderate
\$150,000 to \$199,999	264	+/- 93	1.1%	+/-0.4	Moderate
\$200,000 to \$299,999	1,594	+/- 236	6.9%	+/-1	High
\$300,000 to \$499,999	9,822	+/- 539	42.5%	+/-2.1	High
\$500,000 to \$999,999	10,498	+/- 501	45.4%	+/-1.8	High
\$1,000,000 or more	656	+/- 154	2.8%	+/-0.7	Moderate
Median value (dollars)	507,667	+/- 9,072	X	X	High

MORTGAGE STATUS					
Owner-occupied units:	23,129	+/- 584	100.0%	X	High
Housing units with a mortgage	17,734	+/- 587	76.7%	+/-1.6	High
Housing unit without a mortgage	5,395	+/- 387	23.3%	+/-1.6	High
SELECTED MONTHLY OWNER COSTS (SMOC)					
Housing units with a mortgage:	17,734	+/- 587	100.0%	X	High
Less than \$300	12	+/- 19	0.1%	+/-0.1	Low
\$300 to \$499	173	+/- 88	1.0%	+/-0.5	Moderate
\$500 to \$699	134	+/- 64	0.8%	+/-0.4	Moderate
\$700 to \$999	358	+/- 109	2.0%	+/-0.6	Moderate
\$1,000 to \$1,499	2,184	+/- 277	12.3%	+/-1.5	High
\$1,500 to \$1,999	3,756	+/- 378	21.2%	+/-2	High
\$2,000 or more	11,117	+/- 549	62.7%	+/-2.3	High
Median (dollars)	2,290	+/- 56	X	X	High
Housing unit without a mortgage:	5,395	+/- 387	100.0%	X	High
Less than \$100	47	+/- 61	0.9%	+/-1.1	Low
\$100 to \$199	127	+/- 66	2.4%	+/-1.2	Moderate
\$200 to \$299	317	+/- 108	5.9%	+/-2	Moderate
\$300 to \$399	467	+/- 132	8.7%	+/-2.4	Moderate
\$400 or more	4,437	+/- 358	82.2%	+/-3	High
Median (dollars)	595	+/- 25	X	X	High
SELECTED MONTHLY OWNER COSTS AS A PERCENTAGE OF HOUSEHOLD INCOME (SMOCAPI)					
Housing units with a mortgage (excluding units where SMOCAPI cannot be computed):	17,710	+/- 588	100.0%	X	High
Less than 20.0 percent	5,006	+/- 385	28.3%	+/-2	High
20.0 to 24.9 percent	2,881	+/- 334	16.3%	+/-1.8	High
25.0 to 29.9 percent	2,493	+/- 305	14.1%	+/-1.7	High
30.0 to 34.9 percent	2,009	+/- 284	11.3%	+/-1.6	High
35.0 percent or more	5,321	+/- 449	30.0%	+/-2.3	High
Not computed	24	+/- 27	100.0%	X	Low
Housing units without a mortgage (excluding units where SMOCAPI cannot be computed):	5,356	+/- 386	100.0%	X	High
Less than 10.0 percent	2,152	+/- 277	40.2%	+/-4.3	High
10.0 to 14.9 percent	1,150	+/- 207	21.5%	+/-3.5	High
15.0 to 19.9 percent	729	+/- 187	13.6%	+/-3.4	Moderate
20.0 to 24.9 percent	363	+/- 107	6.8%	+/-1.9	Moderate
25.0 to 29.9 percent	211	+/- 82	3.9%	+/-1.5	Moderate
30.0 to 34.9 percent	144	+/- 66	2.7%	+/-1.2	Moderate
35.0 percent or more	607	+/- 168	11.3%	+/-3	Moderate
Not computed	39	+/- 36	100.0%	X	Low
GROSS RENT					
Occupied units paying rent:	17,624	+/- 640	100.0%	X	High
Less than \$200	301	+/- 147	1.7%	+/-0.8	Moderate
\$200 to \$299	352	+/- 130	2.0%	+/-0.7	Moderate
\$300 to \$499	565	+/- 152	3.2%	+/-0.9	Moderate
\$500 to \$749	2,075	+/- 316	11.8%	+/-1.7	High
\$750 to \$999	5,404	+/- 470	30.7%	+/-2.4	High
\$1,000 to \$1,499	5,302	+/- 477	30.1%	+/-2.5	High
\$1,500 or more	3,625	+/- 380	20.6%	+/-2	High
Median gross rent (dollars)	1,063	+/- 51	X	X	High
No cash rent paid:	270	+/- 102	100.0%	X	Moderate

Council District # 6

GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)

Occupied units paying rent (excluding units where GRAPI cannot be computed):	17,395	+/- 647	100.0%	X	High
Less than 15.0 percent	2,553	+/- 334	14.7%	+/-1.8	High
15.0 to 19.9 percent	2,965	+/- 390	17.0%	+/-2.2	High
20.0 to 24.9 percent	2,917	+/- 377	16.8%	+/-2.1	High
25.0 to 29.9 percent	2,343	+/- 345	13.5%	+/-1.9	High
30.0 to 34.9 percent	1,458	+/- 299	8.4%	+/-1.7	Moderate
35.0 percent or more	5,159	+/- 491	29.7%	+/-2.6	High
Not computed	499	+/- 163	100.0%	X	Moderate

Source: U.S. Census Bureau, 2006-2010 American Community Survey (ACS), 5-Year estimates

Produced by: City of Seattle, Department of Planning and Development (DPD)
On the Web at: http://www.seattle.gov/dpd/Research/Population_Demographics/Overview/

Notes:

This is one of four reports that have been adapted from the ACS "Data Profile" (DP) Series. The four DP tables published by the Census Bureau are: DP02 Selected Social Characteristics; DP03 Selected Economic Characteristics; DP04 Selected Housing Characteristics; DP05 Demographic and Housing Estimates.

DPD has adapted these DP tables for reporting ACS estimates for locally-defined geographies. The locally defined areas covered in these reports are made up of multiple census tracts (except for a few Community Reporting Areas that are made up of only one Census Tract each), therefore estimates shown for these geographies are based on aggregating estimates for multiple census tracts. For ease of calculation, medians are the average of the medians.

¹The ACS is a sample survey and as such, estimates carry sampling error. Margins of error (MOEs) provide a measure of sampling error

The MOEs displayed for the aggregated estimates in these reports could only be approximated using the formulas provided by the Census Bureau. These formulas do not account for "covariance" (or inter-relationship) between the aggregated estimates, and can understate or—more commonly—overstate the margins of error. In some cases, actual MOEs may be much different than approximated.

MOEs of +/- 0.1 and below are displayed as +/- 0.1 based on Census Bureau convention.

² The reliability indicator of High, Moderate, or Low is meant to provide a general sense of an estimate's reliability. Data users will need to use discretion in identifying the level of reliability appropriate for their purposes.

"High" reliability: MOE is less than or equal to 20% of the estimate. Indicates that sampling error is small relative to the size of the estimate. Flagged green.

"Moderate" reliability: MOE is between 20% and 66.7% of the estimate. Flagged yellow to indicate that the estimate should be used with caution.

"Low" reliability: MOE is over 66.7% of the estimate. Flagged red to warn that sampling error is large relative to the estimate and that the estimate is very unreliable.

"NC": Estimate is 0. Reliability cannot be calculated.

Percent Margin of Error "W" value indicates the standard formula for estimating the percent MOE could not be applied (due to negative value under square root).

For more about MOEs, see Census Bureau notes below. For formulas, see "American Community Survey Multiyear Accuracy of the Data (3-year 2008-2010 and 5-year 2006-2010)," http://www.census.gov/acs/www/Downloads/data_documentation/Accuracy/MultiyearACSAccuracyofData2010.pdf.)

Census Bureau notes for DP04:

"The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with/without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOCAPI and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available."
