The Director shall establish by Director's Rule reasonable procedures and standards for refund requests, including but not limited to limitations on the time for submitting refund requests and the amount of the refund, considering among other factors, on the stage of permit review and type of permit.

22.900B.060 Revisions and additions to applications

- A. According to standards promulgated by the Director, the Director may assess an additional fee for the plan examination of previous designs if a subsequent redesign of a project is submitted prior to permit issuance. The revision fee shall be assessed at the SDCI hourly rate not to exceed the fee that would have been charged for the original design, provided that if the application is a Land Use application that requires additional Land Use review, the Land Use hourly rate in effect at the time the revision is filed shall be charged for that portion of the work. The total fee is the fee for the final design plus the revision fee.
- B. The Director may assess a fee in addition to fees already charged for the original permit if the applicant makes an amendment to an existing unexpired or reestablished permit. 2. The single variance fee shall be applicable whether the project requires one or multiple variances.
3. Includes short subdivisions in environmentally critical areas.
4. Includes unit-lot subdivisions and full subdivisions in environmentally critical areas.
5. This fee applies if design review is initiated only for tree protection and the application has no other review under Items 1 - 14.
6. The fees for interpretations of Chapters 25.12, 25.20, 25.22, and 25.24 shall be collected by the Director of the Department of Neighborhoods.

**CHAPTER 22.900D —
FEES FOR NEW AND ALTERED BUILDINGS AND EQUIPMENT**

22.900D.010 Development permit fees

- A. General. The development fee shall cover the application, review and inspection process associated with new construction, additions, alterations, and repairs to existing buildings and establishment of use. The development fee shall consist of a permit fee and, where plans are reviewed, a separate plan review fee. The permit fee and plan review fee shall be determined based on valuation, except as provided below.
- B. Time of Payment of Fees
1. Amount Due Prior to Application. Fees for building pre-application conference and any additional fees accrued after the conference shall be due prior to permit application. See subsection 22.900D.010.I for building pre-application conference fees.
 2. Amounts Due at Time of Application. The following amounts are due at the time of application:
 - a. Applications for subject-to-field-inspection (STFI) permits shall pay a fee equal to the permit fee specified in Table D-2 for 22.900D.010.
 - b. Applications for building and/or mechanical permits with plan review shall pay the plan review fee plus 1/2 the permit fee as specified in Table D-2 for 22.900D.010.
 - c. For development permits approved to be issued in phases, the plan review fee plus 1/2 the permit fee due at the time of application of the first phased submittal shall be calculated based upon the value calculated in accordance with Section 22.900D.010.C for the entire scope of the development permit. The remaining portion of the permit fee will not be collected until issuance of the final phase of the development permit that completes the scope of the proposed building project.
 - d. For other applications, the minimum fee specified in Table D-2 for 22.900D.010 shall be collected at the time of application.
 3. Fees collected at the time of application will be based on Department estimates of the total fees due at the time of permit issuance. The final Department fees will be recalculated during review, and any additional amount due shall be collected prior to the issuance of the permit, approval, denial, decision or recommendation, provided that hourly fees may be collected earlier, as described in Section 22.900B.010.D. Any fee in excess of the final calculated fee shall be refunded pursuant to Section 22.900B.050 and subsection 22.900D.010.K.
 4. If, when determining the project value and fees during initial review, the previously collected application fee is determined to be less than 90 percent of the revised application fee, review work after the initial review will not proceed until the balance is paid to the Department.
- C. Determination of value
1. The Director shall determine the value of construction for which the permit is issued (the estimated current value of all labor and materials, whether actually paid or not, as well as all finish work, painting, roofing, electrical, plumbing, heating, air-conditioning, elevators, fire-extinguishing systems, automatic sprinkler systems, other mechanical systems, retaining

walls, rockeries and any other permanent work or permanent equipment, but not including furnishings). The building valuation data from the International Code Council and other valuation criteria approved by the Director will be used to determine the value of construction.

2. Dish or panel antennae. The fee for processing applications for installation of a dish or panel antenna shall be charged on the value of the foundation and supports constructed for the installation. The value of the dish or panel antenna shall not be included in the determination of value.
3. The development fee for parks and playgrounds shall be based on the project value, including the value of improvements for structures incidental to the park or playground such as retaining walls, rockeries and restrooms, but shall not include the value of playground equipment.
4. The valuation shall be based on the highest type of construction to which a proposed structure most nearly conforms, as determined by the Director.

D. Phased permits

- 1.a. If a new building project is proposed to be built in phases and the Director determines that separate development permits may be issued for approved portions of the project, the development fee for the entire permit shall be based on the value of work according to Table D-2 for 22.900D.010.
- 1.b. If the shoring and/or excavating work is included with the complete foundation (below grade) phase of the building project, the fees for such work shall be included in the fees described above.
- 1.c. If the proposed building project includes a separate shoring and/or excavation phase that is not combined with the complete foundation (below grade) phase, the shoring and/or excavation work will be reviewed and issued as a separate permit. The fees for the excavation portion of that permit shall be based on Section 22.900D.145, and the fees for the shoring portion of that permit shall be based on the value of that structural portion of the work according to Table D-2 for 22.900D.010. No credit will be given for any of these fees toward the phased building permit.
2. In addition to the fee specified in subsection 22.900D.010.D.1 above, if an applicant requests division of an already-submitted permit application a fee shall be charged for each separate application as specified in Table D-2 for 22.900D.010, and the fee to process this request shall be charged at the SDCI hourly rate.

E. Calculation of Development Fees. The development fee for a permit shall be calculated as described in this Section 22.900D.101.

1. Table D-1 for 22.900D.010 establishes the Development Fee Index for value-based development fees. Except as specified in Section 22.900D.010.F below, Table D-2 for 22.900D.010 establishes the permit fee and plan review fee, calculated as a percentage of the development fee index where determined by value.
2. For the calculation of the Development Fee Index, as specified in Table D-1 for 22.900D.010, if a building is more than three stories high using construction Types 1A and 1B, the total

building valuation may be modified for structure height depending on the building occupancy as described in the current Director’s Rule clarification on “Implementation of the Fee Subtitle, Building Valuation,” which is incorporated by reference.

3. If two or more buildings are allowed under one permit, they shall be assessed fees as separate buildings under Table D-2 for 22.900D.010. The individual fees shall then be added to determine the total development fee for the permit.

F. Blanket Permits

1. The application fee for a blanket permit to cover initial nonstructural tenant alterations within the first three years of the first tenant alteration permit shall be charged at the rate of \$5.65 per 100 square feet of space to be improved within the life of the permit. A deposit based on the estimated value of the work to be completed during the life of the permit shall be collected at the time of application. As individual tenant spaces are reviewed, the amount of the fee equivalent to the floor space examined shall be deducted from the deposit per Table D-2 for 22.900D.010.
2. The application fee for a blanket permit to cover nonstructural tenant alterations in previously-occupied space, or to cover initial nonstructural tenant alterations after three years of the first tenant alteration permit, is one times the base fee. A deposit based on the estimated value of the proposed work within 18 months shall be collected at the time of application. As individual tenant spaces are reviewed, the fee for the work to be done shall be calculated according to Table D-2 for 22.900D.010 and deducted from the deposit.
3. If the estimated blanket fee deposit is used up in less time than the life of the permit and work remains to be done, an additional deposit shall be paid based on the estimated floor area remaining to be improved during the remaining life of the permit. If a portion of the deposit is unused at the end of the life of the permit and work remains to be done, credit for the balance of the deposit may be transferred from the expiring permit to a new blanket permit. To minimize additional accounting costs associated with blanket permits, if more than two deposits are made during the life of the blanket permit, the minimum amount of each subsequent deposit shall be \$2,000.

- G. Revisions to Issued Permits. Fees for revisions to issued permits shall be charged according to standards promulgated by the Director that approximate the additional cost of reviewing the revisions. A nonrefundable fee of one times the base fee shall be paid at the time the revisions are submitted.
- H. Certificate of Occupancy. The issuance of a Certificate of Occupancy for existing buildings, either if no Certificate of Occupancy has previously been issued or if a change of occupancy is requested, requires a building permit. If there is no construction valuation (there is no work which would require a building permit), the minimum building permit fee shall be assessed. In addition to the minimum building permit fee, if records research, plan examination or inspection is required, charges shall be assessed at the SDCI hourly rate. If work is being done as authorized by a permit, the permanent Certificate of Occupancy fee is not assessed in addition to the building permit fee. The fee for a temporary Certificate of Occupancy shall be charged at the rate of 1/2 the base fee. The fee for the duplication of a Certificate of Occupancy is \$35.10 unless records research, plan examination or inspection is required, in which case charges shall be assessed at the SDCI hourly rate.
- I. Building Pre-application Conferences
 - 1. Required Building Pre-application Conferences. If there is a requirement for a pre-application or pre-design conference, such as buildings subject to the Seattle Building Code special provisions for atriums (Section 404), or highrise buildings (Section 403), 35 percent of the estimated plan review fee for the structure shall be charged and paid as specified in subsection 22.900D.010.B, and applied toward the development permit fee provided the permit application is made within six months of the date of the pre-application conference. (See Table C-1 for 22.900C.010 for land use pre-application conference fees.)
 - 2. Other Building Pre-application Conferences. If a pre-application conference is requested by the applicant but is not required by Code, a fee equal to 1.5 times the base fee shall be paid no later than the time of the conference. Such fee is required for each meeting held on a project. In addition to the minimum building pre-application conference fee, if additional staff, research, preliminary plan examination or inspection is required, charges shall be assessed at the SDCI hourly rate and shall be charged and paid as specified in subsection 22.900D.010.B.
- J. Correction Fee. After written notice to the applicant, a Correction Fee of two times the SDCI base fee may be charged for each additional correction cycle required due to insufficient response from the applicant.
- K. Renew or Reestablish a Permit
 - 1. Fees to renew or reestablish a permit shall be charged according to Table D-2 for 22.900D.010. If the fee for a new permit would be less than 1.5 times the base fee, then the fee to renew or reestablish the permit shall be the same as for a new permit.
 - 2. If changes are made to the original approved plans, an additional fee shall be charged for plans examination review and inspections at the SDCI hourly rate.

See Section 22.900D.145.

22.900D.030 Concrete mix design approval

22.900D.040 Repealed

See Section 22.900D.145.

22.900D.050 Repealed

22.900D.150 Electrical permit fees

A. Permit Fees When Plans and Specifications Are Reviewed

1. Permit fees for electrical installations for which plans and specifications are reviewed by the Director shall be charged on a valuation basis as set forth in Table D-14 for 22.900D.150.
2. The Director shall determine the value of the construction, which is the value to the vendee of all labor, material, fittings, apparatus and the like, whether actually paid for or not,

supplied by the permit holder and/or installed by the permit holder as a part of, or in connection with, a complete electrical system, but that does not include the cost of utilizing equipment connected to the electrical system. The Director may require verification of the stated cost of any work subject to these fees.

If the cost of any proposed installation is unknown, an estimate of the cost shall be made and used to compute the permit fee.

The permit fee specified in Table D-14 for 22.900D.150 is due at the time of application. Upon completion of the installation, a fee adjustment may be made in favor of The City of Seattle or the permit holder, if requested by either party.

3. If a duplicate set of approved plans is submitted for examination and approval at any time after a permit has been issued on the original approved plans, hourly charges for Departmental work shall be assessed.

B. Permit Fees If Plans and Specifications Are Not Required

1. Permit fees for electrical installations, additions and alterations for which plans and specifications are not required shall be as set forth in Table D-15 for 22.900D.150. The permit fee specified in Table D-15 for 22.900D.150 is due at the time of application.
2. Permit fees for temporary electrical installations shall be charged for services only at the rate set forth in Table D-15 for 22.900D.150.
3. If the base fee and SDCI hourly rate are used to calculate the fee in Table D-15 for 22.900D.150, use Section 22.900B.010 to determine the permit fee.
4. Permit exemptions in the Electrical Code apply to the fees in 22.900D.150.

C. Phased permits

1. This is not to be interpreted as requiring inspection fees the first time a job is rejected for failure to comply with the requirements of this Code, but as controlling the practice of calling for inspection or reinspection.

Reinspection fees may be assessed when the permit is not properly posted on the work site, the work to be inspected is not under test, and for failure to make required corrections. To obtain a reinspection the applicant shall file an application therefore in writing upon a form furnished for that purpose, and pay the reinspection fee in accordance with this code. In instances in which reinspection fees have been assessed, no additional inspection of the work will be performed until the required fees have been paid.

22.900G.080 Design Commission fees

- A. City Capital Improvement Projects, as Defined in Section 3.58.020. Design Commission fees shall be assessed at a rate of three-tenths of one percent (0.3%) of the construction cost for City capital improvement projects for which billing will commence on or before December 31, 1998, except as specified in subsections 22.900G.080.B and 22.900G.080.D. Billing will occur at the time of contract award by the Department of Finance, who will forward the bills to the Department for distribution to appropriate City departments. Payment will be made through a fund transfer to the Department Operating Fund.
- B. Major City Capital Improvement Projects. Except as specified in subsection 22.900G.080.D, Design Commission fees shall be assessed at a rate of up to three-tenths of one percent (0.3%) of the construction cost for major City capital improvement projects (greater than \$10,000,000 construction budget) for which billing will commence on or before December 31, 1998. The fee shall be set through negotiations with the City Budget Director and the Design Commission. Billing shall occur in accordance with a schedule agreed upon by the City Budget Director and the Design Commission.
- C.
 - 1. For City capital improvement projects, as defined in Section 3.58.020, for which no billing commenced under subsections 22.900G.080.A or 22.900G.080.B on or before December 31, 1998, and that do not fall within an exception in subsection 22.900G.080.D, the City Budget Director, the Design Commission, and each affected City department will attempt to agree on that department's projects that are expected to be assessed by the Design Commission in the following year. If no agreement is reached by a date established by the City Budget Director, the City Budget Director will establish the list of such projects. The City Budget Director may establish the assessable appropriation of a City capital improvement below the actual appropriation in order that the project not be assessed an unduly high fee relative to the cost of the anticipated Design Commission review.
 - 2. The City Budget Director will assess a uniform fee of up to one percent of the total of all departments' capital improvement project appropriations for those projects assessable for Design Commission fees. Such fee shall be set so as to be sufficient, when combined with other funding sources, to support the anticipated costs of the Design Commission for the following year, but in no case shall the fee exceed one percent.
 - 3. The Director of the Seattle Department of Construction and Inspections shall bill each department in the amount determined by the City Budget Director, and that amount shall be paid by fund transfer to the Department Operating Fund.
 - 4. If a capital improvement project's appropriation has been included in a fee assessed under this section, but Design Commission review of that project is delayed into a future year, that appropriation amount shall not be counted again in the calculation of the fee for any future

year. If review of a project on which a fee has been assessed under this subsection 22.900G.080.C is canceled, or if review commences on a project that, but for timeliness, would have been included but was not included in the calculation of a fee under this subsection 22.900G.080.C, the City Budget Director shall adjust the department's total assessable appropriation downwards or upwards, respectively, when establishing the subsequent year's fee.

- D. Special Exceptions. The Commission will bill non-City projects at the hourly rate of \$109 an hour per Commissioner for subcommittee review, or \$770 an hour for full Commission review, except that fees may be waived, in whole or in part, at the discretion of the Commission with the concurrence of the City Budget Director in the following circumstances:
 - 1. Whenever Commission fees, if charged, would be disproportionate to the sums available and could cause abandonment of the project for the following types of projects: artworks, projects funded by grants and donations, neighborhood self-help projects undertaken by volunteers and nonprofit organizations, and small capital improvements;
 - 2. For low-income and special needs housing projects subject to Design Commission review.

E. Street Use Permit Reviews.

Street use permit reviews, which are required before issuance of a street use permit for improvements within the public right-of-way, will be billed at the hourly rate of \$109 an hour per Commissioner for subcommittee review, or \$770 an hour for full Commission review. Billing will be sent to the Seattle Department of Transportation for inclusion into the plan review costs charged to the applicant, or be billed directly by the Department. For those projects billed through the Seattle Department of Transportation, payment will be made by a fund transfer from the Seattle Transportation Operating Fund to the Department Operating Fund from funds paid by the applicant.

- F. Early Master Use Permit Stage or Projects Outside City Contract Process. For design review at an early Master Use Permit stage or for projects outside The City of Seattle contract award process, Design Commission fees will be billed by the Department at an hourly rate of \$109 an hour per Commissioner for subcommittee review, or \$770 an hour for full Commission review.
