

NOTICE OF UPCOMING WORK

September 6, 2024 | SOIL AND GROUNDWATER INVESTIGATION IN YOUR NEIGHBORHOOD

PROJECT DESCRIPTION

Next week, Seattle Public Utilities (SPU) will be working in your neighborhood. To inform the design of a future sewer main replacement, SPU will be drilling holes in the public right-of-way to investigate soil and groundwater conditions along the existing sewer pipe. Once the drilling is complete, the ground surface will be restored to its near-original condition.

The sewer main will be rehabilitated as part of a city-wide restoration effort that enables SPU to continue providing reliable sewer services to customers.

SCHEDULE

Crews will conduct the soil and groundwater investigation, including drilling at the project site, during the week of September 9, 2024.

LOCATION

Work will take place within the public right-of-way on S Stevens St., just east of Airport Way. The map shows the work area and “no parking” zones.

ANTICIPATED IMPACTS

During the work you can expect:

- Large equipment staged in the public right-of-way.

Seattle Public Utilities provides essential services — pure mountain drinking water, recycling and composting that lead the nation, and sewer and drainage systems to protect our local waterways — that safeguard your health and our shared environment and help keep Seattle the best place to live.

- Construction-related traffic, noise, vibrations, and dust; occasional loud noise from drilling.
- Work hours and parking restrictions on S Stevens St are from 8 am to 5 pm. Please observe all no-parking signs. View the map for “no-parking” zones. As crews finish work in the area, parking restrictions will be lifted.
- A few 55-gallon drums containing soil will be temporarily stored in a fenced-off area within the public right-of-way. They will be stored for up to 40 days and occupy a parking space.
- Driveways will not be blocked. Sidewalks will remain open.
